A1885	Continued From page 1 This REQUIREMENT is not met as evidenced by: Based on document review and staff interview, it was determined that the facility failed to ensure that a complete medical history is obtained prior to a procedure in accordance with its Medical Staff Rules and Regulation. Findings include: Reference: Facility Medical Staff Rules and Regulation states, "... VII. Medical Records ... 2. Under no circumstances may an operation be performed until the patient's history, physical examination ... are recorded on the medical record." 1. The medical records of Patients #2 - #20 lacked a complete medical history performed by the physicians prior to a procedure. The medical records have a Patient Information sheet that includes the patient's medical history, past surgery/hospitalization, allergies, medications, etc. which is completed and signed by the patient. As per Staff #7, this form is reviewed and utilized for additional notes by the physicians as a medical history prior to the procedure.	A1885		
A2166	8:43A-8.4(a) NURSING SVCS: RESPONSIBILITIES OF LIC NSG PER Licensed nursing personnel shall provide nursing care to patients in accordance with the State of New Jersey Nursing Practice Act, N.J.S.A. 45:11-23 et seq., as interpreted by the New Jersey State Board of Nursing, and written job descriptions. A2166	Continued From page 2 documented in the patient's medical record. This REQUIREMENT is not met as evidenced by: Based on medical record review and interview, it was determined that nursing personnel did not provide nursing care in accordance with a recognized standard of practice and its policy. Findings include: Reference #1: The Nursing Practice Act for the State of New Jersey states: "The practice of nursing as a registered professional nurse RN is defined as diagnosing and treating human responses to actual or potential physical and emotional health problems, through such services as casefinding, health teaching, health counseling, and provision of care supportive to or restorative of life and wellbeing, and executing medical regimens as prescribed by a licensed or otherwise legally authorized physician or dentist." Reference #2: Facility policy "Perioperative Pain Management at MMA" states, "... To make the patient's recovery after surgery and anesthesia more comfortable, the PACU nurse is advised to do a pain assessment based on a scale of 0-10, 0- no pain, 10, pain is absolutely unbearable ..." 1. The medical record of Patient #7 revealed that the patient underwent a procedure on 10/8/16. The PACU (post anesthesia care unit) Post Operative Admission sheet indicated that at 4:30 PM, the patient met discharge criteria. One indicator of the Discharge Criteria is "Pain score <	A2166

A2166	Continued From page 3 (less) 3." There was no evidence in the medical record that the patient's pain was assessed throughout the PACU stay and prior to discharge. 2. The medical record of Patient #6 revealed that the patient underwent a procedure on 10/25/16. The PACU Post Operative Admission sheet indicated that at 12:15 PM the patient met discharge criteria. One indicator of the Discharge Criteria is "Pain score < (less) 3." There was no evidence in the medical record that the patient's pain was assessed in PACU and prior to discharge. 3. The medical record of Patient #2 revealed that the patient underwent a procedure on 12/30/15. Post procedure there was no evidence that the patient's pain was assessed prior to the patient's transfer. 3. The medical record of Patient #5 indicated in the Patient's Information Medical History sheet that the patient was allergic to Dapro and Ibuprofen. The Post Operative Orders dated 10/14/16 contained an order for "Ibuprofen 800 mg (milligram) po (by mouth) prn (as needed) cramping x1." Although the patient did not require any medication for cramping post operatively, there was no evidence that nursing staff consulted with the physician for clarification or discontinuation of the order. 4. The medical record of Patient #7 indicated on 10/22/16 that post-operatively, the patient was maintained on Lactated Ringers at 125 ml (milliliter) per hour. There was no evidence in the Post Operative Orders of an intravenous fluid order. 5. The medical record of Patients #4 indicated	A2166

A2285	Continued From page 5 conducted on 11/2/16, it was determined that the facility failed to ensure the implementation of acceptable standards of practice for medication preparation. Findings include: Reference: Institute for Safe Medication Practices (ISMP) Safe Practice guidelines for Adult IV Push Medications, Appendix A, states, " 3.5 Do NOT withdraw IV push medications from commercially available, cartridge-type syringes into another syringe for administration." 1. Carpuject prefilled syringe cartridges of Labetalol were found in the anesthesia cart of Operating Room #4. 2. Upon interview, Staff # 4 stated that the facility withdraws the medication using a syringe and did not use carpuject holding devices. 3. These findings were confirmed by Staff #2.	A2285		
A4098	8:43A-14.2(b)(4) INFEC PREV & CONTROL: POL & PROCEDURES The infection control committee, with assistance from each service in the facility, shall develop, implement, and review, every three years or more frequently as necessary, written policies and procedures regarding infection prevention and control, including, but not limited to, policies and procedures regarding the following: Infection control practices, including universal precautions, in accordance with the Occupational Safety and Health Administration (OSHA) rule 29 CFR Part 1910.1030, Occupational Exposure to Bloodborne Pathogens, incorporated herein by	A4098

A4098	Continued From page 6 reference. This REQUIREMENT is not met as evidenced by: Based on observation and staff interview conducted on 11/1/16, it was determined that the facility failed to ensure compliance to OSHA regulations. Findings include: Reference: OSHA (Occupational Safety and Health Administration) 29 CFR part 1910.1030(d)(3)(ii) states, "Use. The employer shall ensure that the employee uses appropriate personal protective equipment unless the employer shows that the employee temporarily and briefly declined to use personal protective equipment when, under rare and extraordinary circumstances, it was the employee's professional judgment that in the specific instance its use would have prevented the delivery of health care or public safety services or would have posed an increased hazard to the safety of the worker or co-worker. When the employee makes this judgement, the circumstances shall be investigated and documented in order to determine whether changes can be instituted to prevent such occurrences in the future." 1. During a tour outside OR #2, in the presence of Staff #2, Staff #9 was observed exiting OR #2 at 12:10 PM, carrying a container of soiled instruments without the benefit of protective gloves. A4154	Continued From page 9 This REQUIREMENT is not met as evidenced by: Based on observation, review of facility policies and procedures, review of nationally recognized guidelines, and staff interview, it was determined that the facility failed to disinfect intravenous ports according to established CDC guidelines. Findings include: Reference #: CDC, Guidelines for the Prevention of Intravascular Catheter-Related Infections, 2011, pg. 55 states, " ... Appropriate disinfectants must be used to prevent transmission of microbes through connectors [357]. Some studies have shown that disinfection of the devices with chlorhexidine/alcohol solutions appears to be most effective in reducing colonization [195, 196]. ... . " 1. On 11/1/16, Staff #1 indicated that the facility follows CDC guidelines for its infection control practices. 2. During an observation of Patient #1 on 11/1/16, Staff #4 administered IV medication numerous times to Patient #1 without first disinfecting his/her IV port with alcohol. 3. Staff #1 and Staff #7 confirmed the above findings.	A4154

A4190	Continued From page 15 2. The facility failed to ensure compliance with AAMI ST79 guidelines. 3. This finding was confirmed by Staff #3. Reference #2: AAMI Sterilization in Health Care Facilities, 2014 edition, ST 79, section 3.3.6.5 Temperature states, "... The decontamination area should have a temperature controlled between 16 degrees C [Celsius] and 18 degrees C (60 degrees F [Fahrenheit] and 65 degrees F). ... bacteria thrive at high temperatures; cool temperatures in the decontamination area might help minimize bioburden." 1. During a review of SPD Temperature and Relative Humidity logs, the "Decontamination Area Documentation of Temperature and Humidity" logs evidenced daily temperatures above 65 degrees F from 9/1/16 through 10/29/16. a. The log indicated that the facility's acceptable temperature range in the Decontamination Area is between "60 degrees F and 65 degrees F." 2. The facility failed to ensure temperature control is implemented in the Decontamination Area, in accordance with AAMI guidelines and its own policy. 3. These findings were confirmed by Staff #2. RE: Metropolitan Surgical Associates

Dear Ms. Zizza

Enclosed please find a copy of our completed Plan of Correction (PoC) in response to the Statement of Deficiency from the New Jersey Department of Health and Senior Services. Kindly confirm receipt and acceptance upon receiving this document.

We greatly appreciate your time and professional courtesy with regards to this matter. Should you have any additional question please do not hesitate to contact me directly.

Very Truly Yours,

Administrator

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)	ID PREFIX TAG	PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)	(X5) COMPLETE DATE
A 000	8:43A INITIAL COMMENTS A State Re-licensure survey was conducted on 11/1 & 11/2/16 which resulted in deficiencies. Abbreviation Key: AAMI=Association for the Advancement of Medical Instrumentation AORN= Association of periOperative Registered Nurses CDC=Centers for Disease Control and Prevention CI=Chemical Indicator/Integrator HICPAC=Hospital Infection Control Practices Advisory Committee IDSA=Infectious Disease Society of America IFUs=Instructions for Use OPA=Ortho-Phthalaldehyde OR=Operating Room OSHA=Occupational Safety and Health Administration PPE=Personal Protective Equipment SHEA=Society of Healthcare Epidemiology of America TOP=Termination of Pregnancy	A 000		
A1885	8:43A-6.4(a) PT CARE POL & SVCS: MED HISTORY & PHYS EXAM The facility shall specify in its policies and procedures the circumstances under which the patient's medical history will be obtained, the contents of the medical history, and the frequency of updating. The contents shall include at least past surgical procedures and medical/health conditions, allergies, adverse reactions to drugs, and current medications.	A1885		

TITLE

(X6) DATE

A1885

1. The medical chart will include a complete medical history and physical examination, performed, signed and dated by the patient's attending physician prior to any procedure performed at the ASC.

2. Revision of the medical chart provides a systemic change that will ensure that that this deficient practice does not recur.

3. The ASC will monitor this POC by auditing patient charts to assure ongoing compliance. This will be performed by the DON or a DON designee on a monthly basis and will become part of the Facility's ongoing chart review process. The goal is complete compliance with the POC and findings of the monitoring process will be reported to the QAC.

4. This corrective action was completed on Jan 11, 2017, following the identification of the deficiency by the Site Survey Team on Nov 2, 2016.

A2166 Reference 1 and 2/ 1,2,3

1. The medical chart will now provide written documentation of patients' pain assessment by the nursing staff.

2. The PACU portion of the medical chart was amended to provide a systemic correction to this deficiency and thus provide a written record of patients' pain assessment.

3. Compliance of this corrective action will be monitored via the chart review process. The DON will, as part of the monthly chart auditing process, check to assess that the medical chart is complete in this regard. This monitoring will be ongoing, with the goal of achieving complete compliance to this plan of correction. Identified deficiencies will be addressed by the DON to the nursing staff and reported to the Quality Assurance Committee.

4. The POC was fully implemented as of Nov 17, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

A2166 Reference 2/ 3

1. Nursing staff has been reminded that merely not dispensing medication that may share hypersensitivity concerns with a patient's known allergy is insufficient and that potential interactions must be positively identified and clarified with the potential prescribing physician.

2. The medical chart has been revised to facilitate systemic correction of this deficiency. It has been amended to contain a template for the listing of allergies directly over the prescribing orders template so that potential drug interactions are easier to note. This revision will help assure the efficient comparison of documented allergies to the prescribing orders for every patient by the responsible RN and the resolution of any identified concerns with the prescribing physician. This systemic correction will ensure against recurrence of this deficiency.

3. Monitoring of this POC will occur via chart review. The DON will, as part of the monthly chart auditing process, check to assess that there no prescribed orders which are thought to have potential adverse reactions with patients' known allergens. This monitoring will be ongoing with the goal of achieving complete compliance to this plan of correction. Identified deficiencies will be addressed by the DON to the medical and nursing staff, as well as, reported to the Quality Assurance Committee.

4. This POC was fully implemented as of February 1, 2017, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

A2166 Reference 2/ 4, 5

1. Upon transfer from the OR to the PACU, the attending physician must perform a medication reconciliation to avoid errors of duplication or omission. All medicine and intravenous fluid orders must be reviewed and rewritten upon transfer of the patient between the two care areas.

2. The medical chart has been modified to assure systemic compliance with this corrective action. The order templates have been amended to facilitate comparison and prescribing of medications and intravenous fluids between the OR and PACU. The identified deficiency and the POC were reviewed in separate attendance mandated meetings of the nursing and physician staff.

3. Monitoring to assure against recurrences of this deficiency will occur by incorporating assessment of adherence to this POC into the monthly chart auditing process that is conducted by the DON, or a DON designee. The DON is tasked with reporting compliance and / or identified deficiencies to this corrective action to the QAC.

4 This POC was fully implemented as of Jan 17, 2017, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

A2166 Reference 2/ 6

1. Physicians transferring a patient from the Facility to the hospital will enter such an order into the patient's medical record.

2. Identification of this deficiency and the corrective action was reviewed at an attendance mandated quality assurance meeting of the medical staff. Awareness by the physician staff to document a transfer order, along with, an awareness by the nursing staff of such a requirement, will assure ongoing and systemic compliance.

3. The DON will review chart of all patients entered into the Transfer Log to assess for ongoing compliance to the POC. The monitoring of this corrective action will be ongoing with the goal of complete compliance. Deficiencies will be brought to the QAC for follow up.

4. This POC was fully implemented as of Nov 17, 2017, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

A2285

1. The ASC strives to maintain compliance with all applicable regulatory requirements, including those relating to the purchase, storage, administration and disposition of pharmaceuticals.

Medications from cartridge-like syringes will not be withdrawn into a second syringe for administration.

2. The Facility has purchased an adequate supply of Carpujet Injectors and a memo has been issued by the DON in conjunction with the ASC's Pharmacy Consultant informing the medical staff of this deficiency and its correction. The memo also delineated the location of the injectors. These systemic changes will assure that the observed deficiency does not recur.

3. The DON will monitor for compliance of this corrective action via assessment polling during staff meetings, as well as, via observation of daily routines. Any deviations will be corrected if and when they are identified. The goal is complete adherence to the corrective action and observations of continued deficiencies in this matter will be reported to the Pharmacy Consultant and QAC for further attention.

4. This POC was fully implemented as of Nov 12, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

A4098

1. Personnel will wear appropriate personal protective equipment. The ASC provides easily accessible and appropriate personal protective equipment, such as, gloves, gowns, masks and eye protection to its staff.

2. Systemic compliance will be achieved by an in-service reviewing universal precaution standards and OSHA's blood borne pathogens guidelines as delineated under CFR 1910.1030. The important role of consistent and appropriate PPE use to staff safety and infection / exposure control will be reviewed.

3. On daily basis during hours of operation the ICO will observe staff for sustained compliance to these guidelines. This monitoring is ongoing with the aim of complete compliance to these standards. The ICO will report to the QAC if lapses to these employee safety guidelines.

4. The POC will be fully implemented by March 7, 2017.

OK. ACM. 3/7/17

A4112, A4154

1. The ASC's Safe Medication Administration Guidelines policy incorporates the CDC's recommendations as delineated in Safe Practices for Medical Injections, as well as, Guidelines for the Prevention of Intravascular Catheter Related Infections. An in-service of the medical staff was held on Feb 23, 2017 to review this policy, the recommendations on which it is based and its importance to infection control.

The need to wipe IV injector ports and vials with 70% alcohol and that single dose vials entered more than once for the same patient must be done with new needle and syringe will be discussed in particular and note made of the Survey Team's identification of deficiencies in this regard.

2. An emphasis on the use of alcohol swaps to wipe vials prior to accessing and the need for a new needle and syringe when re-accessing vials will be incorporated into the ASC's continuing education program and addressed, at least annually, during reviews of the Facility's Safe Medication Administration Guidelines.

3. The ICO will inform the QAC that the in-service has occurred and will on a continuous basis monitor for adherence to the Facility's standards and provide immediate remediation to any observed deficiency. The goal for this corrective action is complete adherence to the Facility's guidelines in this matter.

4. The POC was implemented on Feb 24, 2017.

not accepted 3/6/17 RW

A4183 Reference 1, 2

1. During the course of its inspections, the Site Survey Team identified several instances of incomplete adherence to both the ASC's and CDC-HICPAC policies and standards in regards to infection control and hand hygiene by at least two of its staff members. The ASC will hold in-services mandatory to the medical, SPD and cleaning staffs and chaired by the Infection Control Officer. The meetings' purpose will be to review the cited findings, review the ASC's policies regarding hand hygiene and infection control, as well as, role-play scenarios so that staff can better understand the real life applications of these standards.

2. Continued periodic meetings of the above staff addressing these infection control concerns will serve to address these concerns in a systemic fashion.

3. The Infection Control Officer will notify the QAC upon the successful completion of the in-services. The ICO, or a designee, will one month later and monthly, thereafter, conduct random observations of the members of these departments to assess the effectiveness of the POC, assure compliance with the relevant ASC policies and provide corrective guidance. If during the course of this monitoring, systemic deficiencies are encountered, the Infection Control Officer will report to the QAC so that further remediate steps are taken.

Ok. Acm. 3/7/17

4. The POC shall be fully implemented by Mar 7, 2017.

Not accepted 3/6/17 RW

A4183 Reference 3

1. The ASC, to improve its adherence to professionally acceptable standards regarding the achievement of optimal sanitary environments included in its in-service on hand hygiene a review of AORN's Guidelines of Perioperative Practice as they relate to nail grooming and restrictions to various nail enhancement products.

2. In addition to the in-service of applicable members of the Facility staff; review of these guidelines during orientation of new employees will provide systemic assurance of continued vigilance.

3. The observational monitoring of the ASC's relevant staff by the ICO, or a designee, will provide a mechanism to confirm the POC has been successfully implemented and will be complied with in the future. The monitoring will be daily and ongoing, with complete compliance as a goal.

4. This POC was fully implemented as of Nov 15, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

A4190 Reference 1

1. ASC policies regarding the reprocessing of its reusable instruments follow ANSI/AAMI guidelines; this includes, the placement of a chemical indicator strip in each pack that is to undergo sterilization. The corrective action was to provide an in-service to members of the Sterilization and Processing staff; not only, in regards to the deviation from policy regarding the placement of a CI in each pack, but also, as to its purpose and its import to the infection control mechanisms in place at the ASC.

2. Systemic compliance should be ensured by the universal adherence to this standard. All sterile packages should have CI.

3. The in-service will occur on Feb 28, 2017. The frequency of randomly inspected sterile packs will also be increased starting on Feb 28, 2017 to once a week to ensure sustained adherence to referenced standards and to the effectiveness of the corrective action. Following an eight-week period, the Certified Sterile Processing and Distribution Technician will report to the QAC the results of the intensified compliance monitoring. The goal will be complete conformity to the standard that there should be a CI in every sterile pack.

4. The plan of correction will formally begin with the in-service on Feb 28, 2017. The results of the increased surveillance will be reported to the QAC in eight weeks' time.

Not Ok. Acm. 3/7/17

A4190 Reference 2

1. The ASC policy regarding temperature controlled Decontamination area is drafted to reflect the guideline set forth in the AAMI Sterilization in Health care Facilities, 2014 Edition. An in-service will be completed by the Sterilization Consultant with the all Sterile Processing Technician (SPT) and the Certified Sterile Processing and Distribution Lead Technician (CSPDT) to review new temperature recording procedures and safeguards.

2. The Sterilization Consultant shall perform an in-service that will include specific instructions that during the time the sterilization equipment is running in the Decontamination area, the cooling units shall be adjusted accordingly to accommodate for the slight potential increase in room temperature.

3. The Sterile Processing Technician (SPT)) shall be responsible for keeping a daily temperature log for the Decontamination area. In the event that the temperature is out of acceptable range the SPT shall immediately notify the CSPDT who shall immediately turn on cooling units until the Decontamination area temperature is within acceptable range. Additionally the CSPDT shall make monthly reviews of the daily temperature log to make sure all readings have either been within range or

Not Ok. Acm. 3/7/17

immediately addressed and recorded. If any deviation from this protocol has occurred the CSPDT shall notify the Sterilization Consultant for another in-service.

4. The Medical Director in conjunction with the Sterilization Consultant shall be responsible for ensuring that the plan of correction is properly implemented no later than March 15, 2017.

A4215

1. The ASC recognizes that device manufacturers, in accordance with FDA and AAMI guidelines, have validated steps necessary for the proper processing of their devices and that Instructions For Use are an integral part of the correct preparation of equipment for safe patient use. During the survey an IFU was provided for a Shimadzu ultrasound vaginal probe. The staff member providing this was unaware that this ultrasound machine had long been replaced. All of the Facility's ultrasound machines are GE models and have been since July 2015. Staff members who would have been a position to know this did not recognize what had occurred. The Facility uses and follows the correct IFU's for the processing of its equipment.

2. Following the recognition of this finding, the corrective action will be to review the catalogue of medical equipment to remove outdated manuals. The ASC, will going forward, review its catalogue of medical equipment to ensure that it remains current. This corrective action should provide systemic assurance that such an error does not recur.

3. By Mar 3, 2017 the DON and the Assistant Medical Director will assure that only Operator Manuals and IFU's of current equipment is maintained and report this to the QAC. This monitoring will continue on a biannual basis. This should assure that such an error does not arise in the future

4. The POC will be completed by Mar 3, 2017.

Ok.
ACM.
3/7/17

A4797

1. The OR's are to be properly prepared prior to reuse. The reestablishment of a clean sanitary environment includes the cleaning of the floor under the OR table after every case regardless whether is obvious soiling.

2. Review of the Facility Cleaning Manual to assure delineation of this step and a review of this corrective action with the cleaning staff by the Infection Control Officer will assure a systemic correction.

3. The Infection Control Officer, will on a daily and ongoing basis, observe for compliance to this corrective action. The goal is for complete adherence to this standard. Shortcomings will be brought to the attention of the cleaning staff and reported to the QAC.

4. This POC was fully implemented as of Nov 15, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

Ok.
ACM.

H1170

1. There will be documentation of the assessment of patients' pain levels upon admission to Facility during preoperative holding and a final documentation of assessment just prior to discharge from the Facility.

2. The medical chart will amended to provide space for this assessment. An in-service on this corrective action will be held for the nursing staff. This POC provides for systemic correction to this observed deficiency.

3. This POC will monitored for effectiveness by auditing patient charts to assure ongoing compliance to the corrective action. This will be performed by the DON, or a DON designee, on a monthly basis and will become part of the Facility's ongoing chart review process. The goal is complete compliance with the POC and findings of the monitoring process will be reported to the QAC.

4. The POC will be implemented by Mar 15, 2017.

Americans United for Life

Metropolitan Surg. Assoc

State POC Add#1 Revd 4/12/17

A1885

1. The medical chart will include a complete medical history and physical examination, performed, signed and dated by the patient's attending physician prior to any procedure performed at the ASC.

2. Revision of the medical chart provides a systemic change that will ensure that that this deficient practice does not recur.

3. The ASC will monitor this POC by auditing ten (10) patient charts per month to assure ongoing compliance. This will be performed by the DON or a DON designee on a monthly basis and will become part of the Facility's ongoing chart review process. The goal is complete compliance with the POC and findings of the monitoring process will be reported to the QAC.

DC 4/13/17

4. A mandatory in-service occurred on Jan 10, 2107 informing the physician staff of the need for this corrective action. This corrective action was completed on Jan 11, 2017, following the identification of the deficiency by the Site Survey Team on Nov 2, 2016.

A2166 Reference 1 and 2/ 1,2,3

1. The medical chart will now provide written documentation of patients' pain assessment by the nursing staff.

2. The PACU portion of the medical chart was amended to provide a systemic record of this assessment and an in-service was held with the nursing staff to inform them of this change.

error

3. Compliance of this corrective action will be monitored via the chart review process. For the first month following the implementation of the plan of correction, 10 random charts were selected per week for compliance review by a DON designee. Weekly random chart audits were conducted until 4 successive weeks of 100% compliance were noted. Following this, ongoing compliance became part of the monthly chart auditing process. Identified deficiencies will be addressed by the DON to the nursing staff and reported to the Quality Assurance Committee. The QAC will report implementation of this corrective action to the Governing Body.

DC 4/13/17

4. The POC was fully implemented as of Nov 17, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

A2166 Reference 2/ 3

1. Nursing staff has been reminded, during an in-service on February 22, 2017, that merely not dispensing medication that may share hypersensitivity concerns with a patient's known allergy is insufficient and that potential interactions must be positively identified and clarified with the potential prescribing physician.

2. The medical chart has been revised to facilitate systemic correction of this deficiency. It has been amended to contain a template for the listing of allergies directly over the prescribing orders template so that potential drug interactions are easier to note. This revision will help assure the efficient comparison of documented allergies to the prescribing orders for every patient by the responsible RN

and the resolution of any identified concerns with the prescribing physician. This systemic correction will ensure against recurrence of this deficiency.

3. Monitoring of this POC will occur via chart review. For the first month following the implementation of the plan of correction, 10 random charts were selected per week for compliance review by a DON designee. Weekly random chart audits were conducted until 4 successive weeks of 100% compliance. Following this, ongoing compliance became part of the standard chart review process. The DON will, as part of the monthly chart auditing process, check to assess that there no prescribed orders which are thought to have potential adverse reactions with patients' known allergens. This monitoring will be ongoing with the goal of achieving complete compliance to this plan of correction. Identified deficiencies will be addressed by the DON to the medical and nursing staff, as well as, reported to the Quality Assurance Committee. The QAC will report implementation and compliance with corrective action to the Governing Body.

4. This POC was implemented as of February 1, 2017, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

A2166 Reference 2/ 4, 5

1. Upon transfer from the OR to the PACU, the attending physician must perform a medication reconciliation to avoid errors of duplication or omission. All medicine and intravenous fluid orders must be reviewed and rewritten upon transfer of the patient between the two care areas.

2. The medical chart has been modified to assure systemic compliance with this corrective action. The order templates have been amended to facilitate comparison and prescribing of medications and intravenous fluids between the OR and PACU. The identified deficiency and the POC were reviewed in separate attendance mandated meetings of the nursing and physician staff. The in-service meetings were held on January 11 and January 17, 2017.

3. Monitoring to assure against recurrences of this deficiency will occur by incorporating assessment of adherence to this POC into the monthly chart auditing process that is conducted by the DON, or a DON designee. For the first month following the implementation of the plan of correction, 10 random charts were selected per week for compliance review by a DON designee. Weekly random chart audits were conducted until 4 successive weeks of 100% compliance. Following this, ongoing compliance became part of the standard chart review process. The DON is tasked with reporting compliance and / or identified deficiencies to this corrective action to the QAC. The QAC will report implementation and compliance with corrective action to the Governing Body. The Governing Body will be responsible for ensuring full compliance with all rules and regulations.

4 This POC was implemented as of Jan 17, 2017, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

A2166 Reference 2/ 6

1. Physicians transferring a patient from the Facility to the hospital will enter such an order into the patient's medical record.

2. Identification of this deficiency and the corrective action was reviewed at an attendance mandated quality assurance meeting of the medical staff, held on January 17, 2017. Awareness by the physician staff to document a transfer order, along with, an awareness by the nursing staff of such a requirement, will assure ongoing and systemic compliance.

3. The DON will review the charts of all patients entered into the Transfer Log to assess for ongoing compliance to the POC. The monitoring of this corrective action will be ongoing with the goal of complete compliance. Deficiencies will be brought to the QAC for follow up.

4. This POC was implemented as of Nov 17, 2017, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

OK 4/13/17

A2285

1. The ASC strives to maintain compliance with all applicable regulatory requirements, including those relating to the purchase, storage, administration and disposition of pharmaceuticals.

Medications from cartridge-like syringes will not be withdrawn into a second syringe for administration.

2. The Facility has purchased an adequate supply of Carpujet Injectors and a memo has been issued by the DON in conjunction with the ASC's Pharmacy Consultant informing the medical staff of this deficiency and its correction. The memo also delineated the location of the injectors. These systemic changes will assure that the observed deficiency does not recur.

3. The DON will monitor for compliance of this corrective action via assessment polling during staff meetings, as well as, via observation of daily routines. Any deviations will be corrected if and when they are identified. The goal is complete adherence to the corrective action and observations of continued deficiencies in this matter will be reported to the Pharmacy Consultant and QAC for further attention.

4. This POC was fully implemented as of Nov 12, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

OK CCC 4/25/17

A4098

1. Personnel will wear appropriate personal protective equipment. The ASC provides easily accessible and appropriate personal protective equipment, such as, gloves, gowns, masks and eye protection to its staff.

2. Systemic compliance will be achieved by an in-service reviewing universal precaution standards and OSHA's blood borne pathogens guidelines as delineated under CFR 1910.1030. The important role of consistent and appropriate PPE use to staff safety and infection / exposure control will be reviewed.

3. The Infection Control Officer will initially monitor all personnel on a daily basis for a two-week period; if complete compliance is noted, it will then become part of the monthly Infection Control Rounds. The ICO, or an appointed designee, shall also be responsible for providing immediate

remediation if non-compliance is later observed by conducting a mandatory in-service with non-complying personnel and shall report non-compliance to the QAC.

4. The in-service was completed on March 7, 2017.

A4112, A4154

1. The ASC's Safe Medication Administration Guidelines policy incorporates the CDC's recommendations as delineated in Safe Practices for Medical Injections, as well as, Guidelines for the Prevention of Intravascular Catheter Related Infections. An in-service of the Physician and Nursing staff was held on Feb 23, 2017 to review this policy, the recommendations on which it is based and its importance to infection control.

The need to wipe IV injector ports and vials with 70% alcohol and that single dose vials entered more than once for the same patient must be done with new needle and syringe will be discussed in particular and note made of the Survey Team's identification of deficiencies in this regard.

OK
RW
4/13/17

2. An emphasis on the use of alcohol swaps to wipe vials prior to accessing and the need for a new needle and syringe when re-accessing vials will be incorporated into the ASC's continuing education program and addressed, at least annually, during reviews of the Facility's Safe Medication Administration Guidelines.

3. The ICO will inform the QAC that the in-service has occurred and will monitor for adherence to the Facility's standards and provide immediate remediation to any observed deficiency. The goal for this corrective action is complete adherence to the Facility's guidelines in this matter. The Infection Control Officer will initially monitor the Physician and Nursing staff on a daily basis for a two-week period; if complete compliance is noted, it will then become part of the monthly Infection Control Rounds. The ICO and the AMD will be responsible for implementation of this corrective action and report its implementation and compliance to the QAC.

4. The POC was implemented on Feb 24, 2017.

A4183 Reference 1, 2

1. During the course of its inspections, the Site Survey Team identified several instances of incomplete adherence to both the ASC's and CDC-HICPAC policies and standards in regards to infection control and hand hygiene by at least two of its staff members. The ASC held a mandatory in-service on February 21, 2017 for the medical, SPD and cleaning staffs and chaired by the Infection Control Officer. The meetings' purpose will be to review the cited findings, review the ASC's policies regarding hand hygiene and infection control, as well as, role-play scenarios so that staff can better understand the real life applications of these standards.

2. Continued periodic meetings of the above staff addressing these infection control concerns will serve to address these concerns in a systemic fashion.

3. Monitoring by the Infection Control Officer or designee will include random observations of one employee from each department (medical, SPD and cleaning staffs) per week for a period of one month until 100% compliant with the relevant ASC policies. Corrective guidance will be provided during the course of this monitoring as needed and if systemic deficiencies are encountered, the Infection Control Officer will report to the QAC so that further remediate steps are taken.

4. The POC was completed on February 21, 2017.

4/13/17

A4190 Reference 1

1. ASC policies regarding the reprocessing of its reusable instruments follow ANSI/AAMI guidelines; this includes, the placement of a chemical indicator strip in each pack that is to undergo sterilization. The corrective action was to provide an in-service to members of the Sterilization and Processing staff; not only, in regards to the deviation from policy regarding the placement of a CI in each pack, but also, as to its purpose and its import to the infection control mechanisms in place at the ASC.

2. Systemic compliance should be ensured by the universal adherence to this standard. All sterile packages should have CI.

3. The in-service was held on Feb 28, 2017. The frequency of randomly inspected sterile packs was also increased on Feb 28, 2017 to once a week to ensure sustained adherence to referenced standards and to the effectiveness of the corrective action. Following an eight-week period, during which two of each type of sterile packs will be inspected weekly, the Certified Sterile Processing and Distribution Technician will report to the QAC the results of the intensified compliance monitoring. The goal will be complete conformity to the standard that there should be a CI in every sterile pack. If compliance to this standard is met inspections will return to the Facility's standard frequency.

4. The plan of correction began with the in-service on Feb 28, 2017. The results of the increased surveillance will be reported to the QAC in eight weeks' time.

1. The ASC policy regarding temperature controlled Decontamination area is drafted to reflect the guideline set forth in the AAMI Sterilization in Health care Facilities, 2014 Edition. An in-service was completed on January 16, 2017 by the Sterilization Consultant with the all Sterile Processing Technician (SPT) and the Certified Sterile Processing and Distribution Lead Technician (CSPDT) to review new temperature recording procedures and safeguards.

2. The Sterilization Consultant shall perform an in-service that will include specific instructions that during the time the sterilization equipment is running in the Decontamination area, the cooling units shall be adjusted accordingly to accommodate for the slight potential increase in room temperature.

3. The Sterile Processing Technician (SPT)) shall be responsible for keeping a daily temperature log for the Decontamination area. In the event that the temperature is out of acceptable range the SPT shall immediately notify the CSPDT who shall immediately turn on cooling units until the Decontamination area temperature is within acceptable range. Additionally the CSPDT shall make monthly reviews of the daily temperature log to make sure all readings have either been within range or immediately addressed and recorded. If any deviation from this protocol has occurred the CSPDT shall notify the Sterilization Consultant for another in-service. In the event that the SPT has to notify the CSPDT of three (3) or more temperature variations within one (1) calendar month, the CSPDT shall immediately bring it to the attention of the Governing Body and the Governing Body will immediately act accordingly to bring in an independent specialist to fix whatever is causing the variations so as to resolve the issue.

4. The Medical Director in conjunction with the Sterilization Consultant shall be responsible for ensuring that the plan of correction is properly implemented.

Ok. fcm. 4/17/17

A4215

1. The ASC recognizes that device manufacturers, in accordance with FDA and AAMI guidelines, have validated steps necessary for the proper processing of their devices and that Instructions For Use are an integral part of the correct preparation of equipment for safe patient use. During the survey an IFU was provided for a Shimadzu ultrasound vaginal probe. The staff member providing this was unaware that this ultrasound machine had long been replaced. All of the Facility's ultrasound machines are GE models and have been since July 2015. Staff members who would have been in a position to know this did not recognize what had occurred. The Facility uses and follows the correct IFU's for the processing of its equipment.

2. Following the recognition of this finding, the corrective action will be to review the catalogue of medical equipment to remove outdated manuals. The ASC, will going forward, review its catalogue of medical equipment to ensure that it remains current. This corrective action should provide systemic assurance that such an error does not recur.

3. By Mar 3, 2017 the DON and the Assistant Medical Director will assure that only Operator Manuals and IFU's of current equipment is maintained and report this to the QAC. This monitoring will continue on a biannual basis. This should assure that such an error does not arise in the future

4. The POC will be completed by Mar 3, 2017.

A4797

1. The OR's are to be properly prepared prior to reuse. The reestablishment of a clean sanitary environment includes the cleaning of the floor under the OR table after every case regardless whether is obvious soiling.

2. An in-service to review the Facility Cleaning Manual to assure delineation of this step and a review of this corrective action with the cleaning staff by the Infection Control Officer was held on November 15, 2016 to assure systemic correction.

3. The Infection Control Officer observed the staff and the ORs for compliance on a daily basis for a two-week period to assure complete compliance; continued compliance, is assured via the monthly Infection Control rounds. Shortcomings will be brought to the attention of the cleaning staff for correction and reported to the QAC.

4. This POC was implemented as of Nov 15, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

A4190 Reference 1

1. ASC policies regarding the reprocessing of its reusable instruments follow ANSI/AAMI guidelines; this includes, the placement of a chemical indicator strip in each pack that is to undergo sterilization. The corrective action was to provide an in-service to members of the Sterilization and Processing staff; not only, in regards to the deviation from policy regarding the placement of a CI in each pack, but also, as to its purpose and its import to the infection control mechanisms in place at the ASC.

2. Systemic compliance should be ensured by the universal adherence to this standard. All sterile packages should have CI.

3. The in-service was held on Feb 28, 2017. The frequency of randomly inspected sterile packs was also increased on Feb 28, 2017 to once a week to ensure sustained adherence to referenced standards and to the effectiveness of the corrective action. Following an eight-week period, during which two of each type of sterile packs will be inspected weekly, the Certified Sterile Processing and Distribution Technician will report to the QAC the results of the intensified compliance monitoring. The goal will be complete conformity to the standard that there should be a CI in every sterile pack. If compliance to this standard is met inspections will return to the Facility's standard frequency.

4. The plan of correction began with the in-service on Feb 28, 2017. The results of the increased surveillance will be reported to the QAC in eight weeks' time.

A4190 Reference 2

1. The ASC policy regarding temperature controlled Decontamination area is drafted to reflect the guideline set forth in the AAMI Sterilization in Health care Facilities, 2014 Edition. An in-service was completed on January 16, 2017 by the Sterilization Consultant with the all Sterile Processing Technician (SPT) and the Certified Sterile Processing and Distribution Lead Technician (CSPDT) to review new temperature recording procedures and safeguards.

2. The Sterilization Consultant shall perform an in-service that will include specific instructions that during the time the sterilization equipment is running in the Decontamination area, the cooling units shall be adjusted accordingly to accommodate for the slight potential increase in room temperature.

3. The Sterile Processing Technician (SPT)) shall be responsible for keeping a daily temperature log for the Decontamination area. In the event that the temperature is out of acceptable range the SPT shall immediately notify the CSPDT who shall immediately turn on cooling units until the Decontamination area temperature is within acceptable range. Additionally the CSPDT shall make monthly reviews of the daily temperature log to make sure all readings have either been within range or immediately addressed and recorded. If any deviation from this protocol has occurred the CSPDT shall

notify the Sterilization Consultant for another in-service. In the event that the SPT has to notify the CSPDT of three (3) or more temperature variations within one (1) calendar month, the CSPDT shall immediately bring it to the attention of the Governing Body and the Governing Body will immediately act accordingly to bring in an independent specialist to fix whatever is causing the variations so as to resolve the issue.

4. The Medical Director in conjunction with the Sterilization Consultant shall be responsible for ensuring that the plan of correction is properly implemented.

A4215

1. The ASC recognizes that device manufacturers, in accordance with FDA and AAMI guidelines, have validated steps necessary for the proper processing of their devices and that Instructions For Use are an integral part of the correct preparation of equipment for safe patient use. During the survey an IFU was provided for a Shimadzu ultrasound vaginal probe. The staff member providing this was unaware that this ultrasound machine had long been replaced. All of the Facility's ultrasound machines are GE models and have been since July 2015. Staff members who would have been in a position to know this did not recognize what had occurred. The Facility uses and follows the correct IFU's for the processing of its equipment.

2. Following the recognition of this finding, the corrective action will be to review the catalogue of medical equipment to remove outdated manuals. The ASC, will going forward, review its catalogue of medical equipment to ensure that it remains current. This corrective action should provide systemic assurance that such an error does not recur.

3. By Mar 3, 2017 the DON and the Assistant Medical Director will assure that only Operator Manuals and IFU's of current equipment is maintained and report this to the QAC. This monitoring will continue on a biannual basis. This should assure that such an error does not arise in the future

4. The POC will be completed by Mar 3, 2017.

A4797

1. The OR's are to be properly prepared prior to reuse. The reestablishment of a clean sanitary environment includes the cleaning of the floor under the OR table after every case regardless whether is obvious soiling.

2. An in-service to review the Facility Cleaning Manual to assure delineation of this step and a review of this corrective action with the cleaning staff by the Infection Control Officer was held on November 15, 2016 to assure systemic correction.

3. The Infection Control Officer observed the staff and the ORs for compliance on a daily basis for a two-week period to assure complete compliance; continued compliance, is assured via the monthly Infection Control rounds. Shortcomings will be brought to the attention of the cleaning staff for correction and reported to the QAC.

4. This POC was implemented as of Nov 15, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

H1170

1. There will be documentation of the assessment of patients' pain levels upon admission to Facility during preoperative holding and a final documentation of assessment just prior to discharge from the Facility.

2. The medical chart will be amended to provide space for this assessment. An in-service on this corrective action will be held for the nursing staff. This POC provides for systemic correction to this observed deficiency.

as per SM OK 2/16/18
11/15/16 on service was held.

nor OK 5/1/17

3. This POC will monitor for effectiveness by auditing patient charts to assure ongoing compliance to the corrective action. This will be performed by the DON, or a DON designee, on a monthly basis and will become part of the Facility's ongoing chart review process. The goal is complete compliance with the POC and findings of the monitoring process will be reported to the QAC.

4. The POC will be implemented by Mar 15, 2017.

Quincy, MA 02269. If any changes in this edition of the Code are incorporated by reference, CMS will publish notice in the Federal Register to announce the changes.

(2) In consideration of a recommendation by the State survey agency, CMS may waive, for periods deemed appropriate, specific provisions of the Life Safety Code which, if rigidly applied, would result in unreasonable hardship upon an ASC, but only if the waiver will not adversely affect the health and safety of the patients.

(3) The provisions of the Life Safety Code do not apply in a State if CMS finds that a fire and safety code imposed by State law adequately protects patients in an ASC.

(4) An ASC must be in compliance with Chapter 21.2.9.1, Emergency Lighting, beginning on March 13, 2006.

(5) Notwithstanding any provisions of the 2000 edition of the Life Safety Code to the contrary, an ASC may place alcohol-based hand rub dispensers in its facility if:

(i) Use of alcohol-based hand rub dispensers does not conflict with any State or local codes that prohibit or otherwise restrict the placement of alcohol-based hand rub dispensers in health care facilities;

(ii) The dispensers are installed in a manner that minimizes leaks and spills that could lead to falls;

(iii) The dispensers are installed in a manner that adequately protects against inappropriate access; and

(iv) The dispensers are installed in accordance

Q 240	INFECTION CONTROL CFR(s): 416.51 The ASC must maintain an infection control program that seeks to minimize infections and communicable diseases. This CONDITION is not met as evidenced by: Based on observation, document review and staff interview conducted on 11/1/16 and 11/2/16, it was determined that the facility failed to have an adequate Infection Control program that seeks to minimize infections and communicable diseases. Findings include: 1. The facility failed to provide a functional and sanitary environment for provision of surgical services by adhering to professionally acceptable standards of practice. (Cross refer to Tag Q 0241). 2. The facility failed to implement and monitor compliance with the infection control policies, procedures and protocols of the facility's Infection Control Plan and the nationally recognized guidelines that it has selected for its Infection Control program. (Cross refer to Tag Q 0242).	Q 240		
Q 241	SANITARY ENVIRONMENT CFR(s): 416.51(a) The ASC must provide a functional and sanitary environment for the provision of surgical services by adhering to professionally acceptable standards of practice. This STANDARD is not met as evidenced by: A. Based on observation, review of facility	Q 241

documentation, and staff interview, it was determined that the facility failed to ensure a functional and sanitary environment for the provision of surgical services.

Findings include:

1. On 11/2/16 at 10:50 AM, in the presence of Staff #1, a Platinum 5 HF model IRC5LX02 Oxygen Concentrator was being used in Operating Room #2 while procedures were being performed.

a. A review of the Manufacture's Operator Manual states, "Your oxygen concentrator is intended for individual use in the home." ... Select a location: You may select a room in your house ... The air intake of the unit should be located in a well ventilated area to avoid airborne pollutants and/or fumes. ..."

b. During interview, Staff #1 confirmed the oxygen concentrator was functioning during procedures on 11/2/16.

c. The Oxygen Concentrator was not utilized in accordance with Manufactures' Operator Manual.

This finding resulted in an Immediate Jeopardy which immediately curtailed this practice. The Immediate Jeopardy was removed on 11/2/16, day of survey, upon receipt of an acceptable plan of correction.

B. Based on observation, staff interview and facility policy review conducted on 11/1/16, it was determined that the facility failed to ensure a safe and sanitary environment for the provision of

Q 242	Continued From page 20 B. Based on observation and staff interview conducted on 11/1/16, it was determined that the facility failed to ensure its Instrument Reprocessing adheres to AAMI ST 79 guidelines. AAMI is one of the nationally recognized guidelines the facility has selected for its Infection Control program. Findings include: Reference #1: AAMI Sterilization in Health Care Facilities, 2014 edition, ST 79 section 10.5.2.2.2 Internal chemical indicators states, "An internal CI should be used within each package, tray, or rigid sterilization container system to be sterilized." 1. During a tour of the SPD area located in the basement, in the presence of Staff #3 and Staff #11, a sterile instrument tray labeled "D&C set" was opened and inspected. The tray lacked an internal CI (chemical indicator/integrator) within the package. 2. The facility failed to ensure compliance with AAMI ST79 guidelines. 3. This finding was confirmed by Staff #3. Reference #2: AAMI Sterilization in Health Care Facilities, 2014 edition, ST 79, section 3.3.6.5 Temperature states, "... The decontamination area should have a temperature controlled between 16 degrees C [Celsius] and 18 degrees C (60 degrees F [Fahrenheit] and 65 degrees F). ... bacteria thrive at high temperatures; cool temperatures in the decontamination area might help minimize bioburden."	Q 242

Q 242	Continued From page 21 1. During a review of SPD Temperature and Relative Humidity logs, the "Decontamination Area Documentation of Temperature and Humidity" logs evidenced daily temperatures above 65 degrees F from 9/1/16 through 10/29/16. a. The log indicated that the facility's acceptable temperature range in the Decontamination Area is between "60 degrees F and 65 degrees F." 2. The facility failed to ensure temperature control in the Decontamination Area was in accordance with AAMI guidelines and its own policy. 3. These findings were confirmed by Staff #2. C. Based on observation and staff interview conducted on 11/1/16, it was determined that the facility failed to ensure perioperative practices that adhere to AORN guidelines. Findings include: Reference #1: AORN [Association of periOperative Registered Nurses] Clinical FAQs <https://www.aorn.org/clinicalfaqs/attire/> updated November 13, 2014 states, "Perioperative team members should wear scrub attire that covers the arms when opening sterile supplies. Wearing long-sleeved attire helps contain skin squames shed from bare arms. Opening sterile supplies onto the sterile field without wearing a long-sleeved jacket may allow skin squames from the perioperative team member's bare arms to drop onto the sterile field and may increase the patient's risk for an SSI." IMMEDIATE REMOVAL PORTABLE O2 CONCENTRATORS

During the federal inspection, an immediate jeopardy violation was identified. The portable O2 concentrators were not being used in accordance with the manufacturer's guidelines. Effective immediately, the portable O2 concentrators that were located in OR2 and OR4 were permanently removed from the facility. All staff will be in-serviced and all necessary policies shall be revised. All ORs are now equipped with oxygen tanks.

Initially, rounds will be conducted by the IC Designee on a weekly basis for one (1) month to ensure that O2 concentrators will not be used. Thereafter, during monthly environmental rounds for the next three (3) months, IC Designee will ensure that O2 concentrators will not be used.

excused from correcting providing it is determined that
mes, the findings stated above are disclosable 90 days
bove findings and plans of correction are disclosable 14
days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

Q 104(1)/K161 NFPA 101 Building Construction Type and Height

1. The ASC shall ensure that it's building construction type and height is compliant with the National Fire Protection Association's 2012 Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to conduct a thorough analysis of the facility's exterior walls, and it's interior walls and floors. On February 20th, 2017 an initial inspection of the ASC revealed masonry exterior walls, and concrete interior walls and floors.

3. Axis Architectural Studio is currently in the process of determining the specific need of the building in order to comply with the National Fire Protection Association's 2012 Life Safety Code. Once all evaluation is complete the and corresponding architectural plans are completed and approved, the ASC will retain the services of the appropriate contracting company to make all necessary changes to ensure the ASC is in compliance with code.

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

5. Axis Architectural Studio has already begun preparing a plan for the ASC to be in compliance with the National Fire Protection Association's 2012 Life Safety Code. All work shall be completed by September 1, 2017

Q104 (2)/ K211 Means of Egress – General

1. The ASC shall ensure that all inside stairs serving as an exit or an exit component shall be enclosed in accordance with the National Fire Protection Association's Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to compose plans for enclosing the staircase leading up from the basement to the Pre/Post Operative Care Unit so that it is a protected path to an Exit Discharge.

3. Once architectural plans are complete the ASC will retain the services of the appropriate contracting company to complete the construction of the proposed enclosed staircase leading up from the basement into the Pre/Post Operative Care Unit. Once construction is complete, compliance shall be automatically and permanently maintained.

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

5. Axis Architectural Studio has already begun drafting blueprints for the proposed project. All work shall be completed by September 1, 2017

Not Acceptable 3/6/17

Americans United for Life

Q104 (3) K223 NFPA 101 Doors with Self-Closing Devices

1. The ASC shall ensure that all self-closing doors are equipped with a release device that complies with the National Fire Protection Associate Life Safety Code.

2. The manual folding door stop that was attached to the basement door in the Pre/Post Operative Care unit has been removed.

3. A complete and thorough sweep will be conducted of the ASC to ensure that all manually folding doors equipped with a manual doorstop are inspected and that the manual doorstops are either removed or replaced with an approved hold-open device compliant with the National Fire Protection Associate Life Safety Code.

4. The ASC Fire Safety Coordinator shall conduct a final inspection of all self-closing doors and assure that all hold-open devices are in compliance with the National Fire Protection Association's Life Safety Code.

5. The manual doorstop on the cited door has been replaced as of February 28, 2017 and a full inspection by the ASC Fire Safety Coordinator shall be conducted no later that June 1, 2017.

Q104 (4) K311 Vertical Openings - Enclosures

1. The ASC shall ensure that all vertical openings shall be enclosed or protected in accordance with the National Fire Protection Association's Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to compose plans for enclosing the required exit from the second floor that was down a set of stairs, which was open at the second floor to the waiting room.

3. Once architectural plans are complete the ASC will retain the services of the appropriate contracting company to complete the construction of the proposed enclosed staircase leading up from the second floor to the waiting room. Once construction is complete, compliance shall be automatically and permanently maintained.

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

5. Axis Architectural Studio has already begun drafting blueprints for the proposed project. All work shall be completed by September 1, 2017

Americans United for Life

Q40 not addressed
Q 100

Q 141 Reference 1, 2 (1, 2, 3)

1. There is now on going documentation of patients' pain assessment by the nursing staff.

2. The PACU portion of the medical chart was amended to provide a systemic record of this assessment.

3. Compliance of this corrective action will be monitored via the chart review process. Identified deficiencies will be addressed by the Director of Nursing to the nursing staff and reported to the Quality Assurance Committee.

4. The DON and the Assistant Medical Director (AMD) were responsible for implementing this plan of correction.

5. The POC was implemented as of Nov 15, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

Q141 Reference 1, 2 (3)

1. Nursing staff has been reminded that merely not dispensing medication that may share hypersensitivity concerns with a patient's known allergy is insufficient and that potential interactions must be positively identified and clarified with the prescribing physician. The medical chart has also been revised to facilitate systemic correction of this deficiency. It has been amended to contain a template for the listing of allergies directly over the prescribing orders template so that potential drug interactions are easier to note.

2. Systemic correction of this deficiency will be assured by comparison of documented allergies to the prescribing orders for every patient by the responsible RN and resolution of any identified concerns with prescribing physician.

3. Monitoring to assure the effectiveness of this POC will occur via chart review. The DON will, as part of the monthly chart auditing process, check to assess that there no prescribed orders which are thought to have potential adverse reactions with patients' known allergens

4. The DON and the AMD were responsible for this corrective action.

5. This POC was fully implemented as of Jan 17, 2017, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

Q141 Reference 2 (4, 5)

1. Upon transfer from the OR to the PACU the attending physician must perform a medication reconciliation to avoid errors of duplication or omission. All medicine and intravenous fluid orders must be reviewed and rewritten upon transfer of the patient between the two care areas.

2. The medical chart has been modified to assure effective systemic compliance with this corrective action. The order templates have been amended to facilitate comparison and prescribing of

medications and intravenous fluids between the OR and PACU. The identified deficiency and the POC was reviewed in separate attendance mandated meetings of the nursing and physician staff.

3. Monitoring to assure compliance with this corrective action will be via chart review by the DON or a DON designee. The DON is tasked with reporting compliance and / or identified deficiencies to this POC to the QAC.

4. The DON and the AMD were responsible for this POC.

5. This POC was fully implemented as of January 17, 2017, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

Q141 Reference 2 (6)

1. Physicians transferring a patient from the Facility to the hospital will enter such an order in the patient's medical record.

2. Identification of this deficiency and the corrective action was reviewed at an attendance mandated quality assurance meeting of the medical staff. Awareness by the physician staff to document a transfer order, along with, awareness by the nursing staff of such a requirement, will assure ongoing and systemic compliance.

3. The DON will review the charts of patients entered into the Transfer Log to assess for ongoing compliance. Deficiencies will be brought to the QAC for follow up.

4. The DON and the AMD were responsible for this corrective action.

5. This POC was fully implemented as of February 1, 2017, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

OK
3/27/17

Q181

1. Medications from cartridge-like syringes will not be withdrawn into a second syringe for administration.

2. The Facility has purchased an adequate supply of Carpujet Injectors and a memo has been issued by the DON and the ASC's Pharmacy Consultant informing the medical staff of this deficiency and its correction. The memo also delineated the location of the injectors.

3. The DON will monitor for compliance of this corrective action via assessment polling during staff meetings, as well as, via observation of daily routines. Any deviations will be corrected if and when they are identified. Repeated observations of continued deficiencies in this matter will be reported to the Pharmacy Consultant and QAC for further attention.

4. The DON and Pharmacy Consultant were responsible for this POC.

5. This POC was fully implemented as of Nov 12, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

OK
CC/C
3/27/17

Q223

1. The ASC will now provide written disclosure of physician ownership prior to care at the facility. This disclosure information is provided to patients via the Internet directly on ASC's website. This information is both viewable and printable online. Patients contacting the ASC via telephone are instructed to visit the website to view patient disclosure information. Finally in the event a patient does not have access to a computer, patients are instructed that upon request and prior to receiving any treatment, the ASC receptionist shall provide a written copy of this information.

2. The universal availability and active provisioning of this information prior to any rendering of services by the Facility and its staff will assure continuous systemic correction of this deficiency.

3. Written documentation of the provision of this information prior to the initiation of care will be documented in the counseling portion of the patients' medical record. Monitoring of this corrective action will thus become part of the chart audit process conducted by the DON or designee.

4. The Facility Administrator is responsible for this POC and its implementation.

5. The POC will be fully implemented by April 1, 2017 and reported as such to the QAC.

Q224

1. Following the identified deficiency, the Facility has updated its methods of assuring patients and their designated representatives are adequately provided with written information regarding their ability to make informed decisions in respect to their care, as well as, their ability to institute Advance Directives prior to the initiation of care at this ASC. The Facility will update its online information to include facts, questions and answers regarding advance directives, as well as, provide directing links to information, documents and resources provided by this State's Dept. of Health.

All patients scheduling appointments are to be queried regarding their desire to be furnished with written information relating to patient rights and advance directives. Such requested information will be provided prior to the initiation of care at the Facility and provided by the method most convenient to the patient; either, on line, via e-mail, fax or directly at the ASC.

Finally, the patient's medical record will be revised to better document provision of information with regards to patients' rights and advance directives. The patient record will have written confirmation that the information was offered. Furthermore, the history portion of the medical chart will be amended to provide documentation of whether an advance directive exists.

2. The above corrective action provides systemic correction of the identified deficiency and will be applicable to all patients of this ASC.

3. Once the POC is implemented the Facility Administrator will assess the completeness and functioning of the on line corrective actions and the DON will add assessment of the completion of the advance directive section of the medical record to the chart review process. Both will report their findings to the QAC.

Americans United for Life

4. The Facility Administrator and the ASC's Information Technology Consultant will be responsible for implementing these planned corrections.

5. The POC is scheduled to fully in place by Mar 31, 2017.

Q240/Q241

The Facility aims to diligently adhere to professionally acceptable standards and provide the most sanitary environment possible to its staff and in its provision of patient care and surgical services. The following POC objective is help assure its policies and procedures are in accordance with nationally recognized guidelines and that its quality assurance mechanisms adequately monitor compliance, as well as, identify and correct deficiencies on timely and ongoing basis. The observed deficiencies are addressed below.

OK. ACM. 3/7/17

Q241 A

1. The use of an oxygen concentrator in a manner not consistent with the Manufacturer's Operator Manual was immediately ceased and by immediately removing the equipment the corrective action assured that this deficiency would not recur. Equipment at the ASC will be used in a manner consistent with the Manufacturer's Operator Manual.

2. A meeting of the QAC was held on Nov 4, 2017, Members of the Committee were informed of the Site Survey Team's finding by the AMD. Following this, and at the request of the QAC, the MD and the DON reviewed a catalogue of the ASC's available medical equipment to ensure that no other was being utilized outside its manufacturer's described parameters.

Acceptable 3/6/17

3. To assure systemic compliance going forward, the QAC has charged the MD with assuring equipment purchased in the future will be utilized in a manner consistent with the Manufacturer's Operating Manual.

4. The AMD and the Infection Control Officer were responsible for this corrective action.

5. This POC was fully implemented as of Nov 8, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

Q241 B

1. During the course of its inspection, the Site Survey Team identified several instances of incomplete adherence to both the ASC's and CDC-HICPAC policies and standards with regards to infection control and hand hygiene by at least two of its staff members. The ASC will hold in-services mandatory to the medical, SPD and cleaning staffs and chaired by the Infection Control Officer. The meetings' purpose will be to review the cited findings, review the ASC's policies regarding hand hygiene and infection control, as well as, role-play scenarios so that staff can better understand the real life applications of these standards.

OK. ACM. 3/7/17

2. Continued periodic meetings of the above staff addressing these infection control concerns will serve to address these concerns in a systemic fashion.

3. The Infection Control Officer or a designee will one month later and monthly, thereafter, conduct random observations of the members of these departments to assess the effectiveness of the POC, assure compliance with the relevant ASC policies and provide corrective guidance. If during the course of this monitoring, systemic deficiencies are encountered, the Infection Control Officer will report to the QAC so that further remediate steps are taken.

4. The Infection Control Officer and the AMD were responsible for the implementation of this POC.

5. The POC is shall be implemented by March 7, 2017.

Ok. Acm 3/7/17

Not accepted 3/6/17 fw

Q241 C

1. The OR's are to be adequately prepared prior to reuse. The reestablishment of a clean environment includes the cleaning of the floor under the OR table after every case regardless whether is obvious soiling.

2. Review of the Facility Cleaning Manual to assure delineation of this step and a review of this corrective action with the cleaning staff by the Infection Control Officer will assure a systemic correction.

3. The Infection Control Officer will observe for compliance on an ongoing basis. Shortcomings will be brought to the attention of the cleaning staff and reported to the QAC.

4. The ICO and the AMD were responsible for this POC.

5. This POC was fully implemented as of Nov 15, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

NOT Ok. Acm. 3/7/17

Q241 D Reference #1

1. The ASC, to improve its adherence to professionally acceptable standards regarding the achievement of an optimal sanitary environment will provide an in-service on hand hygiene and review AORN's Guidelines of Perioperative Practice as they relate to nail grooming and restrictions to various nail enhancement products.

2. In addition to the in-service of applicable members of the Facility staff, review of these guidelines during orientation of new employees will provide systemic assurance of continued vigilance.

3. The observational monitoring of the ASC's relevant staff will provide a mechanism to confirm the POC has been successfully implemented and will be complied with in the future.

4. The implementation of this POC was tasked to the Infection Control Officer.

5. This POC was fully implemented as of Nov 15, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

Q241 D Reference #2, 3

1. The ASC's Safe Medication Administration Guidelines policy incorporates the CDC's recommendations as delineated in Safe Practices for Medical Injections, as well as, Guidelines for the Prevention of Intravascular Catheter Related Infections. An in-service of the medical staff was held on Feb 23, 2017 to review this policy, the recommendations on which it is based and its importance to infection control.

not OK RW 3/6/17

The need to wipe IV injector ports with 70% alcohol and that single dose vials entered more than once for the same patient must be done with new needle and syringe will be discussed in particular. Note will be made of the Survey Team's identification of deficiencies in this regard.

2. Review of the Facility's Safe Medication Administration Guidelines will be incorporated into the ASC's continuing education program and reviewed on at least an annual basis.

3. The ICO, or an appointed designee, will monitor for compliance to these guidelines and provide immediate remediation to observed deficiencies.

4. The ICO and the AMD will be responsible for implementation of this corrective action.

5. The POC was implemented by Feb 24, 2017.

Q242 A

1. The ASC recognizes that device manufacturers, in accordance with FDA and AAMI guidelines, have validated steps necessary for the proper processing of their devices and that Instructions For Use are an integral part of the correct preparation of equipment for safe patient use. During the survey an IFU was provided for a Shimadzu ultrasound vaginal probe. The staff member providing this was unaware that this ultrasound machine had long been replaced. As of July 2015, all of the Facility's ultrasound machines have been GE models. Staff members who would have been in a position to know this did not recognize what had occurred. The Facility uses and follows the correct IFU's for the processing of its equipment.

OK. Acm. 3/7/17

2. Following the recognition of this finding, the POC will be to review the catalogue of medical equipment and to remove outdated manuals.

3. On a biannual basis the AMD will review this catalogue to assure it remains current.

4. The AMD is responsible for the implementation of this POC.

5. The POC will be completed by Mar 3, 2017.

Q242 B Reference 1

1. ASC policies regarding the reprocessing of its reusable Instruments follow ANSI/AAMI guidelines; this includes the placement of a chemical indicator strip in each pack that is to undergo sterilization. The corrective action was to provide an in-service to members of the Sterilization and Processing staff.

OK. Acm. 3/7/17

not only with regards to the deviation from policy regarding the placement of a CI in each pack, but also, as to its purpose and its importance to the infection control mechanisms in place at the ASC.

2. Systemic compliance should be ensured by the universal adherence to this standard. All sterile packages should have CI.

3. Monitoring for compliance to this POC will be accomplished by increasing the number of randomly checked sterile packs, as well as, the frequency of this action to once a week for a period of 8 weeks. The Certified Sterile Processing and Distribution Technician will then report to the QAC the effectiveness of this corrective action.

4. The ICO, the AMD and the CSPDT were responsible for this POC.

5. The in-service will occur on Feb 28, 2017. The results of the increased surveillance will be in 8 weeks' time.

NOT Ok
AEM.
3/7/17

Q 242 B Reference 2

1. The ASC policy regarding temperature controlled Decontamination area is drafted to reflect the guideline set forth in the AAMI Sterilization in Health care Facilities, 2014 Edition. An in-service will be completed by the Sterilization Consultant with the all Sterile Processing Technician (SPT) and the Certified Sterile Processing and Distribution Lead Technician (CSPDT) to review new temperature recording procedures and safeguards.

2. The Sterilization Consultant shall perform an in-service that will include specific instructions that during the time the sterilization equipment is running in the Decontamination area, the cooling units shall be adjusted accordingly to accommodate for the slight potential increase in room temperature.

NOT OK.
AEM.
3/7/17

3. The SPT shall be responsible for keeping a daily temperature log for the Decontamination area. In the event that the temperature is out of acceptable range the SPT shall immediately notify the CSPDT who shall immediately turn on cooling units until the Decontamination area temperature is within acceptable range. Additionally the CSPDT shall make monthly reviews of the daily temperature log to make sure all readings have either been within range or immediately addressed and recorded. If any deviation from this protocol has occurred the CSPDT shall notify the Sterilization Consultant for another in-service.

4. The Medical Director in conjunction with the Sterilization Consultant shall be responsible for ensuring this Plan of correction is properly implemented by the SPT and CSPDT.

5. This plan of correction shall be completed no later than March 15, 2017.

Americans United for Life

Q242 C

1. The ASC recognizes that the integrity of the sterile field is paramount to infection control and patient safety. Non-scrubbed personal will wear long sleeved attire while in restricted areas of the ASC.

2. To ensure a systemic correction of this deficiency the ASC purchased long sleeved scrubs for personnel working in restricted areas, this is in addition to the long sleeve gowns that are available to the relevant staff. A mandatory in-service for the relevant staff will be held to review the referenced AORN guidelines. The ASC will also revise its own policy to clearly reflect this standard.

3. The ICO, or an appointed designee, will be charged with observing for compliance on daily basis and for providing immediate remediation if non-compliance is observed. Failure to adhere to this policy will be reported to the QAC.

4. The AMD is responsible for the implementation of this POC.

5. Compliance to these standards was initiated following identification of the deficiency by the Survey Team on Nov 2, 2016. The POC will be fully implemented by Mar 6, 2017.

Ok.
ACM.
3/7/17

Q242 D

1. Personnel will wear appropriate personal protective equipment. The ASC provides easily accessible and appropriate personal protective equipment, such as, gloves, gowns, masks and eye protection to its staff.

2. Systemic compliance will be achieved by an in-service reviewing universal precaution standards and OSHA's blood borne pathogens guidelines as delineated under CFR 1910.1030. The important role of consistent and appropriate PPE use to staff safety and infection / exposure control will be reviewed.

3. The ICO will monitor staff for sustained compliance to these guidelines.

4. The AMD and ICO are responsible for instituting this POC.

5. The POC will have been fully implemented by March 7, 2017.

Not OK.
ACM.
3/7/17

Q261

1. The medical chart will include a complete medical history and physical examination, performed, signed and dated by the patient's attending physician prior to any procedure performed at the ASC.

2. The medical chart was revised to reflect this POC and assure a systemic change. A mandatory in-service occurred on Jan 10, 2107 informing the physician staff of the need for this corrective action.

3. Monitoring of this POC will be monthly and on going via the chart audit process performed by the DON. Lack of compliance will be reported to the QAC.

4. The AMD was responsible for this POC.

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

5. This corrective action was completed on Jan 11, 2017, following the identification of the deficiency by the Site Survey Team on Nov 2, 2016.

K161 NFPA 101 Building Construction Type and Height

1. The ASC shall ensure that it's building construction type and height is compliant with the National Fire Protection Association's 2012 Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to conduct a thorough analysis of the building's the facility's exterior walls, and it's interior walls and floors. On February 20th, 2017 an initial inspection of the ASC revealed masonry exterior walls, and concrete interior walls and floors.

3. Axis Architectural Studio is currently in the process of determining the specific need of the building in order to comply with the National Fire Protection Association's 2012 Life Safety Code. Once all evaluation is complete the and corresponding architectural plans are completed and approved, the ASC will retain the services of the appropriate contracting company to makes all necessary changes to ensure the ASC is in compliance with code.

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

5. Axis Architectural Studio has already begun preparing a plan for the ASC to be in compliance with the National Fire Protection Association's 2012 Life Safety Code. All work shall be completed by September 1, 2017

K211 Means of Egress – General

1. The ASC shall ensure that all inside stairs serving as an exit or an exit component shall be enclosed in accordance with the National Fire Protection Association's Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to compose plans for enclosing the staircase leading up from the basement to the Pre/Post Operative Care Unit so that it is a protected path to an Exit Discharge.

3. Once architectural plans are complete the ASC will retain the services of the appropriate contracting company to complete the construction of the proposed enclosed staircase leading up from the basement into the Pre/Post Operative Care Unit. Once construction is complete, compliance shall be automatically and permanently maintained.

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

5. Axis Architectural Studio has already begun drafting blueprints for the proposed project. All work shall be completed by September 1, 2017

Accepted 3/6/17

K223 NFPA 101 Doors with Self-Closing Devices

1. The ASC shall ensure that all self-closing doors are equipped with a release device that complies with the National Fire Protection Associate Life Safety Code.

2. The manual folding door stop that was attached to the basement door in the Pre/Post Operative Care unit has been replaced with a release device that is in compliance with the National Fire Protection Associate Life Safety Code.

3. A complete and thorough sweep will be conducted of the ASC to ensure that all manually folding doors equipped with a manual doorstop are inspected and the manual doorstops are either removed or replaced with an approved hold-open device compliant with the National Fire Protection Associate Life Safety Code.

4. The ASC Fire Safety Coordinator shall conduct a final inspection of all self-closing doors and assure that all hold-open devices are in compliance with the National Fire Protection Association's Life Safety Code.

5. The manual doorstop on the cited door has been replaced as of February 24, 2017 and a full inspection by the ASC Fire Safety Coordinator shall be conducted no later that June 1, 2017.

K311 Vertical Openings - Enclosures

1. The ASC shall ensure that all vertical openings shall be enclosed or protected in accordance with the National Fire Protection Association's Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to compose plans for enclosing the required exit from the second floor that was down a set of stairs, which was open at the second floor to the waiting room.

3. Once architectural plans are complete the ASC will retain the services of the appropriate contracting company to complete the construction of the proposed enclosed staircase leading up from the second floor to the waiting room. Once construction is complete, compliance shall be automatically and permanently maintained.

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

5. Axis Architectural Studio has already begun drafting blueprints for the proposed project. All work shall be completed by September 1, 2017

Federal Metropolitan added #1 Rcd 4/4/17

Q040 416.41 Governing Body and Management

1. The Governing Body held a meeting to review the specific findings for every deficiency as a result of the Federal Re-certification survey of the Facility on November 2, 2016. The Governing Body will effectively carry out the responsibilities of the Facility until all deficiencies are completely corrected and will ensure that the Facility remains complaint with all rules and regulation going forward.

2. As a direct result of the November 2, 2016 Federal Re-certification survey, the Governing Body has proactively decided to set short-term monthly meetings in order to review the findings of the survey and the proposed plan of correction. Monthly meetings will be held until all deficiencies are corrected and the plan of correction has been carried out.

3. The Governing Body has ultimate responsibility for assuring and monitoring that the Plan of Correction is implemented and that all deficiencies are corrected.

4. The Governing Body shall take all necessary actions to assure the Facility continues to provide quality healthcare in a safe environment.

OK 4/13/17

5. The Governing Body met on February 15, 2017 to initially review the specific deficiencies identified as a result of the November 2, 2016 Federal Re-certification survey. The Governing Body will continue to meet on a monthly basis, or as needed if greater frequency is required, until all deficiencies have been corrected and the final approved Plan of Correction is completed. Once completed, the Governing body will resume its normal scheduled meetings.

Q100 416.44 Environment

1. The Governing Body held a meeting to review the specific findings of the Federal Re-certification survey of the Facility on November 2, 2016. The Governing Body contracted with Axis Architectural Studios for assistance in evaluating the requirements for fully complying with the National Fire Protection Association's Life Safety Code, 2012 edition.

2. Axis Architectural Studios completed a full inspection of the ASC's structural facility to assure full compliance with the NFPA. The building will be brought up to all code requirements in order to ensure a safe and sanitary environment to protect the health and safety of patients.

OK 4/13/17

3. The Governing Body has ultimate responsibility for assuring and monitoring that the Plan of Correction is implemented and that all deficiencies are corrected.

4. The Governing Body shall take all necessary actions to assure that the ASC has a safe and sanitary environment, properly constructed, equipped, and maintained to protect the health and safety of patients

5. The Governing Body met on February 15, 2017 to initially review the specific deficiencies identified as a result of the November 2, 2016 Federal Re-certification survey. The Governing Body will continue to monitor the progress of Axis Architectural Studios until all deficiencies are corrected and the final plan of correction is fully completed.

5. Axis Architectural Studio has already begun drafting blueprints for the proposed project. All work shall be completed by September 1, 2017

Q104 (3) K223 NFPA 101 Doors with Self-Closing Devices

1. The ASC shall ensure that all self-closing doors are equipped with a release device that complies with the National Fire Protection Associate Life Safety Code.

2. The manual folding door stop that was attached to the basement door in the Pre/Post Operative Care unit has been removed.

3. A complete and thorough sweep will be conducted of the ASC to ensure that all manually folding doors equipped with a manual doorstop are inspected and that the manual doorstops are either removed or replaced with an approved hold-open device compliant with the National Fire Protection Associate Life Safety Code.

4. The ASC Fire Safety Coordinator shall conduct a final inspection of all self-closing doors and assure that all hold-open devices are in compliance with the National Fire Protection Association's Life Safety Code.

5. The manual doorstop on the cited door has been replaced as of February 28, 2017 and a full inspection by the ASC Fire Safety Coordinator shall be conducted no later that June 1, 2017.

Q104 (4) K311 Vertical Openings - Enclosures

1. The ASC shall ensure that all vertical openings shall be enclosed or protected in accordance with the National Fire Protection Association's Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to compose plans for enclosing the required exit from the second floor that was down a set of stairs, which was open at the second floor to the waiting room.

3. Once architectural plans are complete the ASC will retain the services of the appropriate contracting company to complete the construction of the proposed enclosed staircase leading up from the second floor to the waiting room. Once construction is complete, compliance shall be automatically and permanently maintained. For continual future monitoring, the Fire Safety Coordinator and a retained architect shall be made aware of any planned renovations in order to ensure that the building remains in continued compliance with the National Fire Protection Association's Life Safety Code, 2012 Edition.

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

5. Axis Architectural Studio has already begun drafting blueprints for the proposed project. All work shall be completed by September 1, 2017

Q 104(1)/K161 NFPA 101 Building Construction Type and Height

1. The ASC shall ensure that it's building construction type and height is compliant with the National Fire Protection Association's 2012 Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to conduct a thorough analysis of the facility's exterior walls, and it's interior walls and floors. On February 20th, 2017 an initial inspection of the ASC revealed masonry exterior walls, and concrete interior walls and floors.

3. Axis Architectural Studio is currently in the process of determining the specific need of the building in order to comply with the National Fire Protection Association's 2012 Life Safety Code. Once all evaluation is complete the and corresponding architectural plans are completed and approved, the ASC will retain the services of the appropriate contracting company to make all necessary changes to ensure the ASC is in compliance with code. For continual future monitoring, the Fire Safety Coordinator and a retained architect shall be made aware of any planned renovations in order to ensure that the building remains in continued compliance with the National Fire Protection Association's Life Safety Code, 2012 Edition.

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

5. Axis Architectural Studio has already begun preparing a plan for the ASC to be in compliance with the National Fire Protection Association's 2012 Life Safety Code. All work shall be completed by September 1, 2017

Q104 (2)/ K211 Means of Egress – General

1. The ASC shall ensure that all inside stairs serving as an exit or an exit component shall be enclosed in accordance with the National Fire Protection Association's Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to compose plans for enclosing the staircase leading up from the basement to the Pre/Post Operative Care Unit so that it is a protected path to an Exit Discharge.

3. Once architectural plans are complete the ASC will retain the services of the appropriate contracting company to complete the construction of the proposed enclosed staircase leading up from the basement into the Pre/Post Operative Care Unit. Once construction is complete, compliance shall be automatically and permanently maintained. For continual future monitoring, the Fire Safety Coordinator and a retained architect shall be made aware of any planned renovations in order to ensure that the building remains in continued compliance with the National Fire Protection Association's Life Safety Code, 2012 Edition.

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

Q 141 Reference 1, 2 (1, 2, 3)

1. There is now on going documentation of patients' pain assessment by the nursing staff.

2. The PACU portion of the medical chart was amended to provide a systemic record of this assessment and an in-service was held with the nursing staff to inform them of this change.

3. Compliance of this corrective action will be monitored via the chart review process. For the first month following the implementation of the plan of correction, 10 random charts were selected per week for compliance review by a DON designee. Weekly random chart audits were conducted until 4 successive weeks of 100% compliance. Following this, ongoing compliance became part of the standard chart review process. Identified deficiencies will be addressed by the Director of Nursing to the nursing staff and reported to the Quality Assurance Committee.

4. The DON and the Assistant Medical Director (AMD) were responsible for implementing this plan of correction. The QAC will report the POC and the results of the compliance monitoring to the Governing Body at its next meeting. The Governing Body will be responsible for ensuring full compliance with all rules and regulation.

5. The POC was implemented as of Nov 15, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

Q141 Reference 1, 2 (3)

1. Nursing staff has been reminded, during an in-service held on February 22, 2017, that merely not dispensing medication that may share hypersensitivity concerns with a patient's known allergy is insufficient and that potential interactions must be positively identified and clarified with the prescribing physician. The medical chart has also been revised to facilitate systemic correction of this deficiency. It has been amended to contain a template for the listing of allergies directly over the prescribing orders template so that potential drug interactions are easier to note.

2. Systemic correction of this deficiency will be assured by comparison of documented allergies to the prescribing orders for every patient by the responsible RN and resolution of any identified concerns with prescribing physician.

3. Monitoring to assure the effectiveness of this POC will occur via chart review. For the first month following the implementation of the plan of correction, 10 random charts were selected per week for compliance review by a DON designee. Weekly random chart audits were conducted until 4 successive weeks of 100% compliance. Following this, ongoing compliance became part of the standard chart review process. Any potential identified deficiencies will be addressed by the Director of Nursing to the nursing staff and reported to the Quality Assurance Committee.

4. The DON and the Assistant Medical Director (AMD) were responsible for implementing this plan of correction. The QAC will report the POC and the results of the compliance monitoring to the Governing Body at its next meeting. The Governing Body will be responsible for ensuring full compliance with all rules and regulation.

5. This POC was implemented as of February 22, 2017, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

Q141 Reference 2 (4, 5)

1. Upon transfer from the OR to the PACU the attending physician must perform a medication reconciliation to avoid errors of duplication or omission. All medicine and intravenous fluid orders must be reviewed and rewritten upon transfer of the patient between the two care areas.

2. The medical chart has been modified to assure effective systemic compliance with this corrective action. The order templates have been amended to facilitate comparison and prescribing of medications and intravenous fluids between the OR and PACU. The identified deficiency and the POC was reviewed in separate attendance mandated meetings of the nursing and physician staff. The in-service meetings were held on January 11 and January 17, 2017.

3. Monitoring to assure compliance with this corrective action will be via chart review by the DON or a DON designee. For the first month following the implementation of the plan of correction, 10 random charts were selected per week for compliance review by a DON designee. Weekly random chart audits were conducted until 4 successive weeks of 100% compliance. Following this, ongoing compliance became part of the standard chart review process. Any potential identified deficiencies will be addressed by the Director of Nursing to the nursing staff and reported to the Quality Assurance Committee.

4. The DON and the Assistant Medical Director (AMD) were responsible for implementing this plan of correction. The QAC will report the POC and the results of the compliance monitoring to the Governing Body at its next meeting. The Governing Body will be responsible for ensuring full compliance with all rules and regulation.

5. This POC was fully implemented as of January 17, 2017, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

OK
4/13/17
AJ

Q141 Reference 2 (6)

1. Physicians transferring a patient from the Facility to the hospital will enter such an order in the patient's medical record.

2. Identification of this deficiency and the corrective action was reviewed at an attendance mandated quality assurance meeting of the medical staff held on January 17, 2017. Awareness by the physician staff to document a transfer order, along with, awareness by the nursing staff of such a requirement, will assure ongoing and systemic compliance.

3. The DON will review the charts of patients entered into the Transfer Log to assess for ongoing compliance. Deficiencies will be brought to the QAC for follow up.

4. The DON and the AMD were responsible for this corrective action.

5. This POC was fully implemented as of February 1, 2017, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

Q181

1. Medications from cartridge-like syringes will not be withdrawn into a second syringe for administration.

2. The Facility has purchased an adequate supply of Carpujet Injectors and a memo has been issued by the DON and the ASC's Pharmacy Consultant informing the medical staff of this deficiency and its correction. The memo also delineated the location of the injectors.

3. The DON will monitor for compliance of this corrective action via assessment polling during staff meetings, as well as, via observation of daily routines. Any deviations will be corrected if and when they are identified. Repeated observations of continued deficiencies in this matter will be reported to the Pharmacy Consultant and QAC for further attention.

4. The DON and Pharmacy Consultant were responsible for this POC.

5. This POC was fully implemented as of Nov 12, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

Q223

1. The ASC will now provide written disclosure of physician ownership prior to care at the facility. This disclosure information is provided to patients via the Internet directly on ASC's website. This information is both viewable and printable online. Patients contacting the ASC via telephone are instructed to visit the website to view patient disclosure information. Additionally, upon arrival to the ASC and prior to receiving any treatment, all patients will be provided a written copy of this information by the receptionist as per the in-service completed on March 28, 2017.

2. The universal availability and active provisioning of this information prior to rendering of any services by the Facility and its staff will assure continuous systemic correction of this deficiency.

3. Counseling staff shall be responsible for documenting that patients have received written disclosure of physician ownership prior to the initiation of care. Compliance will be documented in the counseling portion of the patients' medical record. Following phone conference with the DOH on March 29, 2017 an intensive monitoring period shall include 10 random charts per week for compliance review by a DON designee. Monitoring will continue until four (4) successive weeks of 100% compliance. Following this, ongoing compliance will continue to be part of the standard chart review process.

4. The Facility Administrator is responsible for this POC and its implementation. Facility Administrator will report any variance from this proposed POC directly to the Governing Body.

5. The POC will be implemented by April 10, 2017 and reported as such to the QAC.

Q224

1. Following the identified deficiency, the Facility has updated its methods of assuring patients and their designated representatives are adequately provided with written information regarding their ability to make informed decisions in respect to their care, as well as, their ability to institute Advance Directives prior to the initiation of care at this ASC. The Facility will update its online information to

include facts, questions and answers regarding advance directives, as well as, provide directing links to information, documents and resources provided by this State's Dept. of Health.

All patients scheduling appointments are to be queried regarding their desire to be furnished with written information relating to patient rights and advance directives. Such requested information will be provided prior to the initiation of care at the Facility and provided by the method most convenient to the patient; either, on line, via e-mail, fax or directly at the ASC.

Finally, the patient's medical record will be revised to better document provision of information with regards to patients' rights and advance directives. The patient record will have written confirmation that the information was given. Furthermore, the history portion of the medical chart will be amended to provide documentation of whether an advance directive exists.

mwt
o/c
4/13/17

2. The above corrective action provides systemic correction of the identified deficiency and will be applicable to all patients of this ASC.

3. Once the POC is implemented the Facility Administrator will assess the completeness and functioning of the on line corrective actions and the DON will add assessment of the completion of the advance directive section of the medical record to the chart review process. Both will report their findings to the QAC.

4. The Facility Administrator and the ASC's Information Technology Consultant will be responsible for implementing these planned corrections.

5. The POC is scheduled to be fully in place by Mar 31, 2017.

Q240/Q241

The Facility aims to diligently adhere to professionally acceptable standards and provide the most sanitary environment possible to its staff and in its provision of patient care and surgical services. The following POC objective is help assure its policies and procedures are in accordance with nationally recognized guidelines and that its quality assurance mechanisms adequately monitor compliance, as well as, identify and correct deficiencies on timely and ongoing basis. The observed deficiencies are addressed below.

O/C
per
acm
3/7/17

Q241 A

1. The use of an oxygen concentrator in a manner not consistent with the Manufacturer's Operator Manual was immediately ceased and by immediately removing the equipment the corrective action assured that this deficiency would not recur. Equipment at the ASC will be used in a manner consistent with the Manufacturer's Operator Manual.

2. A meeting of the QAC was held on Nov 4, 2017, Members of the Committee were informed of the Site Survey Team's finding by the AMD. Following this, and at the request of the QAC, the MD and the DON reviewed a catalogue of the ASC's available medical equipment to ensure that no other was being utilized outside its manufacturer's described parameters.

2017

O/C
11/28/17

3. To assure systemic compliance going forward, the QAC has charged the MD with assuring that any medical equipment purchased in the future will be utilized in a manner consistent with the Manufacturer's Operating Manual. Quarterly environmental rounds will now include inspection of new medical equipment to assure that this standard is complied with.

4. The AMD and the Infection Control Officer were responsible for this corrective action.

5. This POC to immediately remove the oxygen concentrator from the ASC was fully implemented and accepted by the DOH on November 2, 2016. The next environmental rounds will include review of any new medical equipment to assure compliance

Q241 B

1. During the course of its inspection, the Site Survey Team identified several instances of incomplete adherence to both the ASC's and CDC-HICPAC policies and standards with regards to infection control and hand hygiene by at least two of its staff members. The ASC held a mandatory in-service on February 21, 2017 for the medical, SPD and cleaning staffs and chaired by the Infection Control Officer. The meeting's purpose was to review the cited findings, review the ASC's policies regarding hand hygiene and infection control, as well as, role-play scenarios so that staff can better understand the real life applications of these standards.

2. Continued periodic meetings of the above staff addressing these infection control concerns will serve to address these concerns in a systemic fashion.

3. Monitoring by the Infection Control Officer or designee will include random observations of one employee from each department (medical, SPD and cleaning staffs) per week for a period of one month until 100% compliant with the relevant ASC policies. Corrective guidance will be provided during the course of this monitoring as needed and if systemic deficiencies are encountered, the Infection Control Officer will report to the QAC so that further remediate steps are taken.

4. The Infection Control Officer and the AMD were responsible for the implementation of this POC.

5. The in-service was conducted on February 21, 2017 and monitoring will continue until full compliance has been reported to the QAC by the Infection Control Officer.

Q241 C

1. The OR's are to be adequately prepared prior to reuse. The reestablishment of a clean environment includes the cleaning of the floor under the OR table after every case regardless whether is obvious soiling.

2. An in-service to review of the Facility Cleaning Manual to assure delineation of this step and a review of this corrective action with the cleaning staff by the Infection Control Officer was held on November 15, 2016 to assure systemic correction.

3. The Infection Control Officer observed the staff and the ORs for compliance on a daily basis for a two-week period to assure complete compliance; continued compliance, is assured via the monthly

Infection Control rounds. Shortcomings will be brought to the attention of the cleaning staff for correction and reported to the QAC.

4. The ICO and the AMD were responsible for this POC.

5. This POC was implemented as of Nov 15, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

Q241 D Reference #1

1. The ASC, to improve its adherence to professionally acceptable standards regarding the achievement of an optimal sanitary environment held an in-service on February 21, 2017, on hand hygiene and review AORN's Guidelines of Perioperative Practice as they relate to nail grooming and restrictions to various nail enhancement products.

2. In addition to the in-service of applicable members of the Facility staff, review of these guidelines during orientation of new employees will provide systemic assurance of continued vigilance.

3. The observational monitoring of the ASC's relevant staff by the Infection Control Officer will initially be on a daily basis for a two-week period; if complete compliance is noted, it will then become part of the monthly Infection Control Rounds. This will provide a mechanism to confirm the POC has been successfully implemented and will be complied with in the future.

4. The implementation of this POC was tasked to the Infection Control Officer.

5. In-service was held on February 21, 2017

Q241 D Reference #2, 3

1. The ASC's Safe Medication Administration Guidelines policy incorporates the CDC's recommendations as delineated in Safe Practices for Medical Injections, as well as, Guidelines for the Prevention of Intravascular Catheter Related Infections. An in-service of the Physician and Nursing staff was held on Feb 23, 2017 to review this policy, the recommendations on which it is based and its importance to infection control.

The need to wipe IV injector ports with 70% alcohol and that single dose vials entered more than once for the same patient must be done with new needle and syringe will be discussed in particular. Note will be made of the Survey Team's identification of deficiencies in this regard.

2. Review of the Facility's Safe Medication Administration Guidelines will be incorporated into the ASC's continuing education program and reviewed on at least an annual basis.

3. The ICO, or an appointed designee, will monitor for compliance to these guidelines and provide immediate remediation to observed deficiencies. The Infection Control Officer will initially monitor the Physician and Nursing staff on a daily basis for a two-week period; if complete compliance is noted, it will then become part of the monthly Infection Control Rounds.

4. The ICO and the AMD will be responsible for implementation of this corrective action and report its implementation and compliance to the QAC.

5. The POC was implemented on Feb 24, 2017.

Q242 A

1. The ASC recognizes that device manufacturers, in accordance with FDA and AAMI guidelines, have validated steps necessary for the proper processing of their devices and that Instructions For Use are an integral part of the correct preparation of equipment for safe patient use. During the survey an IFU was provided for a Shimadzu ultrasound vaginal probe. The staff member providing this was unaware that this ultrasound machine had long been replaced. As of July 2015, all of the Facility's ultrasound machines have been GE models. Staff members who would have been in a position to know this did not recognize what had occurred. The Facility uses and follows the correct IFU's for the processing of its equipment.

Ok. 3/7/17

2. Following the recognition of this finding, the POC will be to review the catalogue of medical equipment and to remove outdated manuals.

3. On a biannual basis the AMD will review this catalogue to assure it remains current.

4. The AMD is responsible for the implementation of this POC.

5. The POC will be completed by Mar 3, 2017.

Q242 B Reference 1

1. ASC policies regarding the reprocessing of its reusable instruments follow ANSI/AAMI guidelines; this includes the placement of a chemical indicator strip in each pack that is to undergo sterilization. The corrective action was to provide an in-service to members of the Sterilization and Processing staff, not only with regards to the deviation from policy regarding the placement of a CI in each pack, but also, as to its purpose and its importance to the infection control mechanisms in place at the ASC.

Ok. 4/17/17

2. Systemic compliance should be ensured by the universal adherence to this standard. All sterile packages should have CI.

3. Monitoring for compliance of this POC will be accomplished by randomly checking two of each type of sterile packs, once a week for a period of 8 continuous weeks. If complete compliance is noted, the Facility will return to its standard standard policy. The Certified Sterile Processing and Distribution Technician will then report to the QAC the effectiveness of this corrective action, or if deficiencies are noted and further remediate steps are needed.

4. The ICO, the AMD and the CSPDT were responsible for this POC.

5. The in-service was conducted on Feb 28, 2017.

Q 242 B Reference 2

1. The ASC policy regarding temperature controlled Decontamination area is drafted to reflect the guideline set forth in the AAMI Sterilization in Health care Facilities, 2014 Edition. An in-service was completed on March 15, 2017 to review new temperature recording procedures and safeguards by the Sterilization Consultant with the all Sterile Processing Technician (SPT), the Certified Sterile Processing and the Distribution Lead Technician (CSPDT).

2. The in-service by the Sterilization Consultant included specific instructions that during the time the sterilization equipment is running in the Decontamination area, the cooling units shall be adjusted accordingly to accommodate for the slight potential increase in room temperature.

3. The SPT shall be responsible for keeping a daily temperature log for the Decontamination area. In the event that the temperature is out of acceptable range the SPT shall immediately notify the CSPDT who shall immediately turn on cooling units until the Decontamination area temperature is within acceptable range. Additionally the CSPDT shall make monthly reviews of the daily temperature log to make sure all readings have either been within range or immediately addressed and recorded. If any deviation from this protocol has occurred the CSPDT shall notify the Sterilization Consultant for another in-service. In the event that the SPT has to notify the CSPDT of three (3) or more temperature variations within one (1) calendar month, the CSPDT shall immediately bring it to the attention of the Governing Body and the Governing Body will immediately act accordingly to bring in an independent specialist to fix whatever is causing the variations so as to resolve the issue

Ok. Acm. 4/17/17

4. The Medical Director in conjunction with the Sterilization Consultant shall be responsible for ensuring this Plan of correction is properly implemented by the SPT and CSPDT.

5. This plan of correction was completed on January 16, 2017 following the identification of this deficiency buy the Site Survey Team on November 2, 2016.

Q242 C

1. The ASC recognizes that the integrity of the sterile field is paramount to infection control and patient safety. Non-scrubbed personal will wear long sleeved attire while in restricted areas of the ASC.

2. To ensure a systemic correction of this deficiency the ASC purchased long sleeved scrubs for personnel working in restricted areas, this is in addition to the long sleeve gowns that are available to the relevant staff. A mandatory in-service for the relevant staff will be held to review the referenced AORN guidelines. The ASC will also revise its own policy to clearly reflect this standard.

Ok. Acm. 3/7/17

3. The Infection Control Officer will initially monitor all personnel working in restricted areas on a daily basis for a two-week period; if complete compliance is noted, it will then become part of the monthly Infection Control Rounds. The ICO, or an appointed designee, shall also be responsible for providing immediate remediation if non-compliance is later observed by conducting a mandatory in-service with non-complying personnel and shall report non-compliance to the QAC.

4. The AMD is responsible for the implementation of this POC.

5. Compliance to these standards was initiated following identification of the deficiency by the Survey Team on Nov 2, 2016. In-service was completed on Mar 6, 2017.

Q242 D

1. Personnel will wear appropriate personal protective equipment. The ASC provides easily accessible and appropriate personal protective equipment, such as, gloves, gowns, masks and eye protection to its staff.

Ok. Acm 4/17/17

2. Systemic compliance will be achieved by an in-service reviewing universal precaution standards and OSHA's blood borne pathogens guidelines as delineated under CFR 1910.1030. The important role of consistent and appropriate PPE use to staff safety and infection / exposure control will be reviewed.

3. The Infection Control Officer will initially monitor all personnel on a daily basis for a two-week period; if complete compliance is noted, it will then become part of the monthly Infection Control Rounds. The ICO, or an appointed designee, shall also be responsible for providing immediate remediation if non-compliance is later observed by conducting a mandatory in-service with non-complying personnel and shall report non-compliance to the QAC.

4. The AMD and ICO are responsible for instituting this POC.

5. The in-service was completed on March 7, 2017.

Q261

1. The medical chart will include a complete medical history and physical examination, performed, signed and dated by the patient's attending physician prior to any procedure performed at the ASC.

2. The medical chart was revised to reflect this POC and assure a systemic change. A mandatory in-service occurred on Jan 10, 2107 informing the physician staff of the need for this corrective action.

3. Monitoring of this POC will be monthly and on going via the chart audit process. Ten random charts per month will be reviewed by the DON. Lack of compliance will be reported to the QAC.

4. The AMD was responsible for this POC.

5. This corrective action was completed on Jan 11, 2017, following the identification of the deficiency by the Site Survey Team on Nov 2, 2016.

K161 NFPA 101 Building Construction Type and Height

1. The ASC shall ensure that it's building construction type and height is compliant with the National Fire Protection Association's 2012 Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to conduct a thorough analysis of the building's the facility's exterior walls, and it's interior walls and floors. On February 20th, 2017 an initial inspection of the ASC revealed masonry exterior walls, and concrete interior walls and floors.

3. Axis Architectural Studio is currently in the process of determining the specific need of the building in order to comply with the National Fire Protection Association's 2012 Life Safety Code. Once all evaluation is complete the and corresponding architectural plans are completed and approved, the ASC will retain the services of the appropriate contracting company to make all necessary changes to ensure the ASC is in compliance with code. For continual future monitoring, the Fire Safety Coordinator and a retained architect shall be made aware of any planned renovations in order to ensure that the building remains in continued compliance with the National Fire Protection Association's Life Safety Code, 2012 Edition.

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

5. Axis Architectural Studio has already begun preparing a plan for the ASC to be in compliance with the National Fire Protection Association's 2012 Life Safety Code. All work shall be completed by September 1, 2017

K211 Means of Egress – General

1. The ASC shall ensure that all inside stairs serving as an exit or an exit component shall be enclosed in accordance with the National Fire Protection Association's Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to compose plans for enclosing the staircase leading up from the basement to the Pre/Post Operative Care Unit so that it is a protected path to an Exit Discharge.

3. Once architectural plans are complete the ASC will retain the services of the appropriate contracting company to complete the construction of the proposed enclosed staircase leading up from the basement into the Pre/Post Operative Care Unit. Once construction is complete, compliance shall be automatically and permanently maintained. For continual future monitoring, the Fire Safety Coordinator and a retained architect shall be made aware of any planned renovations in order to ensure that the building remains in continued compliance with the National Fire Protection Association's Life Safety Code, 2012 Edition.

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

5. Axis Architectural Studio has already begun drafting blueprints for the proposed project. All work shall be completed by September 1, 2017

K223 NFPA 101 Doors with Self-Closing Devices

1. The ASC shall ensure that all self-closing doors are equipped with a release device that complies with the National Fire Protection Associate Life Safety Code.

2. The manual folding door stop that was attached to the basement door in the Pre/Post Operative Care unit has been replaced with a release device that is in compliance with the National Fire Protection Associate Life Safety Code.

3. A complete and thorough sweep will be conducted of the ASC to ensure that all manually folding doors equipped with a manual doorstop are inspected and the manual doorstops are either removed or replaced with an approved hold-open device compliant with the National Fire Protection Associate Life Safety Code.

4. The ASC Fire Safety Coordinator shall conduct a final inspection of all self-closing doors and assure that all hold-open devices are in compliance with the National Fire Protection Association's Life Safety Code.

5. The manual doorstop on the cited door has been replaced as of February 24, 2017 and a full inspection by the ASC Fire Safety Coordinator shall be conducted no later that June 1, 2017.

K311 Vertical Openings - Enclosures

1. The ASC shall ensure that all vertical openings shall be enclosed or protected in accordance with the National Fire Protection Association's Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to compose plans for enclosing the required exit from the second floor that was down a set of stairs, which was open at the second floor to the waiting room.

3. Once architectural plans are complete the ASC will retain the services of the appropriate contracting company to complete the construction of the proposed enclosed staircase leading up from the second floor to the waiting room. Once construction is complete, compliance shall be automatically and permanently maintained. For continual future monitoring, the Fire Safety Coordinator and a retained architect shall be made aware of any planned renovations in order to ensure that the building remains in continued compliance with the National Fire Protection Association's Life Safety Code, 2012 Edition.

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

5. Axis Architectural Studio has already begun drafting blueprints for the proposed project. All work shall be completed by September 1, 2017

Americans United for Life

Metropolitan Surg Assoc - Ltd Addl #2 rec'd 5/13/17

Q040 416.41 Governing Body and Management

1. The Governing Body held a meeting to review the specific findings for every deficiency as a result of the Federal Re-certification survey of the Facility on November 2, 2016. The Governing Body will effectively carry out the responsibilities of the Facility until all deficiencies are completely corrected and will ensure that the Facility remains complaint with all rules and regulation going forward.

2. As a direct result of the November 2, 2016 Federal Re-certification survey, the Governing Body has proactively decided to set short-term monthly meetings in order to review the findings of the survey and the proposed plan of correction. Monthly meetings will be held until all deficiencies are corrected and the plan of correction has been carried out.

3. The Governing Body has ultimate responsibility for assuring and monitoring that the Plan of Correction is implemented and that all deficiencies are corrected.

4. The Governing Body shall take all necessary actions to assure the Facility continues to provide quality healthcare in a safe environment.

5. The Governing Body met on February 15, 2017 to initially review the specific deficiencies identified as a result of the November 2, 2016 Federal Re-certification survey. The Governing Body will continue to meet on a monthly basis, or as needed if greater frequency is required, until all deficiencies have been corrected and the final approved Plan of Correction is completed. Once completed, the Governing body will resume its normal scheduled meetings.

Q100 416.44 Environment

1. The Governing Body held a meeting to review the specific findings of the Federal Re-certification survey of the Facility on November 2, 2016. The Governing Body contracted with Axis Architectural Studios for assistance in evaluating the requirements for fully complying with the National Fire Protection Association's Life Safety Code, 2012 edition.

2. Axis Architectural Studios completed a full inspection of the ASC's structural facility on February 20, 2017 to assess full compliance with the NFPA. The building will be brought up to all code requirements in order to ensure a safe and sanitary environment to protect the health and safety of patients.

OK 2/22/17 CP

3. The Governing Body has ultimate responsibility for assuring and monitoring that the Plan of Correction is implemented and that all deficiencies are corrected.

4. The Governing Body shall take all necessary actions to assure that the ASC has a safe and sanitary environment, properly constructed, equipped, and maintained to protect the health and safety of patients

5. The Governing Body met on February 15, 2017 to initially review the specific deficiencies identified as a result of the November 2, 2016 Federal Re-certification survey. The Governing Body will continue to monitor the progress of Axis Architectural Studios until all deficiencies are corrected and the final plan of correction is fully completed.

CP

Q 104(1)/K161 NFPA 101 Building Construction Type and Height

1. The ASC shall ensure that it's building construction type and height is compliant with the National Fire Protection Association's 2012 Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to conduct a thorough analysis of the facility's exterior walls, and it's interior walls and floors. On February 20th, 2017 an initial inspection of the ASC revealed masonry exterior walls, and concrete interior walls and floors, which confirmed that the building is Type III (211).

3. Axis Architectural Studio is currently in the process of determining the specific need of the building in order to comply with the National Fire Protection Association's 2012 Life Safety Code. Once all evaluation is complete the and corresponding architectural plans are completed and approved, the ASC will retain the services of the appropriate contracting company to make all necessary changes to ensure the ASC is in compliance with code. For continual future monitoring, the Fire Safety Coordinator and a retained architect shall be made aware of any planned renovations in order to ensure that the building remains in continued compliance with the National Fire Protection Association's Life Safety Code, 2012 Edition.

ok 2/22/17 CW

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

5. Axis Architectural Studio has already begun preparing a plan for the ASC to be in compliance with the National Fire Protection Association's 2012 Life Safety Code. All work shall be completed by July 1, 2017.

Q104 (2)/ K211 Means of Egress – General

1. The ASC shall ensure that all inside stairs serving as an exit or an exit component shall be enclosed in accordance with the National Fire Protection Association's Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to compose plans for enclosing the staircase leading up from the basement to the Pre/Post Operative Care Unit so that it is a protected path to an Exit Discharge. Plans for this renovation will be submitted to the Englewood Building Inspector no later than May 15, 2017 and we will have an anticipated completion date of July 1, 2017 pending final approval by the building department. In the meantime two (2) additional smoke detectors and two (2) additional fire extinguishers have been added to the area, one (1) of each has been added at the top and bottom of the staircase leading up from the basement.

ok 4/22/17 CW

3. Architectural plans are scheduled to be completed and submitted to the building department no later than May 15th, 2017. The ASC has retained the services of a contracting company to complete the construction of the proposed enclosed staircase leading up from the basement into the Pre/Post Operative Care Unit. Once construction is complete, compliance shall be automatically and permanently maintained. For continual future monitoring, the Fire Safety Coordinator and a retained architect shall

be made aware of any planned renovations in order to ensure that the building remains in continued compliance with the National Fire Protection Association's Life Safety Code, 2012 Edition.

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

5. Axis Architectural Studio has already begun drafting blueprints for the proposed project. Barring any setbacks from the city of Englewood, all work shall be completed by July 1, 2017

Q104 (3) K223 NFPA 101 Doors with Self-Closing Devices

1. The ASC shall ensure that all manual door stops have been removed.

2. The manual folding door stop that was attached to the b sement door in the Pre/Post Operative Care unit has been removed.

3. A complete and thorough sweep will be conducted of the ASC to ensure that all manually folding doors equipped with a manual doorstop are inspected and that the manual doorstops are either removed or replaced with an approved hold-open device compliant with the National Fire Protection Associate Life Safety Code.

AC 2/22/17

4. The ASC Fire Safety Coordinator shall conduct a final inspection of all self-closing doors and assure that all hold-open devices are in compliance with the National Fire Protection Association's Life Safety Code.

5. The manual doorstop on the cited door has been replaced as of February 28, 2017.

Q104 (4) K311 Vertical Openings - Enclosures

1. The ASC shall ensure that all vertical openings shall be enclosed or protected in accordance with the National Fire Protection Association's Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to compose plans for enclosing the required exit from the second floor that was down a set of stairs, which was open at the second floor to the waiting room. Plans are now complete and because no electrical work needs to be done to close off the second floor waiting room, plans do not have to be submitted to the town of Englewood and work can now begin. Until work has been completed, two (2) additional smoke detectors and two (2) additional fire extinguishers have been added to the area, one (1) of each at the top and bottom of the staircase leading up to the waiting room on the second floor.

JK 2/22/17

3. The ASC has retained the services of the appropriate contracting company to complete the construction of the proposed enclosed staircase leading up to the waiting room. Once construction is complete, compliance shall be automatically and permanently maintained. For continual future monitoring, the Fire Safety Coordinator and a retained architect shall be made aware of any planned renovations in order to ensure that the building remains in continued compliance with the National Fire Protection Association's Life Safety Code, 2012 Edition.

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

5. All work with regards to closing off the waiting room shall be completed by June 1, 2017

Q 141 Reference 1, 2 (1, 2, 3)

1. There is now on going documentation of patients' pain assessment by the nursing staff.

2. The PACU portion of the medical chart was amended to provide a systemic record of this assessment and an in-service was held with the nursing staff to inform them of this change.

3. Compliance of this corrective action will be monitored via the chart review process. For the first month following the implementation of the plan of correction, 10 random charts were selected per week for compliance review by a DON designee. Weekly random chart audits were conducted until 4 successive weeks of 100% compliance. Following this, ongoing compliance became part of the standard chart review process. Identified deficiencies will be addressed by the Director of Nursing to the nursing staff and reported to the Quality Assurance Committee.

4. The DON and the Assistant Medical Director (AMD) were responsible for implementing this plan of correction. The QAC will report the POC and the results of the compliance monitoring to the Governing Body at its next meeting. The Governing Body will be responsible for ensuring full compliance with all rules and regulation.

5. The POC was implemented as of Nov 15, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

Q141 Reference 1, 2 (3)

1. Nursing staff has been reminded, during an in-service held on February 22, 2017, that merely not dispensing medication that may share hypersensitivity concerns with a patient's known allergy is insufficient and that potential interactions must be positively identified and clarified with the prescribing physician. The medical chart has also been revised to facilitate systemic correction of this deficiency. It has been amended to contain a template for the listing of allergies directly over the prescribing orders template so that potential drug interactions are easier to note.

2. Systemic correction of this deficiency will be assured by comparison of documented allergies to the prescribing orders for every patient by the responsible RN and resolution of any identified concerns with prescribing physician.

3. Monitoring to assure the effectiveness of this POC will occur via chart review. For the first month following the implementation of the plan of correction, 10 random charts were selected per week for compliance review by a DON designee. Weekly random chart audits were conducted until 4 successive weeks of 100% compliance. Following this, ongoing compliance became part of the standard chart review process. Any potential identified deficiencies will be addressed by the Director of Nursing to the nursing staff and reported to the Quality Assurance Committee.

4. The DON and the Assistant Medical Director (AMD) were responsible for implementing this plan of correction. The QAC will report the POC and the results of the compliance monitoring to the Governing Body at its next meeting. The Governing Body will be responsible for ensuring full compliance with all rules and regulation.

5. This POC was implemented as of February 22, 2017, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

Q141 Reference 2 (4, 5)

1. Upon transfer from the OR to the PACU the attending physician must perform a medication reconciliation to avoid errors of duplication or omission. All medicine and intravenous fluid orders must be reviewed and rewritten upon transfer of the patient between the two care areas.

2. The medical chart has been modified to assure effective systemic compliance with this corrective action. The order templates have been amended to facilitate comparison and prescribing of medications and intravenous fluids between the OR and PACU. The identified deficiency and the POC was reviewed in separate attendance mandated meetings of the nursing and physician staff. The in-service meetings were held on January 11 and January 17, 2017.

3. Monitoring to assure compliance with this corrective action will be via chart review by the DON or a DON designee. For the first month following the implementation of the plan of correction, 10 random charts were selected per week for compliance review by a DON designee. Weekly random chart audits were conducted until 4 successive weeks of 100% compliance. Following this, ongoing compliance became part of the standard chart review process. Any potential identified deficiencies will be addressed by the Director of Nursing to the nursing staff and reported to the Quality Assurance Committee.

4. The DON and the Assistant Medical Director (AMD) were responsible for implementing this plan of correction. The QAC will report the POC and the results of the compliance monitoring to the Governing Body at its next meeting. The Governing Body will be responsible for ensuring full compliance with all rules and regulation.

5. This POC was fully implemented as of January 17, 2017, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

Q141 Reference 2 (6)

1. Physicians transferring a patient from the Facility to the hospital will enter such an order in the patient's medical record.

2. Identification of this deficiency and the corrective action was reviewed at an attendance mandated quality assurance meeting of the medical staff held on January 17, 2017. Awareness by the physician staff to document a transfer order, along with, awareness by the nursing staff of such a requirement, will assure ongoing and systemic compliance.

3. The DON will review the charts of patients entered into the Transfer Log to assess for ongoing compliance. Deficiencies will be brought to the QAC for follow up.

4. The DON and the AMD were responsible for this corrective action.

5. This POC was fully implemented as of February 1, 2017, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

Q181

1. Medications from cartridge-like syringes will not be withdrawn into a second syringe for administration.

2. The Facility has purchased an adequate supply of Carpujet Injectors and a memo has been issued by the DON and the ASC's Pharmacy Consultant informing the medical staff of this deficiency and its correction. The memo also delineated the location of the injectors.

3. The DON will monitor for compliance of this corrective action via assessment polling during staff meetings, as well as, via observation of daily routines. Any deviations will be corrected if and when they are identified. Repeated observations of continued deficiencies in this matter will be reported to the Pharmacy Consultant and QAC for further attention.

4. The DON and Pharmacy Consultant were responsible for this POC.

5. This POC was fully implemented as of Nov 12, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

Q223

1. The ASC will now provide written disclosure of physician ownership prior to care at the facility. This disclosure information is provided to patients via the Internet directly on ASC's website. This information is both viewable and printable online. Patients contacting the ASC via telephone are instructed to visit the website to view patient disclosure information. Additionally, upon arrival to the ASC and prior to receiving any treatment, all patients will be provided a written copy of this information by the receptionist as per the in-service completed on March 28, 2017.

2. The universal availability and active provisioning of this information prior to rendering of any services by the Facility and its staff will assure continuous systemic correction of this deficiency.

3. Counseling staff shall be responsible for documenting that patients have received written disclosure of physician ownership prior to the initiation of care. Compliance will be documented in the counseling portion of the patients' medical record. Following phone conference with the DOH on March 29, 2017 an intensive monitoring period shall include 10 random charts per week for compliance review by a DON designee. Monitoring will continue until four (4) successive weeks of 100% compliance. Following this, ongoing compliance will continue to be part of the standard chart review process.

4. The Facility Administrator is responsible for this POC and its implementation. Facility Administrator will report any variance from this proposed POC directly to the Governing Body.

5. The POC will be implemented by April 10, 2017 and reported as such to the QAC.

Q224

1. Following the identified deficiency, the Facility has updated its methods of assuring patients and their designated representatives are adequately provided with written information regarding their ability to make informed decisions in respect to their care, as well as, their ability to institute Advance Directives prior to the initiation of care at this ASC. The Facility will update its online information to include facts, questions and answers regarding advance directives, as well as, provide directing links to information, documents and resources provided by this State's Dept. of Health.

All patients scheduling appointments are to be queried regarding their desire to be furnished with written information relating to patient rights and advance directives. Such requested information will be provided prior to the initiation of care at the Facility and provided by the method most convenient to the patient; either, on line, via e-mail, fax or directly at the ASC.

Finally, the patient's medical record will be revised to better document provision of information with regards to patients' rights and advance directives. The patient record will have written confirmation that the information was given. Furthermore, the history portion of the medical chart will be amended to provide documentation of whether an advance directive exists.

2. The above corrective action provides systemic correction of the identified deficiency and will be applicable to all patients of this ASC.

3. Once the POC is implemented the Facility Administrator will assess the completeness and functioning of the on line corrective actions and the DON will add assessment of the completion of the advance directive section of the medical record to the chart review process. Both will report their findings to the QAC.

4. The Facility Administrator and the ASC's Information Technology Consultant will be responsible for implementing these planned corrections.

5. The POC is scheduled to be fully in place by Mar 31, 2017.

Q240/~~Q241~~

The Facility aims to diligently adhere to professionally acceptable standards and provide the most sanitary environment possible to its staff and in its provision of patient care and surgical services. The following POC objective is help assure its policies and procedures are in accordance with nationally recognized guidelines and that its quality assurance mechanisms adequately monitor compliance, as well as, identify and correct deficiencies on timely and ongoing basis. The observed deficiencies are addressed below.

Q241 A

1. The use of an oxygen concentrator in a manner not consistent with the Manufacturer's Operator Manual was immediately ceased and by immediately removing the equipment the corrective action assured that this deficiency would not recur. Equipment at the ASC will be used in a manner consistent with the Manufacturer's Operator Manual.

2. A meeting of the QAC was held on Nov 4, 2017, Members of the Committee were informed of the Site Survey Team's finding by the AMD. Following this, and at the request of the QAC, the MD and the DON reviewed a catalogue of the ASC's available medical equipment to ensure that no other was being utilized outside its manufacturer's described parameters.

3. To assure systemic compliance going forward, the QAC has charged the MD with assuring that any medical equipment purchased in the future will be utilized in a manner consistent with the Manufacturer's Operating Manual. Quarterly environmental rounds will now include inspection of new medical equipment to assure that this standard is complied with.

4. The AMD and the Infection Control Officer were responsible for this corrective action.

5. This POC to immediately remove the oxygen concentrator from the ASC was fully implemented and accepted by the DOH on November 2, 2016. The next environmental rounds will include review of any new medical equipment to assure compliance

Q241 B

1. During the course of its inspection, the Site Survey Team identified several instances of incomplete adherence to both the ASC's and CDC-HICPAC policies and standards with regards to infection control and hand hygiene by at least two of its staff members. The ASC held a mandatory in-service on February 21, 2017 for the medical, SPD and cleaning staffs and chaired by the Infection Control Officer. The meeting's purpose was to review the cited findings, review the ASC's policies regarding hand hygiene and infection control, as well as, role-play scenarios so that staff can better understand the real life applications of these standards.

2. Continued periodic meetings of the above staff addressing these infection control concerns will serve to address these concerns in a systemic fashion.

3. Monitoring by the Infection Control Officer or designee will include random observations of one employee from each department (medical, SPD and cleaning staffs) per week for a period of one month until 100% compliant with the relevant ASC policies. Corrective guidance will be provided during the course of this monitoring as needed and if systemic deficiencies are encountered, the Infection Control Officer will report to the QAC so that further remediate steps are taken.

4. The Infection Control Officer and the AMD were responsible for the implementation of this POC.

5. The in-service was conducted on February 21, 2017 and monitoring will continue until full compliance has been reported to the QAC by the Infection Control Officer.

Q241 C

1. The OR's are to be adequately prepared prior to reuse. The reestablishment of a clean environment includes the cleaning of the floor under the OR table after every case regardless whether is obvious soiling.

2. An in-service to review of the Facility Cleaning Manual to assure delineation of this step and a review of this corrective action with the cleaning staff by the Infection Control Officer was held on November 15, 2016 to assure systemic correction.

3. The Infection Control Officer observed the staff and the ORs for compliance on a daily basis for a two-week period to assure complete compliance; continued compliance, is assured via the monthly Infection Control rounds. Shortcomings will be brought to the attention of the cleaning staff for correction and reported to the QAC.

4. The ICO and the AMD were responsible for this POC.

5. This POC was implemented as of Nov 15, 2016, following the identification of this deficiency by the Site Survey Team on Nov. 2, 2016.

Q241 D Reference #1

1. The ASC, to improve its adherence to professionally acceptable standards regarding the achievement of an optimal sanitary environment held an in-service on February 21, 2017, on hand hygiene and review AORN's Guidelines of Perioperative Practice as they relate to nail grooming and restrictions to various nail enhancement products.

2. In addition to the in-service of applicable members of the Facility staff, review of these guidelines during orientation of new employees will provide systemic assurance of continued vigilance.

3. The observational monitoring of the ASC's relevant staff by the Infection Control Officer will initially be on a daily basis for a two-week period; if complete compliance is noted, it will then become part of the monthly Infection Control Rounds. This will provide a mechanism to confirm the POC has been successfully implemented and will be complied with in the future.

4. The implementation of this POC was tasked to the Infection Control Officer.

5. In-service was held on February 21, 2017

Q241 D Reference #2, 3

1. The ASC's Safe Medication Administration Guidelines policy incorporates the CDC's recommendations as delineated in Safe Practices for Medical Injections, as well as, Guidelines for the Prevention of Intravascular Catheter Related Infections. An in-service of the Physician and Nursing staff was held on Feb 23, 2017 to review this policy, the recommendations on which it is based and its importance to infection control.

The need to wipe IV injector ports with 70% alcohol and that single dose vials entered more than once for the same patient must be done with new needle and syringe will be discussed in particular. Note will be made of the Survey Team's identification of deficiencies in this regard.

2. Review of the Facility's Safe Medication Administration Guidelines will be incorporated into the ASC's continuing education program and reviewed on at least an annual basis.

3. The ICO, or an appointed designee, will monitor for compliance to these guidelines and provide immediate remediation to observed deficiencies. The Infection Control Officer will initially monitor the Physician and Nursing staff on a daily basis for a two-week period; if complete compliance is noted, it will then become part of the monthly Infection Control Rounds.

4. The ICO and the AMD will be responsible for implementation of this corrective action and report its implementation and compliance to the QAC.

5. The POC was implemented on Feb 24, 2017.

Q242 A

1. The ASC recognizes that device manufacturers, in accordance with FDA and AAMI guidelines, have validated steps necessary for the proper processing of their devices and that Instructions For Use are an integral part of the correct preparation of equipment for safe patient use. During the survey an IFU was provided for a Shimadzu ultrasound vaginal probe. The staff member providing this was unaware that this ultrasound machine had long been replaced. As of July 2015, all of the Facility's ultrasound machines have been GE models. Staff members who would have been in a position to know this did not recognize what had occurred. The Facility uses and follows the correct IFU's for the processing of its equipment.

2. Following the recognition of this finding, the POC will be to review the catalogue of medical equipment and to remove outdated manuals.

3. On a biannual basis the AMD will review this catalogue to assure it remains current.

4. The AMD is responsible for the implementation of this POC.

5. The POC will be completed by Mar 3, 2017.

Q242 B Reference 1

1. ASC policies regarding the reprocessing of its reusable instruments follow ANSI/AAMI guidelines; this includes the placement of a chemical indicator strip in each pack that is to undergo sterilization. The corrective action was to provide an in-service to members of the Sterilization and Processing staff, not only with regards to the deviation from policy regarding the placement of a CI in each pack, but also as to its purpose and its importance to the infection control mechanisms in place at the ASC.

2. Systemic compliance should be ensured by the universal adherence to this standard. All sterile packages should have CI.

3. Monitoring for compliance of this POC will be accomplished by randomly checking two of each type of sterile packs, once a week for a period of 8 continuous weeks. If complete compliance is noted the Facility will return to its standard standard policy. The Certified Sterile Processing and Distribution Technician will then report to the QAC the effectiveness of this corrective action, or if deficiencies are noted and further remediate steps are needed.

4. The ICO, the AMD and the CSPDT were responsible for this POC.

5. The in-service was conducted on Feb 28, 2017.

Q 242 B Reference 2

1. The ASC policy regarding temperature controlled Decontamination area is drafted to reflect the guideline set forth in the AAMI Sterilization in Health care Facilities, 2014 Edition. An in-service was completed on March 15, 2017 to review new temperature recording procedures and safeguards by the Sterilization Consultant with the all Sterile Processing Technician (SPT), the Certified Sterile Processing and the Distribution Lead Technician (CSPDT).

2. The in-service by the Sterilization Consultant included specific instructions that during the time the sterilization equipment is running in the Decontamination area, the cooling units shall be adjusted accordingly to accommodate for the slight potential increase in room temperature.

3. The SPT shall be responsible for keeping a daily temperature log for the Decontamination area. In the event that the temperature is out of acceptable range the SPT shall immediately notify the CSPDT who shall immediately turn on cooling units until the Decontamination area temperature is within acceptable range. Additionally the CSPDT shall make monthly reviews of the daily temperature log to make sure all readings have either been within range or immediately addressed and recorded. If any deviation from this protocol has occurred the CSPDT shall notify the Sterilization Consultant for another in-service. In the event that the SPT has to notify the CSPDT of three (3) or more temperature variations within one (1) calendar month, the CSPDT shall immediately bring it to the attention of the Governing Body and the Governing Body will immediately act accordingly to bring in an independent specialist to fix whatever is causing the variations so as to resolve the issue

4. The Medical Director in conjunction with the Sterilization Consultant shall be responsible for ensuring this Plan of correction is properly implemented by the SPT and CSPDT.

5. This plan of correction was completed on January 16, 2017 following the identification of this deficiency buy the Site Survey Team on November 2, 2016.

Q242 C

1. The ASC recognizes that the integrity of the sterile field is paramount to infection control and patient safety. Non-scrubbed personal will wear long sleeved attire while in restricted areas of the ASC.

2. To ensure a systemic correction of this deficiency the ASC purchased long sleeved scrubs for personnel working in restricted areas, this is in addition to the long sleeve gowns that are available to the relevant staff. A mandatory in-service for the relevant staff will be held to review the referenced AORN guidelines. The ASC will also revise its own policy to clearly reflect this standard.

3. The Infection Control Officer will initially monitor all personnel working in restricted areas on a daily basis for a two-week period; if complete compliance is noted, it will then become part of the monthly Infection Control Rounds. The ICO, or an appointed designee, shall also be responsible for

providing immediate remediation if non-compliance is later observed by conducting a mandatory in-service with non-complying personnel and shall report non-compliance to the QAC.

4. The AMD is responsible for the implementation of this POC.

5. Compliance to these standards was initiated following identification of the deficiency by the Survey Team on Nov 2, 2016. In-service was completed on Mar 6, 2017.

Q242 D

1. Personnel will wear appropriate personal protective equipment. The ASC provides easily accessible and appropriate personal protective equipment, such as, gloves, gowns, masks and eye protection to its staff.

2. Systemic compliance will be achieved by an in-service reviewing universal precaution standards and OSHA's blood borne pathogens guidelines as delineated under CFR 1910.1030. The important role of consistent and appropriate PPE use to staff safety and infection / exposure control will be reviewed.

3. The Infection Control Officer will initially monitor all personnel on a daily basis for a two-week period; if complete compliance is noted, it will then become part of the monthly Infection Control Rounds. The ICO, or an appointed designee, shall also be responsible for providing immediate remediation if non-compliance is later observed by conducting a mandatory in-service with non-complying personnel and shall report non-compliance to the QAC.

4. The AMD and ICO are responsible for instituting this POC.

5. The in-service was completed on March 7, 2017.

Q261

1. The medical chart will include a complete medical history and physical examination, performed, signed and dated by the patient's attending physician prior to any procedure performed at the ASC.

2. The medical chart was revised to reflect this POC and assure a systemic change. A mandatory in-service occurred on Jan 10, 2107 informing the physician staff of the need for this corrective action.

3. Monitoring of this POC will be monthly and on going via the chart audit process. Ten random charts per month will be reviewed by the DON. Lack of complian :e will be reported to the QAC.

4. The AMD was responsible for this POC.

5. This corrective action was completed on Jan 11, 2017, following the identification of the deficiency by the Site Survey Team on Nov 2, 2016.

K161 NFPA 101 Building Construction Type and Height

1. The ASC shall ensure that it's building construction type and height is compliant with the National Fire Protection Association's 2012 Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to conduct a thorough analysis of the building's the facility's exterior walls, and it's interior walls and floors. On February 20th, 2017 an initial inspection of the ASC revealed masonry exterior walls, and concrete interior walls and floors.

3. Axis Architectural Studio is currently in the process of determining the specific need of the building in order to comply with the National Fire Protection Association's 2012 Life Safety Code. Once all evaluation is complete the and corresponding architectural plans are completed and approved, the ASC will retain the services of the appropriate contracting company to make all necessary changes to ensure the ASC is in compliance with code. For continual future monitoring, the Fire Safety Coordinator and a retained architect shall be made aware of any planned renovations in order to ensure that the building remains in continued compliance with the National Fire Protection Association's Life Safety Code, 2012 Edition.

OK 2/22/18 CB

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

5. Axis Architectural Studio has already begun preparing a plan for the ASC to be in compliance with the National Fire Protection Association's 2012 Life Safety Code. All work shall be completed by September 1, 2017

K211 Means of Egress – General

1. The ASC shall ensure that all inside stairs serving as an exit or an exit component shall be enclosed in accordance with the National Fire Protection Association's Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to compose plans for enclosing the staircase leading up from the basement to the Pre/Post Operative Care Unit so that it is a protected path to an Exit Discharge.

3. Once architectural plans are complete the ASC will retain the services of the appropriate contracting company to complete the construction of the proposed enclosed staircase leading up from the basement into the Pre/Post Operative Care Unit. Once construction is complete, compliance shall be automatically and permanently maintained. For continual future monitoring, the Fire Safety Coordinator and a retained architect shall be made aware of any planned renovations in order to ensure that the building remains in continued compliance with the National Fire Protection Association's Life Safety Code, 2012 Edition.

OK 2/22/18 CB

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

5. Axis Architectural Studio has already begun drafting blueprints for the proposed project. All work shall be completed by September 1, 2017

K223 NFPA 101 Doors with Self-Closing Devices

1. The ASC shall ensure that all self-closing doors are equipped with a release device that complies with the National Fire Protection Associate Life Safety Code.

2. The manual folding door stop that was attached to the basement door in the Pre/Post Operative Care unit has been replaced with a release device that is in compliance with the National Fire Protection Associate Life Safety Code.

3. A complete and thorough sweep will be conducted of the ASC to ensure that all manually folding doors equipped with a manual doorstop are inspected and the manual doorstops are either removed or replaced with an approved hold-open device compliant with the National Fire Protection Associate Life Safety Code.

OK 2/22/18 GP

4. The ASC Fire Safety Coordinator shall conduct a final inspection of all self-closing doors and assure that all hold-open devices are in compliance with the National Fire Protection Association's Life Safety Code.

5. The manual doorstop on the cited door has been replaced as of February 24, 2017 and a full inspection by the ASC Fire Safety Coordinator shall be conducted no later that June 1, 2017.

K311 Vertical Openings - Enclosures

1. The ASC shall ensure that all vertical openings shall be enclosed or protected in accordance with the National Fire Protection Association's Life Safety Code.

2. The ASC has already contacted and retained the services of Axis Architectural Studio to compose plans for enclosing the required exit from the second floor that was down a set of stairs, which was open at the second floor to the waiting room.

3. Once architectural plans are complete the ASC will retain the services of the appropriate contracting company to complete the construction of the proposed enclosed staircase leading up from the second floor to the waiting room. Once construction is complete, compliance shall be automatically and permanently maintained. For continual future monitoring, the Fire Safety Coordinator and a retained architect shall be made aware of any planned renovations in order to ensure that the building remains in continued compliance with the National Fire Protection Association's Life Safety Code, 2012 Edition.

OK 2/22/18 GP

4. The ASC Fire Safety Coordinator shall conduct a final inspection upon project completion to ensure that the plan of correction meets city code and is in compliance with the National Fire Protection Association's Life Safety Code.

5. Axis Architectural Studio has already begun drafting blueprints for the proposed project. All work shall be completed by September 1, 2017

When this form is utilized for a survey, the following needs to be addressed:
This survey was reviewed with the Administrator or his/her authorized representative at the conclusion of the survey. He/she was advised of the areas where standards were not met in violation with the rules and regulations promulgated under the authority of N.J.S.A. 26:2H-5(b). He/she was further advised that it was necessary to correct conditions which do not meet the standards and that failure to correct those deficiencies may result in a fine of up to $5,000.00 per violation per day in accordance with N.J.S.A. 26:2H-14 as amended. Refusal to sign does not negate the facility's responsibility to correct deficiencies.

NARRATIVE

A Visit was made to this facility in response to the above referanced complaint. Administrative staff was made aware of the visit and the nature of the complaint.

The investigation included:

- √ **Tour.**
- √ **Staffing reports.**
- √ **Medical record review.**
- √ **Staff interviews.**
- ___ **Patient interviews.**
- √ **Review of other facility documentation.**
- ___ **Meal/Medication pass observation.**
- ___ **Water/Room temperature.**

An exit conference was held with administrative staff (discussed findings and concerns). An addendum may follow after review by the Department of Health and Senior Services.

Re: Complaint #NJ00124488

Dear Ms. Groves:

Thank you for the courtesy and cooperation extended during the Complaint Investigation conducted July 16, 2019 by a surveyor from the New Jersey Department of Health.

Enclosed is a copy of the State deficiency form indicating that no deficiencies were found during the survey. Please sign the first page of the State deficiency form and return the original copy to my attention. It is important to return the form promptly to this office.

If you have questions concerning this letter, please do not hesitate to contact me at (609) 292-9900.

Sincerely,

Lisa Heim for

Complaint #NJ00124488

A representative from Health Facility Survey and Field Operations conducted an investigation of your complaint concerning possible drug theft at Cherry Hill Womens Center. The investigation included a tour, document review, and staff interview.

After evaluating this information, the surveyor was unable to identify a citable deficient practice related to your concerns based on State regulations. The results of this investigation were presented to and reviewed with administrative staff for continued monitoring of patient care.

If you have questions concerning this letter, please do not hesitate to call (609) 292-9900 and ask to speak to a supervisor.

Thank you for forwarding your concerns to this office.

Sincerely,

The Acute Care Program

Name of Applicant **Cherry Hill Women's Center**	CN or Reference Number **22445**
Applicant Address **502 Kings HWY, North** **Cherry Hill, NJ 08002**	Work Site Address **Surgical Suite**
Contact Person **Jenifer Groves, MEd, MBA**	Contact Title **Regional Executive Director**
Contact Email Address **jgroves@thewomanscenters.com**	Telephone Number **(856) 834-0100**

Visit Conducted by **E. DeCicco**	Date of Visit **9/26/2018**	Date of Revisit Select date.

Description
New heating and air conditioning system installed throughout the surgical suite.

Waiver Requested	☐ YES ☒ NO	☐ Approved ☐ Disapproved	**WAIVER No.: N/A DATE ISSUED:** Select date.

This is an approval visit for **Cherry Hill Women's Center** *(Name of Facility)*

providing **ambulatory surgical services** *(Services)*

Area of Approval / Findings
New heating and air conditioning system (HVAC) for the surgical suite including the relocation of heating and cooling units from the basement to the roof.

DCA Approved Plans	☒ YES ☐ NO **EXPLAIN: 5013-18**
Staffing Reviewed and Adequate	☐ YES ☒ NO **EXPLAIN: No new staff.**

Certificate of Occupancy **TOWNSHIP: Cherry Hill Township DATE ISSUED: 9/24/2018**	Temporary Certificate of Occupancy **TOWNSHIP: DATE ISSUED:** Select date. **EXPIRES:** Select date.

Policies and Procedures ☒ **Reviewed and adequate for services provided.** ☐ **Not applicable for this approval survey.**

Deficiencies
Due to excessive humidity levels throughout the facility (Sterile Processing Room – 86%, OR #1 - 76%, OR #2 - 78%) monitoring was put in place. Portable dehumidifiers were put in place to reduce the humidity. Portable dehumidifiers were removed on 9/27/18 at 6:00 AM. Results of this monitoring was provided to HFS&FO for the past 24 hours and the building's HVAC is maintaining humidity within an acceptable range. Monitoring results are attached.

Certificate Comments:

☐ **Certificate of Occupancy**
This serves notice that said building or structure has been constructed in accordance with the New Jersey Uniform Construction Code and is approved for occupancy.

☑ **Certificate of Approval**
This serves notice that the work completed has been constructed or installed in accordance with the New Jersey Uniform Construction Code and is approved. If the permit was issued for minor work, this certificate was based upon what was visible at the time of inspection.

☐ **Certificate of Continued Occupancy**
This serves notice that based on a general inspection of the visible parts of the building there are no imminent hazards and the building is approved for continued occupancy.

☐ **Temporary Certificate of Compliance**
The following conditions must be met no later than
or the owner will be subject to fine or order to vacate:
This certificate has an expiration date of:
Conditions to be met:

☐ **Certificate of Clearance - Lead Abatement 5:17**
This serves notice that based on written certification, lead abatement was performed as per NJAC5:17 to the following extent.
☐ Total removal of lead-based paint hazards in scope of work
☐ Partial or limited time period (years); see file

☐ **Certificate of Clearance - Asbestos Abatement**
This serves notice that based on written certification, asbestos abatement was performed to the following extent.
☐ Total removal of asbestos hazards in scope of work
☐ Partial or limited time period (years); see file

☐ **Certificate of Compliance**
This serves notice that said potentially hazardous equipment has been installed and/or maintained in accordance with the New Jersey Uniform Construction Code and is approved for use until

☐ **Temporary Certificate of Occupancy**

Plan of Correction

Objectives: Monitor humidity levels to ensure acceptable range

Terminal cleaning of any areas that may have been impacted

1. Due to HVAC upgrades, the humidity levels have been out of range. Per the Joint Commission, alongside AAMI, the acceptable humidity range of the sterile corridor and operating suites is between 30-60%. Per the CDC, the acceptable temperature range is between 68-73 degrees F.

Action plan:

We got de-humidifiers. We created a log to track the temperature and humidity in the sterile corridor to ensure that the climate is getting to and staying within an acceptable range. The data collection includes DicksonOne Temperature/Humidity Wall monitors as well as wall thermometers, both of which are inspected and calibrated yearly. Once the data stays within the acceptable temperature/humidity ranges for 12 consecutive hours, we will consider the system to be functioning properly, without any additional support (i.e. de-humidifier).

Because the Sterile Corridor registered data that was outside of the acceptable temperature/humidity ranges, the area needs to be thoroughly cleaned/sanitized to ensure a workspace that supports good infection control programming. First, the de-humidifiers will be removed from the premises, and then all surfaces in these spaces will be terminally cleaned.

Dear Ms. Groves:

Thank you for the courtesy and cooperation extended during the Approval Survey conducted September 26, 2018 by surveyors from the New Jersey Department of Health.

Enclosed is a copy of them State Deficiency Form indicating that no deficiencies were found during the survey. Please sign the first page of the State Deficiency Form and return the original copy to my attention. It is important to return the form promptly to this office.

If you have questions concerning this letter, please do not hesitate to contact me at (609) 292-9900.

Sincerely,

Eric DeCicco

CHERRY HILL WOMEN'S CENTER
INFECTION PREVENTION AND CONTROL PROGRAM
REVISED 4/2018

The Infection Control Program includes ongoing surveillance, investigation, prevention, and control of infections and communicable diseases while adhering to safe practices for patients, employees, medical staff, and all other visitors. In addition, as a result of consideration and selection by Cherry Hill Women's Center's Infection Control Committee, the Infection Control and Prevention Program in this facility has been designed and implemented according to CDC (Centers for Disease Control and Prevention) guidelines, a major component of the Department of Health and Human Services. The facility also follows OSHA and AAMI guidelines. The goal is to identify and minimize the risks of acquiring and transmitting infections and communicable diseases among patients, employees, physicians and other licensed independent practitioners, contract workers, volunteers, students, and visitors. The Program is based on current scientific knowledge, accepted practice guidelines, and applicable law and regulation.

Key Functions of Plan:

- Providing a safe environment for all patients, including adequate safeguards to protect the patient from cross-infection by ensuring the provision of adequate space, equipment, supplies and personnel.
- Prevent, identify, minimize and manage infections and communicable diseases.
- Immediate implementation of corrective action and preventive measures that result in performance improvements.
- Development and implementation of infection control activities related to all CHWC personnel including but not limited to: medical staff, employees, any on-site contract workers (i.e. housekeepers, etc.) and others.
- Mitigation of risks associated with healthcare-associated infections (HAI's, which are the same as nosocomial infections evidenced by education and active surveillance).
- Monitoring compliance with all policies, procedures, protocols and other infection control program requirements
- Program evaluation and revision of the program by the Governing Body (annually and as indicated)
- Coordination as required by law with federal, state and local emergency preparedness and health authorities to address communicable and infectious disease threats and outbreaks
- Compliance with reportable disease requirements of the local, state and federal health authorities.

Structure of Infection Control Plan:
The Infection Control Program, which is governed by the facility's Quality Improvement Committee, Governing Body, and pertinent State and Local regulations, is responsible for

providing a plan of action for preventing, identifying and managing infections and communicable diseases as well as immediate implementation of corrective and preventive measures that result in improvement. This Program remains to be an integral part of the facility's quality assessment and performance improvement plan.

Infection Control Officer (Infection Preventionist):
The Infection Control Officer (Infection Preventionist), a designated, qualified healthcare professional who has training and current competence in infection control) is in charge of information gathering, coordination of the program, and education of the staff.

PROCEDURE:

I. Scope of Responsibility:
   - A. Written policies and procedures will be maintained defining all Program elements and infection control precautions required.
   - B. Written department-specific policies and procedures will be developed and implemented by department managers describing the departmental role in infection prevention and control activities. This shall be reviewed at least annually and revised as necessary.
   - C. Adherence to professionally accepted standards of practice, manufacturer recommendations, state and federal regulations including but not limited to: cleaning, disinfection and sterilization of instruments, equipment, supplies and implants.
   - D. Maintenance of a functional and sanitary environment for the provision of services.
   - E. Identifying infections
   - F. Mitigation of risks associated with patient infections present upon admission
   - G. A Sharps Injury prevention program shall be implemented and maintained.
   - H. Development of specific policies pertaining to housekeeping for patient care areas.
   - I. Ensuring that a process has been established for the isolation or immediate transfer of patients with communicable disease.
   - J. A safe environment for treating patients shall be provided with the implementation of safeguards to protect the patient from supplies and personnel for the provision of patient care.
   - K. A surveillance plan will be in place to monitor facility infections for unusual epidemics, clusters of infections, those due to unusual pathogens and any nosocomial infection rate that exceeds the usual baseline levels.
   - L. Active surveillance shall also be used to assess hand hygiene, safe injection practices and precautions used to minimize communicable disease exposure involving patients, employees, medical staff and others; ongoing education based on identified needs shall be provided.
   - M. Definitions will be provided for surgical site infections and other nosocomial infections* for surveillance purposes to provide for uniform identification and reporting of infections.

N. A Performance Improvement Plan for trending and tracking of pertinent data will be in place with recommendations and actions providing for re-evaluation after initiation of actions.

O. All Infection Control Program policies and procedures will be reviewed and evaluated at least annually by the Infection Control professional and revised as necessary to reflect new or modified tasks, procedures or regulations.

P. The facility will provide for necessary laboratory support, supplies/equipment to accomplish goals and policies/procedures of the Program.

Q. Appropriate education will be provided to all new employees and to all employees on an annual (and as needed basis). This education will include their role in the ICP, prevention and control activities; including, but not limited to, hand hygiene,, adherence to bloodborne pathogens standard and exposure control plan, evaluation of safer medical devices and tuberculosis.

R. The Exposure Control Plan shall remain in compliance with the OSHA Bloodborne Pathogen standard and shall be evaluated by the Governing Body on a yearly basis.

(*Infections that are a result of treatment in a hospital or other type of healthcare service provider. Infections are considered nosocomial if they first appear 48 hours or more after hospital or other type of healthcare facility admission or within 30 days after discharge. This type of infection is also known as a hospital-acquired infection or, in generic terms, healthcare-associated infection).

- All Nosocomial Infections shall be considered an occurrence and followed up through the established Infection Control Program process.

- The Medical Director shall be kept informed of all Nosocomial Infections.

- Corresponding, pertinent information shall be reported to the Patient Care Committee, Quality Improvement Committee and forwarded to the Governing Body for final review and follow-up discussions as needed.

II. Infection Control Reporting Procedures:

A. The Infection Control Program will consist of the Medical Director or designee, the Infection Control Officer, and representatives or persons available on, at least, a consulting basis, as needed, from various areas of the facility.. A physician shall be involved on a current and ongoing basis to assure the effectiveness of the Program.

B. The Infection Control Officer will provide at least quarterly, compiled nosocomial infection reports, including employee health reports and other pertinent facility issues; reports will include conclusions, recommendations and actions.

C. The Infection Control Officer will delegate actions of preventative and corrective programs or policies to minimize the spread of infection including education, interventions and studies.

D. The Infection Control Officer will review, revise and enforce infection control policies and procedures for all service areas.

E. The Infection Control Officer will monitor and provide advice concerning the employee health activities in the facility.

F. The Infection Control Officer will provide reports including conclusions, recommendations and actions to the medical staff through the Medical Director (where applicable), and Administrator, and finally to the Governing Body. This information will be made available as appropriate.

G. The Infection Control Officer has the authority, through the Infection Control Committee, to carry out the above functions and institute any appropriate control measures or studies when there is reasonably considerable danger to any patient or persons.

H. The Infection Control Officer will support and participate in the current facility performance improvement plans and activities.

III. Education:

A. A coordinated education plan will be in place regarding infection control in accordance with applicable State and Federal guidelines, as well as facility needs determined by the patient population, high risk, high volume events, new policies and procedures, and as deemed necessary by the Infection Control Officer.

IV. Orientation of employees will include at least:

A. Infection Control Program overview and role of employee in Program
B. Hand Hygiene practices
C. OSHA/Bloodborne Pathogens and Exposure Control Plan
D. Hazardous Communication
E. Tuberculosis Exposure Control Plan
F. Employee Health
G. Area-specific Infection Control Education by the corresponding Manager
H. Bio-Medical Waste Management
I. Review Risk Management Plan
J. Review Safety Plan

V. Annual education will include at least:

A. Hand Hygiene
B. OSHA/Bloodborne Pathogens (including Exposure Control Plan)
C. Review of Infection Control Plan
D. Review Risk Management Plan
E. Review of Safety Plan
F. Evaluation of Safer Medical Devices

G. Tuberculosis
H. Bio-Medical Waste management update

VI. Risk Reduction:

A. Annually (and as needed) the Infection Control Professional will conduct a risk assessment. This assessment will include but is not limited to:
   1. Communicable disease exposures
   2. Blood /body fluids exposures patient
   3. Blood/body fluids exposures staff
   4. Epidemic related to infections
   5. Isolation precautions
   6. Antibiotic resistant organisms of epidemiological significance
   7. Targeted surgical site infections
   8. Construction hazards
   9. Environmental rounds
   10. Hand Hygiene monitoring

B. This facility shall also utilize an Infection Control Surveyor Worksheet along with additional tools for self-assessment of various corresponding areas.

C. Reporting: The results of the above Risk Assessment and Infection Control Surveyor Worksheet shall be reported to the appropriate quality and medical leadership committees as well as the Governing Body for final review, discussion and determination of needed follow-up actions.

TRAVERSE DATA SHEET

THIS PAGE WILL SHOW A CFM (CUBIC FEET PER MINUTE) MEASUREMENT AT A PRECISE POINT IN THE DUCT SYSTEM. THIS MEASUREMENT IS USED FOR DETERMINING CAPACITY FOR BRANCHES, MAINS OR THE ENTIRE SYSTEM. FROM THIS POINT A DETERMINATION CAN BE MADE FOR TOTAL AIR (CFM) AVAILABLE DOWN STREAM OF THE READING TO BE BALANCED. IT CAN ALSO BE USED FOR A COMPARISON TO DETERMINE IF DUCT LEAKAGE OR AIR LOSS IS OCCURRING.
THE MEASUREMENTS WILL BE EITHER BY PITOT TUBE INSERTIONS IN THE DUCT SYSTEM OR BY FACE VELOCITY READINGS AT FILTER BANKS, COIL FACES ETC.

THE AIR SYSTEM THAT IS ASSOCIATED WITH THIS TRAVERSE = RTU-1

THE MODE OF AIR BEING TRAVERSED = (supply), return, outside air, mixed, exhaust, relief

THE LOCATION OF THIS TRAVERSE = Roof (intake)

THE AREA OF THE BUILDING THAT THIS TRAVERSE SERVES = RTU-1

THE CFM DESIGN FOR THIS TRAVERSE POINT = 225

THE ACTUAL CFM (VELOCITY X FREE AREA) AT THE TRAVERSE = 208

THE SIZE OF THE O.E.D. AT THIS TRAVERSE POINT = 28 X 14.25

THE FREE AREA (LENGTH X WIDTH DIVIDED BY 144) = 2.77

THE AVERAGE FPM (VELOCITY) AT THE TRAVERSE POINT = 75

THE STATIC PRESSURE AT THE TRAVERSE POINT = -0.004"

THE AIR TEMPERATURE AT THE TRAVERSE POINT = 71.0°F

INSTRUMENT USED= Velgrid

Plan Review Release Notification

Attention Jacqueline:

Thank you for using ePlans, the State of New Jersey's electronic plan review system.

Congratulations, drawings and/or specifications on Project **5013-18** have been issued a final release.

1. Please login to ProjectDox below to access the released drawings and documents. These can be found in the "Released" folder.
2. You may download and/or print the released documents for your use.

Project:	5013-18
-	Cherry Hill Womens Center /NJPRP-1893
Assigned by:	Susan Soffel
Online Plan Review System	

THIS NOTIFICATION IS NOT A CONSTRUCTION PERMIT

All prior approvals must be secured, all permit fees must be paid, and a construction permit must be applied for and issued before any work can be performed. Construction plans and specifications for the subject structure proposed to be built have been reviewed and released in conformance with the provisions of the Regulations for the New Jersey Uniform Construction Code, N.J.A.C. 5:23.

If you do not have access to the specified folder or have questions related to this plan review, please contact us at (609) 633-0800 or at planreviewintake@dca.nj.gov.

For any technical issues please contact the System Administrator at planreviewintake@dca.nj.gov.

This is an automated email notification and this email account is not monitored. Please do not reply to this email.

CHERRY HILL WOMEN'S CENTER
INFECTION CONTROL PROGRAM
REVISED 3-2010, Revised, 12-11

Cherry Hill Women's Center Infection Control Mission Statement:
Cherry Hill Women's Center (CHWC) is dedicated to giving high-quality patient care in a constantly changing field and environment. CHWC is always working on ways to improve in the area of patient care and infection control. Our mission is to promote a healthy and safe environment by preventing transmission of infectious agents among patients, staff and visitors. This will be accomplished in an efficient and cost-effective manner by the continual assessment and modification of our services based on regulations, standards, guidelines, scientific studies, and internal evaluations.

CHWC offers a variety of gynecological services and abortion care up to 24.6 weeks in a safe, kind, compassionate, and non-judgmental environment. CHWC believes that every patient (woman) has the right to make decisions about her healthcare and well-being based on her beliefs, experiences and circumstances; and that this decision should be done in a private, compassionate, dignified, and safe manner. CHWC is dedicated to providing these services even under the unique position of dealing with protestor activity by people with opposing views on this very controversial topic. CHWC sees beyond the controversy and strives to understand the heart of a woman as she makes this decision. . CHWC is here to see that every woman seeking an abortion has the right to quality healthcare in an environment that offers support, guidance and options to women in need.

In an effort to exceed these standards of quality service CHWC has agreements in place with a Sterilization/Decontamination Consultant as well as an Infection Control Consultant. Each consultant meets with CHWC at least annually, or as needed, to review all policies and procedures, ensure staff and physicians are adhering to the written policies, and advise CHWC on any new rules, regulations, or requirements in compliance with AAMI, OSHA, and current CDC guidelines.

The program includes written policies for Hazard Communication, Exposure Control Plan, Communicable Disease Reporting to the Department of Health, Hand washing, Housekeeping, Linens, Record Keeping, OSHA and Regulated Medical Waste. These policies will all be reviewed, updated and revised annually.

Cherry Hill Women's Center Tracking/Monitoring System:
The tracking system is designed to track any and all patterns, issues, and complications. It is to be used as a teaching tool for staff, physicians, Administration and Governing Body. It is also a useful tool to help in revisions or implementation of new procedures based on findings. Some of the tracking forms included but are not limited to:
Complication Tracking Form
Hotline Tracking Form
Ineligible Patient Log

Sterilization Tracking Log
Environmental Log
Housekeeping Logs
Medical Record Review Form
Physician Peer Review Form
Hand washing Form

GOALS AND OBJECTIVES:

Cherry Hill Women's Center's ongoing goals are to ensure patients are cared for and safely treated according to our written protocols and guidelines for staff, doctors, patients and visitors. CHWC will review the following topics in relation to abortion care to ensure our systems, policies and practices are being adhered to.

CHWC will start in the area of sterilization and decontamination. CHWC will ensure that all packs, peels, and instruments are clearly labeled, initialed, dated, etc. We will conduct biological indicators to ensure the sterilization process is functioning according to manufacturer's instructions. This will ensure the sterilization of all instruments is at optimum performance for patient care and safety. This will be monitored and checked weekly until we reach the desired outcome and then changed to a quarterly basis. The Director of Nursing and/or designee will randomly supervise the sterile technician once d a month to ensure his/her testing is meeting with CHWC, state, and federal standards, and he/she is maintaining the sterility and environment set forth by CHWC. These monthly reports will be given to the Administrator on a quarterly basis; or as needed, to discuss and review. The Administrator is responsible for reviewing this with the Governing Body quarterly.

Another goal and objective for CHWC is to ensure our SOP for hand washing is being adhered to and monitored for all staff, physicians and visitors. This will be done monthly by the Director of Nursing and/or designee and the reports will be given to the Administrator on a quarterly basis. The Administrator will then be responsible for supplying the Governing Body with our findings on sterility and decontamination on a quarterly basis. Topics will be chosen as each goal is met to our satisfaction.

CHWC's other goal and objective is a challenge as CHWC is a small ASC performing surgery five days a week. We seek to incorporate staff in our QI and Infection Control. We are aware that we have such a tremendous impact on so many women's lives; and the input and ideas from staff are welcomed and encouraged. We plan on selecting topics for staff to become involved in and educate other staff members and the community. As we know the community to which we serve is very diverse and we see an overwhelming amount of women living in poverty who can benefit from education. Some examples include birth control, smoking during pregnancy, malignant hyperthermia, drug use and risk factors during pregnancy and abortion care.

In addition, to the topics above CHWC will also maintain:

Employee Health Records
Inform and Educate staff on Communicable Diseases as well as reporting to DOH
Track and log any and all infections/Fevers
Maintain policy on Handwashing
Maintain all logs for temperature and humidity control
Maintain a log on environmental issues
Maintain an ongoing monthly checklist and review with housekeeping
Traffic patterns
Proper attire
Patient Records and maintenance

Annually CHWC will present the surveillance gathered to the Infection Control committee for review and discussion. Our Infection Control Committee meets quarterly, where most of the information gathered weekly and submitted monthly to the Administrator will be brought for review. The Infection Control Consultant is required to attend one of our quarterly meetings in addition to her annual facility walkthrough and policy and procedure check. Yearly tracking information will also be given the Governing Body for review and discussion. The goals and objectives for the year will be brought to the committee with our tracking system and documents to support the findings. At the final quarter, new objectives and goals will be set for the following year to ensure growth and care for the patients, staff, physicians and facility.

CHWC QI and Infection Control Program is an integral part in the care and safety we provide to patients, staff and visitors. These programs will be constantly monitored, tracked and revised as medicine changes, state and federal requirements change, our own findings change and as we change and grown within our own organization.

Cherry Hill Women's Center
Policy and Procedure Manual

Policy: Temperature, Air Flow and Humidity Levels	Date Effective: 8/22/2011 Date Revised/Reviewed: 1/23/12, 6/19/12
Approved By: Administrator	File Under: Sterilization Folder

POLICY: Temperature and humidity levels shall be monitored daily whenever the facility is open to ensure compliance with recommended environmental conditions. Air flow should be verified if there are issues with compliance.

PROCEDURE:

1. The Decontamination Area requires the following:
   Temperature of 60-65°F
   Humidity – 30-60%
   Air flow – 10 air exchanges per hour under **negative pressure.** This air is not to be re-circulated.

2. The Prep/Packaging/Sterilization area requires the following:

   Temperature of 68-73°F
   Humidity – 35-60% (NOTE: While AAMI states 30-60%, the **ideal humidity for the prep/packaging area is 50% with a minimum of 35%. These levels will prevent dehydration of packaging materials which can interfere with steam sterilization.**
   Air flow – 10 air exchanges per hour under positive pressure. This air can be re-circulated.

3. Each day the facility is open, the sterile processing staff is required to document the temperature and humidity in the Decontamination and Prep/Packaging/Sterilization areas in note books kept in each area (separate books for Decontam ,Prep/Pkg/Sterilization, and Sterile Storage).

4. Any variance from the above norms should immediately be reported to the Head Nurse or facility Administrator for corrective action.

5. The action taken should be documented in the log book.

TITLE: Temperature, Humidity and Air Flow Requirements for the Processing Areas

REVISED: 8/22/11

Americans United for Life

CHERRY HILL WOMEN'S CENTER
DEPARTMENT OF ANESTHESIA
POLICY AND PROCEDURES

B. Operating Rooms

- The operating rooms are to allow for clean air exchange at a rate of twenty times per hour with a temperature range of 68 to 76 degrees F with a relative humidity of 30% -60% based on CDC recommendations.
- All general OR rooms are equipped with piped oxygen which is indexed specifically of O2 lines. In the GAS STORAGE AREA outside the OR near the EMERGENCY EXIT is a valve, which is labeled and controls the oxygen flow to that specific operating room this valve is to be turned off.
- Oxygen gauges for the flow and volume are located in the FRONT OFFICE RECEPTION AREA. These gauges are quipped with visual and audible alarms to indicate a low reserve of liquid oxygen. The alarms are set to sound when the reserve falls to a specific level. O2 tanks are checked daily, prior to the start of surgery. In addition, we have a back -up tank reserve of six cylinders; type E, in the event that the oxygen supply is completely depleted.

C. Fire

- A fire hazard manual is located in the Department of Anesthesia and reviewed by all personnel. In the event of a fire occurring in the general surgical area, all doors to the operating room are closed and no personnel are allowed to move in or out without special permission, Generally speaking, no change in the regular operating schedule occurs, however, no new operative procedures are begun until an all-clear is sounded. In the event that we are notified of a serious problem, attempts should be made to terminate any operative procedures as soon as safely possible.

D. Electrical Equipment

- All electrical anesthetic equipment must be properly grounded and checked for safety by biomedical engineers prior to its use/operation in the operating room. The line isolation monitor should immediately indicate any electrical leakage defects of the equipment while in use in the operating area, This will be discussed at greater length further on in the manual. The equipment is periodically checked for proper functioning, grounding and leakage. Also defibrillator equipment is checked by the biomedical engineers to insure function and determine adequate output. The condition of all electrical used by the Department of Anesthesia is inspected periodically and written records are kept on fine in the administrator's office.

WHEN DEFECT IN THE ELECTRICAL EQUIPMENT IS DISCOVEREDM THE ITEM IS TO BE IMMEDIATELY DISCONNECTEDM REMOVED FROM THE OPERATING ROOM AREA, LABELED AS TO DEFECTM AND REPORTED FOR REPAIRS.

E. Anesthetic Machines

1. the anesthesia machines are standardized and equipped with required safety features such as pressure gauges, as well as flow meter and inhalation/exhalation valves. In addition, the anesthesia machines are equipped with the following:

- Pin Index System
- Oxygen Analyzers e.g. Pulse oxymeter
- Oxygen tanks with at least one being full
- EKG monitor
- Ct CO_2 monitor

Rationale: Items with torn or wet packaging are considered contaminated. Wet packaging might indicate problems with package composition, loading procedures, sterilizer performance or operation, or the steam generation and distribution system.

8.9 Sterile storage

8.9.1 Sterility maintenance covers

Sterility maintenance covers (dust covers) may be used to protect and extend the shelf life of properly packaged and sterilized items that could be subjected to environmental challenges or multiple handling before use. Only products specifically labeled as sterility maintenance covers should be used for this purpose. A sterility maintenance cover or dust cover should be clearly designated as such to prevent its being mistaken for a sterile wrap. Sterility maintenance covers are designed to provide protection against outside elements (e.g., dust), not to provide a microbiological barrier. If sterility maintenance covers are to be applied to sterilized packages, they should be applied as soon as possible after sterilization, but not before the items are thoroughly cool and dry. Sterilized packages should be handled as little as possible.

The sterility maintenance cover is sealed using either a heat sealer designed to seal plastic to plastic or an alternative method that is similarly effective; a self-sealing cover also may be used. The lot or load control number and expiration statement should be visible through the sterility maintenance cover, or an additional label should be used on the sterility maintenance cover. (See also 10.3.)

Rationale: Plastic provides a barrier to moisture and dust; this barrier might be necessary to preserve the sterile integrity of the package, especially one that is not going to be used immediately or that will be subjected to uncontrolled environments (e.g., during transport between facilities). Because a sterility maintenance cover is applied after sterilization, the outer surface of the actual packaging material should be considered contaminated for purposes of sterile presentation.

Applying sterility maintenance covers soon after sterilization enhances sterility maintenance. However, placing a sterility maintenance cover on a package that is not cool and dry could result in condensation inside the sterility maintenance cover and, because the sterility maintenance cover is not sterile, contaminate the package contents. To be an effective barrier, the sterility maintenance cover has to be sealed. The sterility maintenance cover is only a protective device; the identity and traceability of the package within has to be maintained.

8.9.2 Storage facilities

Sterile items should be stored in a manner that reduces the potential for contamination. In general, the temperature in storage areas should be approximately 24°C (75°F). There should be at least 4 air exchanges per hour, and relative humidity should be controlled so that it does not exceed 70% (AIA, 2006). Traffic should be controlled to limit access to sterile items to those individuals who know how to handle them properly. Sterile items should be stored far enough away from the floor, the ceiling, and outside walls to allow for adequate air circulation, ease of cleaning, and compliance with local fire codes. Sterile items should be stored at least 8 to 10 inches above the floor, at least 18 inches below the ceiling or the level of the sprinkler heads, and at least 2 inches from outside walls. The items should be positioned so that packaging is not crushed, bent, compressed, or punctured and so that their sterility is not otherwise compromised. Medical and surgical items, including those packaged in rigid sterilization container systems, should not be stored next to or under sinks, under exposed water or sewer pipes, or in any location where they could become wet. Supplies should not be stored on floors, on windowsills, or in areas other than designated shelving, counters, or carts. Heavy instrument trays should be stored on middle shelves (but not stacked) for ease of handling by staff; transport trays with solid or perforated bottoms may be used to prevent tears in wrappers during handling. (See also 3.3.7.4.)

Closed or covered cabinets are recommended for the storage of seldom-used supplies. Open shelving may be used, but requires special attention to traffic control, area ventilation, and housekeeping. Shelving or carts used for sterile storage should be maintained in a clean and dry condition. For sterile and clean supplies stored on the bottom shelf of an open-shelf (wire) cart, there should be a physical barrier between the shelf and traffic or housekeeping activities. Outside shipping containers and corrugated cartons should not be used as containers in sterile storage areas. (See also 5.2.1.)

Shelving or racks used for the storage of rigid sterilization container systems should be designed for the weight and configuration of the containers. The racks or shelves should be kept clean and dry in a controlled environment. When stacking container systems, the user should take care to ensure that they are firmly seated one upon another and that they can be removed easily. Written policies and procedures for the storage, handling, rotation, and labeling of container systems should be developed and enforced.

Dear Ms. Groves:

Thank you for the courtesy and cooperation extended during the Approval Survey conducted September 26, 2018 by surveyors from the New Jersey Department of Health.

Enclosed is a copy of them State Deficiency Form indicating that no deficiencies were found during the survey. Please sign the first page of the State Deficiency Form and return the original copy to my attention. It is important to return the form promptly to this office.

If you have questions concerning this letter, please do not hesitate to contact me at (609) 292-9900.

Sincerely,

AMBULATORY SURGICAL CENTER REQUEST FOR CERTIFICATION IN THE MEDICARE PROGRAM

(Please see statement on reverse and read the following instructions before completing this form)

Submission of this form will initiate the process of obtaining a decision as to whether the Conditions of Coverage are met. Assistance in completing the form is available from the State agency.

Answer all questions as of the currrent date. Return the original and first two copies to the State agency; retain the last copy for your files. If a return envelope is not provided, the name and address of the State agency may be obtained from the nearest Social Security Office.

Detailed instructions are given for questions other than those considered self-explanatory.

Medicare Supplier Number - Insert the facility's six-digit supplier number. Leave blank on initial requests for certification.

Related Provider Number - Complete this block when a facility is participating under more than one provider number, such as a facility also participating as a hospital. The number in this block for each related provider will be the provider number of the highest level of care.

NOTE: If an ASC is operated by a hospital, has a Distinct Part SNF, ICF and ICF/MR, the related provider number field on the application for each provider (including the hospital) will have the hospital provider number.

State/County and State Region Codes - Leave blank. The Centers for Medicare & Medicaid Services Regional Office will complete.

Item III - If a service is provided directly by the facility, place a '1' in the appropriate block. If a service is provided through an outside source (i.e., by contract or referral), place a '2' in the appropriate block.

Item IV - 'X' the appropriate blocks representing categories of surgery offered by the ASC. Under "Other," include only broad categories (i.e., not subspecialties).

Q 080	416.43 QUALITY ASSESSMENT & PERFORMANCE IMPROVEMENT The ASC must develop, implement and maintain an on-going, data-driven quality assessment and performance improvement (QAPI) program. This CONDITION is not met as evidenced by: Surveyor: 11609 Based on a review of information provided, lack of evidence and staff interview, it was determined that the ASC failed to implement and maintain an on-going, data-driven quality assessment and performance improvement (QAPI) program. Findings include: 1. The facility failed to develop an ongoing program of quality improvement that measures , analyzes, and tracks quality indicators, adverse patient events, and infection control outcomes. (Cross refer Q 81) 2. The facility failed to formulate a Quality Assurance Program that established indicators, monitors effectiveness and safety of services, track adverse events and implement	Q 080

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

Dear Ms. Nardo:

Thank you for the courtesy and cooperation extended during the Federal revisit survey of your facility on June 18, 2010 by surveyors from the Department of Health and Senior Services.

Enclosed is the CMS-2567B form which indicates that the Federal deficiencies, identified during the survey of February 8, 2010, were corrected.

Should you have questions, please do not hesitate to contact S. Lynn Sked, Supervising Health Care Evaluator, at (609) 292-9900.

Sincerely,

Christine Muszynski BSN, RN

Jenifer Groves / Administrator	Not Valid

When this form is utilized for a survey, the following needs to be addressed:
This survey was reviewed with the Administrator or his/her authorized representative at the conclusion of the survey. He/she was advised of the areas where standards were not met in violation with the rules and regulations promulgated under the authority of N.J.S.A. 26:2H-5(b). He/she was further advised that it was necessary to correct conditions which do not meet the standards and that failure to correct those deficiencies may result in a fine of up to $5,000.00 per violation per day in accordance with N.J.S.A. 26:2H-14 as amended. Refusal to sign does not negate the facility's responsibility to correct deficiencies.

NARRATIVE

An unannounced visit was made to this facility to investigate a complaint. The complaint was discussed with facility representative (s). The investigation included review of documentation and staff interviews. Preliminary concerns regarding the investigation were discussed with the facility representative (s). After supervisory review, deficiencies may follow.

Complaint # NJ00075219

[redacted]

A representative from Health Facility and Field Operations conducted an investigation of your complaint concerning quality of care issues at Cherry Hill Womens Center. The South Jersey Womens Center was not investigated. It is a registered facility; it is not licensed by the New Jersey Department of Health. Therefore, Health Facility and Field Operations has no jurisdiction over the South Jersey Womens Center.

The investigation of Cherry Hill Womens Center included a review of facility documents and staff interview.

After evaluating this information, the surveyor was unable to identify a citable deficient practice related to your concerns based on State regulations. The results of this investigation were presented to and reviewed with administrative staff for continued monitoring of patient care.

Thank you for forwarding your concerns to this office.

RE: Revised Clarification of Curtailment of All Surgical Procedures Issued on December 7, 2017 and Lifted on December 8, 2017
Facility ID# NJ310001113

Dear Ms. Groves,

This revised letter clarifies the reason for the curtailment of all surgical procedures that was imposed on December 7, 2017 and lifted on December 8, 2017, and replaces and supersedes the letter dated December 18, 2017. The curtailment was imposed on December 7, 2017 when surveyors from Health Facilities Survey and Field Operations ("Survey"), conducting a State re-licensure and re-certification survey, identified a serious infection control issue due to the lack of on-site availability of equipment sterilization manuals. The next day, Survey found that the facility had corrected this deficiency, and therefore the curtailment was lifted on the morning of December 8, 2017.

Please call (609) 984-8128 if you have any questions regarding this clarification of the curtailment imposed on December 7, 2017 and lifted on December 8, 2017.

Sincerely,

Gene Rosenblum, Director

RE: Lifting of Curtailment of All Surgical Procedures Facility ID# NJ310001113

Dear Ms. Groves,

As you were advised today by telephone by members of my staff in the Office of Program Compliance, the Department has lifted the curtailment of all surgical procedures that was imposed by Health Facilities Survey and Field Operations during a State Licensure Survey on December 7, 2017. The curtailment was imposed due to the lack of on-site availability of equipment sterilization manuals.

The curtailment is lifted effective immediately. This action is taken based on a recommendation from Health Facilities Survey and Field Operations and is based on receipt and implementation of an acceptable Plan of Correction.

Please call (609) 984-8128 if you have any questions regarding the lifting of the curtailment.

Sincerely,

Gene Rosenblum, Director
Program Compliance and Health Care Financing
Division of Certificate of Need and Licensing

RE: Curtailment of All Surgical Procedures Facility ID# NJ310001113

Dear Ms. Groves,

This will confirm that an order to curtail all surgery procedures was issued by Health Facilities Survey and Field Operations during a State Licensure Survey on December 7, 2017.

This action is taken in accordance with N.J.A.C. 8:43E-2.4, N.J.A.C. 8:43E-3.6, N.J.S.A. 26:2H-13 and N.J.S.A. 26:2H-14, in response to serious infection control issues identified during a state licensure survey on December 7, 2017.

Specifically, the curtailment applies to all surgical procedures. Please be advised that only after the Department receives confirmation from the Health Facility Survey and Field Operations staff that the facility has provided an acceptable Plan of Correction will the Department consider lifting the surgical procedures curtailment.

FORMAL HEARING

Cherry Hill Women's Center, is entitled to a prompt formal hearing at the Office of Administrative Law (OAL) to challenge this curtailment pursuant to N.J.S.A. 26:2H-13. Cherry Hill Women's Center, may request a hearing to challenge either the factual survey findings or the curtailment, or both. Please note that facility rights to IDR (Informal Dispute Resolution) and administrative law hearings are not mutually exclusive and both may be invoked simultaneously.

Cherry Hill Women's Center, must advise this Department within 30 days of receipt of this letter to request an OAL hearing regarding this matter.

Please forward your OAL hearing request to:

Attention: OAL Hearing Requests

Office of Legal and Regulatory Compliance, Room 805
New Jersey State Department of Health
P.O. Box 360
Trenton, New Jersey 08625-0360

Corporations are not permitted to represent themselves in OAL proceedings. Therefore, if Cherry Hill Women's Center, is owned by a corporation, representation by counsel is required.

In the event of an OAL hearing regarding this matter, Cherry Hill Womens Center, is further required to submit a written response to each and every charge as specified in this order, which shall accompany your written request for a hearing.

In addition, N.J.A.C. 8:43E-3.4(a)2 provides for a penalty of $250 per day for each patient admitted in violation of this curtailment order.

Please call at (609) 633-9034 if you have any questions regarding this curtailment.

Sincerely,

Gene Rosenblum, Director
Office of Program Compliance
Certificate of Need and Licensing

OMB NO 0938-0266

(Please see statement on reverse and read the following instructions before completing this form)

Submission of this form will initiate the process of obtaining a decision as to whether the Conditions of Coverage are met. Assistance in completing the form is available from the State agency.

Answer all questions as of the currrent date. Return the original and first two copies to the State agency; retain the last copy for your files. If a return envelope is not provided, the name and address of the State agency may be obtained from the nearest Social Security Office.

Detailed instructions are given for questions other than those considered self-explanatory.

Medicare Supplier Number - Insert the facility's six-digit supplier number. Leave blank on initial requests for certification.

Related Provider Number - Complete this block when a facility is participating under more than one provider number, such as a facility also participating as a hospital. The number in this block for each related provider will be the provider number of the highest level of care.

NOTE: If an ASC is operated by a hospital, has a Distinct Part SNF, ICF and ICF/MR, the related provided number field on the application for each provider (including the hospital) will have the hospital provider number.

State/County and State Region Codes - Leave blank. The Centers for Medicare & Medicaid Services Regional Office will complete.

Item III - If a service is provided directly by the facility, place a '1' in the appropriate block. If a service is provided through an outside source (i.e., by contract or referral), place a '2' in the appropriate block.

Item IV - 'X' the appropriate blocks representing categories of surgery offered by the ASC. Under "Other," include only broad categories (i.e., not subspecialties).

Dear Ms. Martinelli:

Thank you for the courtesy and cooperation extended during the Federal revisit survey of your facility on June 9, 2011 by surveyors from the Department of Health and Senior Services.

Enclosed is the CMS-2567B form which indicates that the Federal deficiencies, identified during the survey of January 25, 2011 were corrected.

Should you have questions, please do not hesitate to contact Christine Muszynski, Supervisor of Inspections, at (609) 292-9900.

Sincerely,

Louise A. Steska

Englewood, NJ 07631

Dear Ms. Martinelli:

Thank you for the courtesy and cooperation extended during the Federal Health Survey of your facility on January 20 , 2011 and January 25, 2011 by surveyors from the Department of Health and Senior Services.

As a result of observation and evaluation certain Federal deficiencies were evident. The deficiencies identified during this visit have resulted in the determination that your facility is not in compliance with the following Medicare Condition for Coverage:

416.50 Patient Rights.

A complete listing of the specific deficiencies identified by the surveyors is enclosed. These Federal deficiencies were discussed with you and/or your staff during the visit and are listed on the left side of the enclosed CMS-2567 form. Please reply to each deficiency, on an item by item basis, with your Plan of Correction (PoC) and the date you expect the correction to be completed.

The PoC should address the systemic problem that resulted in the deficiency. Please number your responses to correspond with the number of each deficiency statement.

The PoC must include:

1. How the corrective action will be accomplished for those patients found to have been affected by the deficient practice.

2. How the facility will identify other patients having the potential to be affected by the same deficient practice.

3. What measures or systemic changes will be instituted to ensure that the deficient practice will not recur.

4. How the facility will monitor its corrective action to ensure that the deficient practice is being corrected and will not recur, i.e., what program will be put into place to monitor the continued effectiveness of the systemic changes.

   The plan must identify the individual responsible for monitoring, how and when the monioring will be conducted, and to whom the results will be reported.

5. The date on which each item addressed on the PoC will be corrected.

Please submit the PoC to the Department of Health and Senior Services Health Facilities Evaluation and Licensing, 120 South Stockton Street, Trenton, NJ 08611.

Sign and date the first page of the CMS-2567 form and return the form with your PoC to the attention of Christine Muszynski, Supervisor of Inspections. Please retain a copy of each page for your records. All responses must be returned within 10 calendar days of receipt of this letter.

It is important to return the completed forms promptly. Any delay or lack of response may jeopardize the certification status of your facility. If you have any questions concerning this report, please contact Christine Muszynski at (609) 292-9900.

Sincerely,

Christine Muszynski BSN, RN

Q 103	416.44(a)(3) IDENTIFICATION, PREVENTION, AND MAINTENANCE [The ASC must provide a functional and sanitary environment for the provision of surgical services.] The ASC must establish a program for identifying and preventing infections, maintaining a sanitary environment, and reporting the results to appropriate authorities. This STANDARD is not met as evidenced by: Based on staff interview and a review of documents on 1/20/11, it was determined that the facility failed to follow up on each patient after discharge, in order to identify and track infections associated with the patient's stay in the ASC. Findings include: 1. When asked on 1/20/11 at 11:08 AM, about how the facility monitors and tracks patient infections, Staff #8 stated the following: "Not all of the patients have primary physicians, but if the patient returns to the facility for their two week follow up visit, the facility staff will complete an infection control survey form. If the patient has a primary physician, a letter is sent to the physician asking about infections. A general letter (but not a list of patients seen) is also sent to Planned Parenthood every six months."	Q 103

Q 162	Continued From page 5 each patient. Every record must be accurate, legible, and promptly completed. Medical records must include at least the following: (1) Patient identification. (2) Significant medical history and results of physical examination. (3) Pre-operative diagnostic studies (entered before surgery), if performed. (4) Findings and techniques of the operation, including a pathologist's report on all tissues removed during surgery, except those exempted by the governing body. (5) Any allergies and abnormal drug reactions. (6) Entries related to anesthesia administration. (7) Documentation of properly executed informed patient consent. (8) Discharge diagnosis. This STANDARD is not met as evidenced by: A. Based on a review of the medical records of three patients (#1, #2, and #19) who underwent a surgical procedure at the facility it was determined that a properly executed informed patient consent was not obtained prior to the performance of the surgery. Findings include: 1. Review of an INFORMED CONSENT FOR CERVICAL DILATORS (SAME DAY) form dated [redacted] in the medical record of Patient #2 indicated that the 'Patient signature' section did not contain the signature of the patient. The form did not have a section to indicate the name or signature of the physican who obtained the informed consent. The only other signature line	Q 162		

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER:	(X2) MULTIPLE CONSTRUCTION	(X3) DATE SURVEY COMPLETED

Q 162	Continued From page 6 on the form is for 'Witness signature." A dilator was used on the patient even though there was no documentation that she consented. 2. Review of INFORMED CONSENT FOR CERVICAL DILATORS (SAME DAY) forms in the medical records of Patient #1 and #19 did not indicate that a physician obtained informed consent. 3. Administrator #1, on the morning of January 20, 2011, stated that consent should have been obtained by the facility counselor. She further indicated that the counselor was not a physican. The 'counselor' was not qualified to obtain informed consent for use of a medical device. B. Based on a review of the medical records of five patients it was determined that not all medical records included patient identification. Findings include: 1. Review of two ENGLEWOOD PHYSICAN'S GROUP assessment forms, one dated [redacted] and one dated [redacted] in the medical record of Patient #19 did not include the name of the patient on the form. The 'NAME (Patient's)' section at the top of the form did not indicate an entry. Additionally, an INFORMED CONSENT FOR CERVICAL DILATORS (SAME DAY) form dated [redacted] did not contain the name of the patient. 2. Review of the medical records of Patients #1, #15, #16, and #19 indicated 'Size Check Sheets.' None of the completed forms indicated the names of the patients.	Q 162		

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER:	(X2) MULTIPLE CONSTRUCTION	(X3) DATE SURVEY COMPLETED

Q 162	Continued From page 7 3. Not all of the pages in each medical record indicated at least one patient identifyer on each page. If a sheet without a patient identifyer were to become seperated from the medical record cover, it would be difficult, if not impossible, to determine which patient's medical record it belonged in. C. Based on observation on [redacted] a review of documents, and medical record review of #20, it was determined that the facility failed to ensure an accurate medical record. Findings include: Reference: The facility policy titled, "Informed Consent Policy," states "...The evaluating physician, treating physician and counselor together shall obtain appropriate informed consent from patients...before starting any treatment or activity that presents a risk to the patient's health or safety...Treatments and activities requiring informed consent include...Anesthesia...All operative procedures...Non-surgical Abortion..." 1. On [redacted], this surveyor followed Patient #20 throughout her stay at the ASC. a. Medical record #20 contains a document titled, "Counseling," which contains check marks in boxes next to the words, "The available methods anesthesia (sic) and their risks and benefits have been reviewed," and "Birth Control Methods have been reviewed". This document is signed by Staff #12.	Q 162

Q 162	Continued From page 8 (i) On [redacted] Patient #20 met with Staff #12, the facility counselor. During this meeting, Staff #12 gave Patient #20 the facility "Consent for Termination of Pregnancy and Anesthesia" to sign. This consent includes risks of anesthesia and the procedure. However, Staff #12 failed to review the available methods of anesthesia and their risks and benefits and failed to review birth control methods with Patient #20. b. The "Consent for Termination of Pregnancy and Anesthesia" in medical record #20 dated [redacted] contains signatures on the lines titled, "Evaluating Physician," and "Treating Physician." However, the evaluating physician and the treating physician failed to inform Patient #20 of the anesthesia risks and benefits or the risks and benefits of the surgical procedure, prior to the procedure on 1/20/11 at 1:30 PM.	Q 162		
Q 181	416.48(a) ADMINISTRATION OF DRUGS Drugs must be prepared and administered according to established policies and acceptable standards of practice. This STANDARD is not met as evidenced by: Based on a review of medical records and staff interview, it was determined that the facility failed to ensure that a physician order was in place to discontinue the intravenous solution and/or the hep lock from the patient. Findings include: 1. In 20 of 20 medical records reviewed on	Q 181

Q 181	Continued From page 9 1/20/11 and 1/25/11, there was no evidence that a physician order was written to discontinue the intravenous and / or hep lock from the patient. 2. This was confirmed by Staff #9 and Staff #15.	Q 181		
Q 220	416.50 PATIENT RIGHTS The ASC must inform the patient or the patient's representative of the patient's rights, and must protect and promote the exercise of such rights. This CONDITION is not met as evidenced by: Based on observation, document review, patient interview and medical record review, it was determined that the facility failed to promote and exercise patient rights. Findings include: 1. The facility failed to provide patients with verbal and written notice of the facility's patient rights, in advance of the date of the procedure. (Cross refer Q221). 2. The facility failed to provide patients with disclosure of information in writing regarding physician financial interests or ownership in the ASC, in advance of the date of the procedure. (Cross refer Q223). 3. The facility failed to provide patients with information concerning its policies on advance directives, including a description of applicable State health and safety laws, in advance of the date of the procedure. (Cross refer Q224). 4. The facility failed to fully inform patients about treatment options and failed to ensure that	Q 220

Q 223	Continued From page 12 A. Based on observation and patient interview on [redacted] it was determined that the facility failed to provide Patient #20 with disclosure of information in writing regarding physician financial interests or ownership in the ASC, in advance of the date of the procedure. Findings include: On [redacted], Patient #20 stated that she did not receive a copy of the facility's disclosure of information in writing regarding physician financial interests or ownership in the ASC prior to the visit scheduled for [redacted] While the facility counselor, Staff #12 interviewed Patient #20 on [redacted], Staff #12 advised Patient #20 of the physician ownership of the ASC, just prior to Patient #20's procedure on [redacted], rather than in advance of the date of the procedure. B. Based on medical record review and staff interview, it was determined that the facility failed to provide the patients with disclosure of information in writing regarding physician financial interests or ownership in the ASC, in advance of the date of the procedure. Findings include: 1. On 1/20/11 and 1/25/11, during a review of medical records #1 through #19, the facility was unable to provide evidence that the patients received disclosure of information in writing regarding physician financial interests or ownership in the ASC, in advance of the date of the procedure. 2. This was confirmed by Staff #15.	Q 223

Q 224	416.50(a)(2) ADVANCE DIRECTIVES The ASC must comply with the following requirements: (i) Provide the patient or, as appropriate, the patient's representative in advance of the date of the procedure, with information concerning its policies on advance directives, including a description of applicable State health and safety laws, and, if requested, official State advance directive forms. (ii) Inform the patient or, as appropriate, the patient's representative of the patient's rights to make informed decisions regarding the patient's care. (iii) Document in a prominent part of the patient's current medical record, whether or not the individual has executed an advance directive. This STANDARD is not met as evidenced by: A. Based on observation and patient interview on [redacted] it was determined that the facility failed to provide Patient #20 with information concerning its policies on advance directives, including a description of applicable State health and safety laws, in advance of the date of the procedure. Findings include: On [redacted] Patient #20 stated that she did not receive information about the facility's policies on advance directives prior to the visit scheduled for [redacted]. While the facility counselor, Staff #12 interviewed Patient #20 on [redacted], Staff #12 asked Patient #20 about a "Living Will" just prior to Patient #20's procedure on [redacted] rather than in advance of the date of the procedure. Q 232	Continued From page 16 Based on document review and observation on [redacted], it was determined that Patient #20 did not receive care in a safe setting. Findings include: Reference: The facility, "Protocol for Stocking of OR/PACU Supply Storage Closets," states, ". . .Medical assistants are responsible for maintaining adequate stock in the supply storage closets. . .After restocking, the medical assistant will sign and date the supply storage sheet (see attached). . . ." 1. On [redacted], Patient #20, while in the facility recovery room, stated to Staff #13 that she was "feeling sick." Staff #13 gave Patient #20 a garbage can, that was sitting on the floor next to the stretcher, to use as an emesis basin. There were no emesis basins available in the recovery room area on [redacted]. Providing a trash can rather than an emesis basin did not provide for the patient's emotional health and safety, of which respect and dignity are components. 2. The supply storage sheet, mentioned in the Referece above, failed to contain emesis basins, which Patient #20 required, as a supply to keep in the Supply Storage Closet.	Q 232		
Q 242	416.51(b) INFECTION CONTROL PROGRAM The ASC must maintain an ongoing program designed to prevent, control, and investigate infections and communicable diseases. In addition, the infection control and prevent program must include documentation that the ASC has considered, selected, and implemented nationally recognized infection control guidelines.	Q 242

Q 242	Continued From page 17 nationally recognized infection control guidelines. This STANDARD is not met as evidenced by: A. Based on observation, staff interview and a review of documents on 1/20/11, it was determined that the facility failed to implement infection control policies and failed to maintain an infection control program that follows up on each patient after discharge, in order to identify and investigate infections associated with the patient's stay in the ASC. Findings include: 1. Staff #8 stated on 1/20/11 that the facility follows CDC (Centers for Disease Control) for infection control policies. Reference #1: The CDC "MMWR October 25, 2002 Guideline for Hand Hygiene in Health-Care Settings" states "...When washing hands with soap and water, wet hands first with water, apply an amount of product recommended by the manufacturer to hands, and rub hands together vigorously for at least 15 seconds, covering all surfaces of the hands and fingers..." Reference #2: The facility policy titled, "Bloodborne Pathogen Exposure Control Plan," states "...All personnel participating in direct patient care practices must wash hands for 10 seconds before and after patient contact regardless of the use of gloves..." Reference #3: The facility policy titled, "Hand Hygiene," states "...Wash hands thoroughly and effectively with running water and soap...Using	Q 242

Q 242	Continued From page 18 friction on front and back of hands and between fingers scrub for'10-15 seconds...Wash hands with soap and water...When hands are visibly dirty or contaminated with proteinaceous material or are visibly soiled with blood or other bodily fluids..." 1. The facility policies in References #2 and #3 above fail to follow the CDC recommendation of washing hands for 15 seconds with soap and water. 2. On [redacted] Staff #10, while wearing gloves, was observed in the facility examination room, performing a vaginal examination of Patient #20. After removing his/her gloves, Staff #10 did not wash his/her hands and, then, without donning gloves, utilized the facility ultrasound machine to perform a uterine ultrasound. Staff #10 typed information into the ultra sound computer system and proceeded to document on Patient #20's paper medical record with a pen. Staff #10 then removed his/her gloves and washed his/her hands with hand gel, rather than soap and water, prior to leaving the examination room. Staff failed to comply with facility policy in Reference #2, above. Reference #4: The facility policy titled, "Surveillance for Health Care Associated Infections," states, "...Data Collecting...Patients will be encouraged to return to center two weeks post procedure for examination and investigation of any complications including symptoms of infection. Patients will be provided verbal and written instructions on discharge which includes information on symptoms of infection and a mail in card to complete as to whether or not there	Q 242

Q 242	Continued From page 19 was any evidence of this...Report of Infection Investigation will be completed for each suspected infection...Infections will be reported on Monthly Report of Infections...Reports will be reviewed monthly by Infection Control Committee...Data on percent of mail in cards returned will be reported..." 1. When asked on 1/20/11 at 11:08 AM, about how the facility monitors and tracks patient infections, Staff #8 stated, "Not all of the patients have primary physicians, but if the patient returns to the facility for their two week follow up visit, the facility staff will complete an infection control survey form. If the patient has a primary physician, a letter is sent to the physician asking about infections. A general letter (but not a list of patients seen) is also sent to Planned Parenthood every six months." a. Upon request on 1/20/11, Staff #8 could not provide evidence of how patients who do not return to the facility for the follow up visit or who do not have a primary physician are followed or tracked for evidence of infections. Staff #8 stated, "If we don't see them here, and we don't know the identity of the primary physician, we don't do anything." (about following up on possible infections) b. Documentation provided by Staff #8 of the facility "Infection Control Committee" meetings failed to include data regarding infections reported on the "mail in cards" or data regarding the percentage of "mail in cards" completed and returned by patients. c. The facility failed to comply with its policy, Reference #4.	Q 242

Q 267	Continued From page 23 surgery. In extenuating circumstances, (patient's ride leaves, patient has privacy issues), the patient's transportation must be arranged by our counseling staff or the patient herself if she prefers. Every effort must be made to find another escort. If one is not available, a taxi or medical transportation will be called." 1. The above referenced policy indicated that only patients who receive conscious sedation or deep sedation must be discharged in the company of a responsible adult. Exemptions must be specific to the individual patient. Blanket exemptions to entire classes of patients are not permitted. Additionally, the policy allows patients who have undergone conscious or deep sedation to be discharged without the company of a responsible adult if the facility fails to find one for the patient. 2. Staff #3, on the afternoon of January 20, 2011, stated that patients who not receive conscious or deep sedation are not required to be discharged in the company of a responsible adult, nor does the attending physician write an order that the patient may be discharged without a responsible adult in instances when the patient does not receive conscious or deep sedation. RE: Metropolitan Surgical Associates
Addendum to Plan of Correction

Dear Ms. Steska:

Enclosed please find an addendum to our Plan of Correction for the cited deficiencies as a result of the Health Survey conducted on January 20, 2011 and January 25, 2011 by the surveyors from the Department of Health and Senior Services. Should you have any additional questions or concerns please do not hesitate to contact us for immediate assistance.

We kindly thank you in advanced for your time and courtesies with regards to this matter.

Sincerely,

Susan Martinelli
Administrator

5/23/11 Q 103 not covered AF

ADDENDUM TO FEDERAL PLAN OF CORRECTION

PoC Addendum #1

Q162

3. The cited deficiencies of practice relating to CFR 416.47(b) are to be addressed as follows:

OK 5/23/11 AF

(i) and (ii): The Consent for Cervical Dilators was incorporated into the main Consent form so that Doctors are now required to sign the Cervical Dilator Consent. Both the Evaluating and Operating Physician are required to sign the Consent Form in order for a patient to receive care. Monthly Chart reviews are conducted by the director of nursing in order to monitor completeness of all charts. Her report is submitted to the facility administrator on a monthly basis and reported to the Quality Assurance Committee.

(iii): A separate Anesthesia Consent form has now been introduced into the patient's file. Consent is now obtained separately by the Anesthesiologist. Monthly Chart reviews are conducted by the director of nursing in order to monitor completeness of all charts. Her report is submitted to the facility administrator on a monthly basis and reported to the Quality Assurance Committee.

Q220

4. The Facility Administrator will monitor the scheduling of appointments and review this new form of documentation for completeness on a weekly basis; the findings will be reported to the Quality Assurance Committee. The administrator is also observing staff making appointments on a weekly basis in order to ensure all requirements are being met; her findings will be reported to the Quality Assurance Committee.

Q221 OK 5/23/11 AF

4. The Facility Administrator will monitor the scheduling of appointments and review this new form of documentation for completeness on a weekly basis; the findings will be reported to the Quality Assurance Committee. The administrator is also observing staff making appointments on a weekly basis in order to ensure all requirements are being met; her findings will be reported to the Quality Assurance Committee.

Q223 ok 5/23/11 AK

4. The Facility Administrator will monitor the scheduling of appointments and review this new form of documentation for completeness on a weekly basis; the findings will be reported to the Quality Assurance Committee. The administrator is also observing staff making appointments on a weekly basis in order to ensure all requirements are being met; her findings will be reported to the Quality Assurance Committee.

Q224 ok 5/23/11 AK

4. The Facility Administrator will monitor the scheduling of appointments and review this new form of documentation for completeness on a weekly basis; the findings will be reported to the Quality Assurance Committee. The administrator is also observing staff making appointments on a weekly basis in order to ensure all requirements are being met; her findings will be reported to the Quality Assurance Committee.

Q229 ok 5/23/11 AK

4. To monitor this corrective action the Evaluating Physicians will attend one session with each of the counselors on a weekly basis for a period of two months to assure that they are not exceeding the scope of their practice. They will report findings to the Medical Director and the Quality Assurance Committee.

5. April 1, 2011 – May 31, 2011

PoC

FEDERAL

Q103

1. The plan of correction will be implemented to survey potential patients starting from the beginning of the year.

3/31/11

2. The corrective action systematically addresses this cited concern so that future patients will not be affected.

3. The facility will expand its efforts to track infections and has updated the Surveillance for Health Care Associated Infections policy in an effort to systematically address the need to maintain a proper environment for surgical procedures, as well as, identify and prevent infections. These efforts will include the tracking of patients returning to the facility for follow up, the provision of information relating to possible post operative infection and self reporting data cards, the serial contact of both private and institutional referrers regarding possible complications experienced by their patients, as well as, contact patients directly to as about possible post-op complication.

who RA T will that #3 is being done?

4. As with current practice, each response that indicates a potential infection will be brought to the attention of the Infection Control Designee (ICD). An Infection Investigation will promptly ensue and the results reviewed by the Medical Director and the Infection Control Committee. The Infection Control Committee will monitor these ongoing efforts on a regular ongoing basis.

5. This Plan of Correction should be effective by 3/31/2011

Q104

1. The cited deficiency that may have affected patients has been addressed and a corrective action has been accomplished.

2. The corrective action systematically addresses this cited concern so that future patients will not be affected.

3. The ABHRs in the pre-op nurse station and the PACU have been moved and are no longer located above electrical boxes.

4. The facility's Fire/Disaster Plan Coordinator, the Medical Director and the Chairman of the Board have conducted an inspection of the premises to ensure that the facility meets the provisions applicable to the Ambulatory Health Care Centers of the 2000 edition of the Life Safety Code of the National Fire Protection Association. Potential non-conforming conditions will be rectified so as to ensure this deficient practice will not recur. The results of the inspection will be reported at the ensuing Quality Assurance Meeting and to the facility's Fire Prevention Consultant.

5. The corrective action has been completed as of 2/8/2011

Q105

OK AH 4/13/11

1. The cited deficiency that may have affected patients has been addressed and a corrective action has been accomplished.
2. The corrective action systematically addresses this cited concern so that future patients will not be affected.
3. As a result of the cited deficiency, the Medical Director and the Senior Staff Anesthesiologist reviewed CFR 416.44(c). A list of the necessary medical equipment was placed in Anesthesia Policy and Procedure Manual for reference.
4. This equipment is expected by 2/25/11, the Medical Director will then report to the Quality Assurance Committee of the completion of this corrective action. Going forward, the Senior Staff Anesthesiologist will be charged with assuring that the facility possesses all requisite equipment.
5. The corrective action has been completed as of 2/25/2011

Q162

1. The cited deficiency that may have affected patients has been addressed and a corrective action has been accomplished.
2. The corrective action systematically addresses this cited concern so that future patients will not be affected.
3. The cited deficiencies of practice relating to CFR 416.47(b) are to be addressed as follows:

PoC ok 3/31/11 GH

   a. The "Consent for Cervical Dilators" form will be amended by 2/25/11 to include a section for the signature of the physician obtaining patient consent.
   b. On 2/22/11 forms which may be part of the medical record will be reviewed, any that do not provide a section for patient identification will be amended to do so by 3/25/11.
   c. By 2/23/11 the Facility Administrator and the Medical Director will issue to the counselor and physician staffs a memorandum pertaining to these cited deficiencies. The memorandum will review:
      i. That all patient sheets must be labeled so as to be properly identifiable.
      ii. That it is the duty of the Physician prior to the start of any procedure to assure that proper informed consent has been obtained and so documented.
      iii. That the operating physician and the Anesthesiologist together again obtain consent before performing a proposed procedure.

3/3/11 Deficiency was based on observation - QA does not include observation AH

iv. That the medical record must be accurate as to the treatment and management plans actually discussed.

4. Measures to assure the proper implementation of this plan of correction will include:

   a. A mandatory meeting of the Physician and Counseling staffs no later than 3/11/11 to review potential concerns and address questions relating to the corrective actions.

   b. The Director of Nursing will review, as part of the monthly Chart Audits, the medical records for proper documentation and report to the Quality Assurance Committee on a continuing basis.

   c. The importance of maintaining accurate and complete records, as well as, the proper obtainment of informed consent will be reviewed as part of the orientation of new staff.

   d. Identified lapses will be addressed via the Quality Assurance Committee.

5. Dates for implementation are as delineated above.

Q181

1. The cited deficiency that may have affected patients has been addressed and a corrective action has been accomplished.

2. The corrective action systematically addresses this cited concern so that future patients will not be affected.

3. This deficiency of practice will be addressed in 2 parts.

   a. A memorandum was issued to all physicians on 2/23/11 informing them of this identified deficiency and reminding them that acceptable standards of practice require an order, both for the administration and discontinuance of medications, as well as, IV locks.

   b. Secondly, to help provide a systemic correction, the orders section of the chart will be amended to allow for better clarity and ease in adhering to this policy. The Medical Director will draft these changes and submit them to the Quality Assurance Committee for approval. This will be done by 3/14/11.

4. This plan of correction will be monitored for compliance by incorporating its review into the monthly Chart Audit process. Follow up and remedial action for identified deficient physicians will rest with the Quality Assurance Committee.

5. The final parts of plan of correction should be complete by 3/14/11.

OK 3/28/11

Q220

1. The cited deficiency that may have affected patients has been addressed and a corrective action has been accomplished.

2. The corrective action systematically addresses this cited concern so that future patients will not be affected.

3. Upon the scheduling of appointments, phone operators will ask each patient how they would like to receive necessary documents that the patient must review prior to their visit; including the "Patient Rights" form, the "Ownership Disclosure" form and the "Advance Directives" form. The operator will document whether the patient requested the documents via fax, mail or whether the patient will download the forms from our website. Thus all documents are made available to patients in writing prior to their visit to the facility eliminating the possibility of the deficient practice to recur.

Not accepted how often (4) 3/28/11

4. The Faculty Administrator will monitor the scheduling of appointments and review this new form of documentation for completeness; the findings will be reported to the Quality Assurance Committee

5. The corrective action has been completed as of 2/15/2011

Q221

1. The cited deficiency that may have affected patients has been addressed and a corrective action has been accomplished.

2. The corrective action systematically addresses this cited concern so that future patients will not be affected.

3. Upon the scheduling of appointments, phone operators will ask each patient how they would like to receive the "Patient Rights" form. The operator will document whether the patient requested the document via fax, mail or whether the patient will download the forms from our website. Thus this document is made available to patients in writing prior to their visit to the facility, eliminating the possibility of the deficient practice to recur.

Q229

1. The cited deficiency that may have affected patients has been addressed and a corrective action has been accomplished.

2. The corrective action systematically addresses this cited concern so that future patients will not be affected.

3. The plan of correction focuses on the proper implementation of the "Informed Consent Policy". A memorandum will be drafted by 2/24/11, and issued by the Facility Administrator and the Medical Director to all Medical and Counseling staff members. It will emphasize the requirement that physicians adequately review proposed procedures with patients as part of

3/31/11 deficiency based on observation. OA does not include observation AF

the informed consent process. It will also discuss the Counseling Service, provided by the facility over and above the current standard regulations, which amongst other things, provides a public service to help educate the patients and prevent future unwanted pregnancies.

A mandatory meeting of the Physician and Counseling staffs, chaired by the Medical Director and the Facility Administrator will be held no later than 3/11/11. The meeting will review the scope of practice, as well as, the responsibilities of each staff.

4. To monitor this corrective action the Evaluating Physicians will attend sessions with each of the counselors to assure that they are not exceeding the scope of their practice. They will report findings to the Medical Director and the Quality Assurance Committee.

5. The plan of correction has been completed as of 3/11/2011

Q232

OK 3/31/11 AV

1. The cited deficiency that may have affected patients has been addressed and a corrective action has been accomplished.

2. The corrective action systematically addresses this cited concern so that future patients will not be affected.

3. Emesis basins have been added to the "Supply Storage Sheet" so that there is a daily restocking of this supply for the PACU. The Head Nurse shall conduct several spot inspections to ensure that there are an adequate number of emesis basins in the PACU.

4. By being placed on the "Supply Storage Sheet" and monitored for proper stocking, there should be no further shortage of readily accessible emesis basins in the PACU. The Head Nurse will be responsible for it's monitoring its adequate availability and report to the Quality Assurance Committee that this practice deficiency has been corrected or any shortcomings in the plan of correction.

5. This Plan of Correction has been put into effect as of 2/23/2011

Q242A

A OK 3/31/11 AV

1. The cited deficiency that may have affected patients has been addressed and a corrective action has been accomplished.

2. The corrective action systematically addresses this cited concern so that future patients will not be affected.

3. On 2/22/2011 the Infection Control Committee approved revisions to the Bloodbourne Pathogen Exposure Control Plan and the Hand Hygiene policy to more accurately reflect the CDC "MMWR October 25, 2002 Guidelines for Hand Hygiene in Health-Care Settings". Also, a hand washing in-service will be conducted for applicable staff members to assure the systematic adoption of this practice. The Surveillance for Health Care Associated Infections policy has been updated to include monitoring of patients via telephone. The Infection

Control Committee minutes will further reflect the ongoing review of Health Care Associated Infections, including follow up on data cards returned by patients.

4. As part of the monitoring of this plan of correction, the facility's Infection Control Specialist shall add to her quarterly review a hand-washing monitoring review to make sure that all staff and employees are remaining consistent with the updated Policy. Any employee or staff member deviating from the hand washing policy shall immediately be corrected and receive a personal hand washing in-service. The Infection Control Committee will oversee the monitoring and investigation of health care related infection in its monthly meetings.

5. This corrective action has been completed as of 2/22/2011

Q242B

OK 3/31/11 RF

1. The cited deficiency that may have affected patients has been addressed and a corrective action has been accomplished.

2. The corrective action systematically addresses this cited concern so that future patients will not be affected.

3. As of 2/18/2011 all staff members have documentation of Rubella/Rubeola status per the Infection Prevention and Control Organizational Plan Metropolitan Medical Associates. All employees must produce evidence of Rubella immune status, and those born after 1957 must produce evidence of Rubeola immune status or be screened prior to start of employment.

4. The Administrator will ensure that proper documentation is present in the personnel file prior to start of employment.

5. This corrective action has been completed as of 2/22/2011

Q242C

OK 3/31/11 RF

1. The cited deficiency that may have affected patients has been addressed and a corrective action has been accomplished.

2. The corrective action systematically addresses this cited concern so that future patients will not be affected.

3. The facility will require that a physical exam has been performed and documented in the personnel files per the Infection Prevention and Control Organizational Plan Metropolitan Medical Associates prior to the start of a staff member's employment thus ensuring the cited deficiency will not recur.

4. The Administrator will ensure that proper documentation is present in the personnel file prior to the start of employment.

5. This corrective action has been completed as of 2/22/2011

Q261

1. The cited deficiency that may have affected patients has been addressed and a corrective action has been accomplished.

2. The corrective action systematically addresses this cited concern so that future patients will not be affected.

3. The patient medical chart will be revised to comply with the 416.52(a)(1) statutory definition of a comprehensive History and Physical.

4. The completeness of the History and Physical will be assessed by incorporating its review into the monthly Chart Audit conducted by the Director of Nursing. It's successful implementation, or shortcomings will be reported to the Quality Assurance Committee.

5. Revised documents will be drafted by the Medical Director and submitted to the Quality Assurance Committee for review by 3/4/11 and will be used thereafter.

Q267

1. The cited deficiency that may have affected patients has been addressed and a corrective action has been accomplished.

2. The corrective action systematically addresses this cited concern so that future patients will not be affected.

3. The Quality Assurance Committee convened for a meeting on 2/24/2011 and updated the facility's "Discharge Criteria" so as to eliminate blanket exemptions to entire classes of patients.

4. The Quality Assurance Committee conducted a review of its "Discharge Criteria" and concluded that upon discharge, patients must be accompanied by another person that accepts responsibility for that patient. If extenuating circumstances exist and a patient cannot arrange for an escort, it will be the responsibility of the operating physician to approve an alternate discharge plan. Thus, discharge plans that fall outside of the facility's discharge parameters must be determined on an individualized basis and be based upon the judgment of the patient's attending physician.

5. This corrective action has been completed as of 2/24/2011

K029

1. The cited deficiency that may have affected patients has been addressed and a corrective action has been accomplished.

2. The corrective action systematically addresses this cited concern so that future patients will not be affected.

3. The door strike to the door of the furnace room has been replaced and the door can now latch properly.

4. The Housekeeping Sanitary and Safety Consultant shall conduct routine and regular inspections of the facility to ensure that all furnishings shall be in good working order and that broken or worn items shall be repaired, replaced or removed promptly. The Housekeeping Sanitary and Safety Consultant shall report his findings to the Facility Administrator should any furnishing need broken or worn and need to be repaired, replaced or promptly removed. The Facility Administrator shall report any such incidents to the Quality Assurance Committee and the ensuing Quality Assurance meeting.

5. This corrective action has been completed as of 2/8/2011

When this form is utilized for a survey, the following needs to be addressed:
This survey was reviewed with the Administrator or his/her authorized representative at the conclusion of the survey. He/she was advised of the areas where standards were not met in violation with the rules and regulations promulgated under the authority of N.J.S.A. 26:2H-5(b). He/she was further advised that it was necessary to correct conditions which do not meet the standards and that failure to correct those deficiencies may result in a fine of up to $5,000.00 per violation per day in accordance with N.J.S.A. 26:2H-14 as amended. Refusal to sign does not negate the facility's responsibility to correct deficiencies.

Signature of Responsible Official	Signature of Investigator

NARRATIVE

A Visit was made to this facility in response to the above referanced complaint. Administrative staff was made aware of the visit and the nature of the complaint.

The investigation included:

- ✓ **Tour.**
- ___ **Staffing reports.**
- ___ **Medical record review.**
- ___ **Staff interviews.**
- ___ **Patient interviews.**
- ✓ **Review of other facility documentation.**
- ___ **Meal/Medication pass observation.**
- ___ **Water/Room temperature.**

An exit conference was held with administrative staff (discussed findings and concerns).

Re: Complaint #NJ 00108847

COPY

Dear Ms. Martinelli:

Thank you for your courtesy and cooperation extended during the Complaint Survey conducted on April 24, 2018 by a surveyor from the New Jersey Department of Health.

Enclosed is the statement of deficiencies; please reply to each deficiency on an item-by-item basis with your Plan of Correction (PoC).

The PoC must include:

1. How you will correct the specific findings cited for each deficiency.

2. What systemic changes will be implemented to ensure that each deficient practice does not recur.

3. How the facility will monitor its corrective actions to ensure that the deficient practice is being corrected and will not recur, i.e. what program will be put into place to monitor the continued effectiveness of the systemic changes. The plan must identify the individual responsible for monitoring, how and when the monitoring will be conducted, how long and how often monitoring will take place, what the goal is for compliance, and to whom the results will be reported.

4. The date on which each item addressed on the PoC will be corrected.

5. Do not reference and/or include attachments with your PoC.

6. Do not include names of individuals in the PoC. Use of titles is acceptable, such as, Administrator, Director of Nursing, Infection Control Practitioner, etc.

Please be advised that the PoC will not be accepted for review by this office and will be returned to you if it contains reference to and/or attachments and/or names of individuals.

All responses should be numbered to correspond with the number of your deficiency statements. Please sign and date the first page of the deficiency statement with your plan of correction. Return these forms to this office within ten (10) business days of receipt of this letter, to my attention. Any delay or lack of response may jeopardize the licensure of your facility.

Please be advised that some or all of the deficiencies cited in the enclosed survey report may be referred to the Office of Program Compliance ("OPC") for imposition of enforcement remedies, including civil penalties. OPC will advise you, at a later date and under separate cover, of any enforcement actions and your appeal rights.

Please do not hesitate to contact me, if you have any questions regarding the deficiencies at (609) 292-9900.

Sincerely,

Eric DeCicco/SP

A5016 **8:43A-19.3(a) PHYSICAL PLANT: PLAN REVIEW FEES**

Plans for construction shall be submitted to the New Jersey Department of Community Affairs Plan Review Unit no later than June 29, 2018.

The Board of Directors and Chairman of the Board are aware that prior to any construction/renovations at the facility, plans must be submitted and approved by the Healthcare Plan Review Unit of the Department of Community Affairs. No other construction/renovation is planned and no future construction/renovation will be scheduled without first submitting plans to the Healthcare Plan Review Unit.

No new construction/renovation will be commenced without the prior written approval of the Board of Directors at a regularly scheduled or Special meeting of the Board. If any new construction/renovation is contemplated, it will be the responsibility of the Chairman of the Board to ensure that prior to any work being completed, plans will first be submitted and approved by the New Jersey Department of Community Affairs Plan Review Unit.

Plans for the construction at the top of the stairs to the main stairwell shall be submitted no later than June 29, 2018. The facility will follow the Procedures for Submission and inform the corresponding contact at the Department of Health when the Department of Community Affairs Plan Review Unit either approves and/or responds to the application.

Re: Complaint # NJ00108847

Dear Ms. Martinelli:

Thank you for providing the Survey and Certification Program with a Plan of Correction (PoC) for the deficiency found during the Complaint Survey at your facility on April 24, 2018.

Your Plan of Correction has been reviewed, found to be complete and approved by this office. Enclosed is a form indicating that all deficiencies have been corrected. Continued compliance with State Licensure Regulations will be required by your facility.

You are advised that this letter does not preclude a revisit from Assessment and Survey staff at a later date, to ensure that all elements of the PoC have been implemented.

Should you have further concerns regarding this investigation, please direct them to me at (609) 292-9900.

Sincerely,

Eric DeCicco, CFI
Surveyor Physical Plant/Life Safety
Survey and Certification

COMPLAINT AND SURVEILLANCE REPORT

Facility: Planned Parenthood - Shrewsbury		Date: 9-12-14	Case Number: 74921
Administrator/CEO: Trista Brooks Administrator		Type Facility: ST-Amb	Time Required to Correct:
Type of Survey: ☐Revisit ☒Complaint ☒Investigation ☐Surveillance ☐For Immediate Attention		Matter Under Consideration: Infection control Physical Environment	
Census/Bed Capacity:	Units Toured: 1	Charts Reviewed: 0	Number of Patients Affected:
Facility Representatives/Titles:		Remarks/Issues: Not Valid	

When this form is utilized for a survey, the following needs to be addressed:
This survey was reviewed with the Administrator or his/her authorized representative at the conclusion of the survey. He/she was advised of the areas where standards were not met in violation with the rules and regulations promulgated under the authority of N.J.S.A. 26:2H-5(b). He/she was further advised that it was necessary to correct conditions which do not meet the standards and that failure to correct those deficiencies may result in a fine of up to $5,000.00 per violation per day in accordance with N.J.S.A. 26:2H-14 as amended. Refusal to sign does not negate the facility's responsibility to correct deficiencies.

Signature of Responsible Official	Signature of Investigator
	Teresa Draham RN, BSN

NARRATIVE

An unannounced visit was made to this facility to investigate a complaint. The complaint was discussed with facility representative (s). The investigation included review of documentation and staff interviews. Preliminary concerns regarding the investigation were discussed with the facility representative (s). After supervisory review, deficiencies may follow.

Re: Planned Parenthood Of Central & Greater Northern New Jersey
Complaint #NJ00074921

A representative from Health Facility Survey and Field Operations conducted an investigation of your complaint concerning environmental issues at Planned Parenthood Of Central & Greater Northern New Jersey.

The investigation included a tour of the grounds and facility, review of facility documentation, and staff interview.

After evaluating this information, the surveyor was unable to identify a citable deficient practice related to your concerns.

The results of this investigation were presented to and reviewed with administrative staff for continued monitoring of patient care.

Thank you for forwarding your concerns to this office.

Sincerely,

Nicholas Campanella, MD
Pilgrim Medical Center, Inc
393 Bloomfield Avenue
Montclair, NJ 07042

Dear Dr. Campanella:

Thank you for your courtesy and cooperation extended during the State Relicensure Survey conducted on January 7, 2015, January 9, 2015, and January 13, 2015 by surveyors from the New Jersey Department of Health.

Enclosed is the statement of deficiencies; please reply to each deficiency on an item-by-item basis with your Plan of Correction (PoC).

The PoC must include:

1. How you will correct the specific findings cited for each deficiency.

2. What systemic changes will be implemented to ensure that each deficient practice does not recur.

3. How the facility will monitor its corrective actions to ensure that the deficient practice is being corrected and will not recur, i.e. what program will be put into place to monitor the continued effectiveness of the systemic changes. The plan must identify the individual responsible for monitoring, how and when the monitoring will be conducted, and to whom the results will be reported.

4. The date on which each item addressed on the PoC will be corrected.

5. Do not reference and/or include attachments with your PoC.

6. Do not include names of individuals in the PoC. Use of titles is acceptable, such as, Administrator, Director of Nursing, Infection Control Practitioner, etc.

Please be advised that the PoC will not be accepted for review by this office and will be returned to you if it contains reference to and/or attachments and/or names of individuals.

All responses should be numbered to correspond with the number of your deficiency statements. Please sign and date the first page of the deficiency statement with your plan of correction. Return these forms to this office within ten (10) business days of receipt of this letter, to my attention. Any delay or lack of response may jeopardize the licensure of your facility.

Please be advised that some or all of the deficiencies cited in the enclosed survey report may be referred to the Office of Program Compliance ("OPC") for imposition of enforcement remedies, including civil penalties. OPC will advise you, at a later date and under separate cover, of any enforcement actions and your appeal rights.

Please do not hesitate to contact me, if you have any questions regarding the deficiencies at (609) 292-9900.

Sincerely,

Louise A. Steska, MSN, RN

A4797	Continued From page 8 Based on observation and staff interview on 1/7/15, it was determined the facility failed to ensure that all interior surfaces are maintained clean to sight and touch. Findings include: 1. At 9:45 AM, in the presence of Staff #1, the flooring in the Sterilizer Room and Processing Area was found to have surface damage and to have un-cleanable gaps where the floor base had separated from the wall. 2. At 10:15 AM, in the presence of Staff #1, the floor located in the lower level Staff Kitchen, was in disrepair, visibly worn with curled edges and had open seams which would preclude proper cleaning. 3. At 11:30 AM, in the presence of Staff #1, the Post Anesthesia Care Unit (PACU), located on the second floor, had several areas of wall damage and monolithic floor surface defects and openings. 4. At 11:50 AM, in the presence of Staff #1, three stained ceiling tiles were found located in the Medication Storage Room. 5. These findings were confirmed by Staff #1.	A4797

Dear Dr. Campanella:

Thank you for providing the Survey and Certification Program with a Plan of Correction (PoC) for the deficiencies found during the State Relicensure Survey at your facility on January 13, 2015.

Your Plan of Correction and addendum has been reviewed, found to be complete and approved by this office. Enclosed is a form indicating that all deficiencies have been corrected. Continued compliance with State Licensure will be required by your facility.

You are advised that this letter does not preclude a revisit from Assessment and Survey staff at a later date, to ensure that all elements of the PoC have been implemented.

Should you have further concerns regarding this survey, please direct them to me at (609) 292-9900.

Sincerely,

Louise A. Steska, MSN, RN

State PoC Addendum

RESPONSE TO STATEMENT OF DEFICIENCIES

- **A4183 8:43A-14.3(a)(5)**

This deficiency has been corrected on January 15, 2015 at which time Staff #16 and Staff #19 were re-trained in proper hand hygiene. Staff #19 was also retrained in appropriate operating room hygiene required by infection control. Pilgrim supplies alcohol based hand rub and sinks with antibacterial soap in all required areas.

Pilgrim will ensure that this deficiency does not recur by continuing its regular observation of hand hygiene as conducted by the Director of Nursing. All findings are reported to the Infection Control Committee for remedy as necessary.

- **A4190 8:43A-14.4(a)(1)**

As a preliminary matter, the unit in question was not a heating and air conditioning unit; it was, in fact, the boiler for the two sterilizer units. At no time has Pilgrim ever placed or considered placing any sterile instruments directly in front of any heating or air conditioning units due to the dust that clearly accumulates on such units. The boiler was wrapped in a pink insulation material which has since been removed and will be replaced with appropriately sealed insulation on or before June 1, 2015. Once again, the unit in question was the boiler unit used for the functioning of the sterilizers and the air conditioning unit had properly cleaned filters, which are cleaned on a weekly basis. Pilgrim accepts the fact that dust, debris and insulation fibers can compromise the integrity of sterile trays. However, it was due to an OSHA recommendation that this extremely hot unit was initially covered with insulation. The instruments in question, as Staff #2 recalls, were re-sterilized immediately at the recommendation of the surveyor who observed their location. To the best of Staff #2's recollection, the resolution of immediate jeopardy was, in fact, the immediate re-sterilization of these nine packs. That said, this deficiency has been corrected as of January 15, 2015 at which time the sterilization team was instructed that no sterile packs are to be placed in this location to ensure sterility.

OK

AM 6/4/15

Please also be advised that the sterilization area is serviced by two separate intake/outtake ventilation systems and a separate independent exhaust system which maintains negative pressure throughout. There are no fans or portable air conditioning units of any kind in the sterilization area. The unit in question is the latest model of ductless air conditioning units which is used extensively in hospitals and, in accordance with the owner's manual, utilizes an intake/outtake system with rate of air exchange of up to 11.4 cubic meters per minute. The system is a Daikin model # EDUS041501 and the owner's manual, the Engineering Data Manual" can be found at http://www.daikinac.com/content/assets/DOC/Engineering Manuals/EDUS041501.pdf. The owner's manual includes detailed diagrams of the intake/outtake system and the filtration system on pages 81-84.

Pilgrim will ensure that this deficiency does not recur by observing, on a daily basis, that these packs are in a clean area void of dust and kept away from any potential heat or air conditioning vents. The Medical Director and/or the Alternate Medical Director will be responsible for this daily observation and they will report all findings, including any deficiency, to the Infection Control Committee for re-training and remedy as needed. The facility will remain in compliance with functional and sanitary environmental conditions and in compliance with infection control through staff in-services and continued environmental rounds monitoring as indicated herein.

- **A4286 8:43A-14.6(a)(3)**

With regard to the exposed particulate material observed on the wall in the sterilization room as of January 15, 2015, this wall has been thoroughly cleaned and repaired and the Alternative Medical Director checks this area daily to make sure that there are no further defects in the material and that there is no particulate matter or any other debris present.

Pilgrim will ensure that this deficiency does not recur by continuation of regular environmental rounds specifically using a monthly inspection and observation of the physical plant to be performed by

the Administrator or Alternate Administrator. All findings will be reported to the building and maintenance committee for remedy as needed.

As a preliminary matter, the unit in question was not a heating and air conditioning unit; it was, in fact, the boiler for the two sterilizer units. At no time has Pilgrim ever placed or considered placing any sterile instruments directly in front of any heating or air conditioning units due to the dust that clearly accumulates on such units. The boiler was wrapped in a pink insulation material which has since been removed and will be replaced with appropriately sealed insulation on or before June 1, 2015. Once again, the unit in question was the boiler unit used for the functioning of the sterilizers and the air conditioning unit had properly cleaned filters, which are cleaned on a weekly basis. Pilgrim accepts the fact that dust, debris and insulation fibers can compromise the integrity of sterile trays. However, it was due to an OSHA recommendation that this extremely hot unit was initially covered with insulation. The instruments in question, as Staff #2 recalls, were re-sterilized immediately at the recommendation of the surveyor who observed their location. To the best of Staff #2's recollection, the resolution of immediate jeopardy was, in fact, the immediate re-sterilization of these nine packs. That said, this deficiency has been corrected as of January 15, 2015 at which time the sterilization team was instructed that no sterile packs are to be placed in this location to ensure stability.

OK. Ann 6/4/15

Please also be advised that the sterilization area is serviced by two separate intake/outtake ventilation systems and a separate independent exhaust system which maintains negative pressure throughout. There are no fans or portable air conditioning units of any kind in the sterilization area. The unit in question is the latest model of ductless air conditioning units which is used extensively in hospitals and, in accordance with the owner's manual, utilizes an intake/outtake system with rate of air exchange of up to 11.4 cubic meters per minute. The system is a Daikin model # EDUS041501 and the owner's manual, the Engineering Data Manual" can be found at http://www.daikinac.com/content/assets/DOC/Engineering Manuals/EDUS041501.pdf. The owner's manual includes

detailed diagrams of the intake/outtake system and the filtration system on pages 81-84.

Pilgrim will ensure that this deficiency does not recur by observing, on a daily basis, that these packs are in a clean area void of dust and kept away from any potential heat or air conditioning vents. The Medical Director and/or the Alternate Medical Director will be responsible for this daily observation and they will report all findings, including any deficiency, to the Infection Control Committee for re-training and remedy as needed. The facility will remain in compliance with functional and sanitary environmental conditions and in compliance with infection control through staff in-services and continued environmental rounds monitoring as indicated herein.

OK
AM 6/4/15

- **A4702 8:43A-17.3(d)**

At no time has Pilgrim, its Governing Body, its Medical Director, Alternate Medical Director of Director of Nursing approved the use of 50% Vinegar or alcohol in cleaning any environmental surface. In fact, Pilgrim only uses a 10% Bleach Solution for non-corrosive surfaces and a biological agent, from Ruhof Corporation, which comes in pre-packaged spray bottles. Upon questioning Staff #2 and Staff #3 the Medical Director learned that these bottles had been present for years and the staff did not know what they were to be used for and neither had ever used them. This deficiency has been corrected on January 15, 2015 at which time they were disposed of and the staff was advised that no unacceptable cleaning supplies are to kept anywhere in the facility.

OK
AM 6/4/15

Pilgrim will ensure that this deficiency does not recur by observing on a daily basis that no unacceptable cleaning supplies are kept anywhere on the premises. The Medical Director and/or Alternate Medical Director will be responsible for all daily observations and they will report all findings including any deficiencies to the Infection Control Committee for remedy as needed. Any modification to the list of acceptable and approved cleaning materials will be reviewed and approved by the Infection Control Committee prior to implementation.

The facility will remain in compliance with functional sanitary and environmental conditions, and in compliance with infection control, through staff in services and continuing environmental rounds monitoring.

- **A4733 8:43A-17.3(I)**

This deficiency has been corrected as of April 10, 2015, at which time the door in question, wherein an air gap was visible, was replaced and is now airtight. The open end pipe protruding from the ceiling in the lower level storage room was sealed and a non-porous cover was placed to ensure closure.

Pilgrim will ensure that this deficiency does not recur by continuation of regular environmental rounds specifically using a monthly inspection and observation of the physical plant to be performed by the Administrator or Alternate Administrator. All findings will be reported to the building and maintenance committee for remedy as needed.

- **A4797 8:43A-17.4(a)(15)**

This deficiency will be corrected on or before June 1, 2015. The floor in the sterilization area and the processing area is in the process of being replaced and we anticipate that the entire project will be completed by June 1st. An acrylic seal will be placed on the floor itself to eliminate any gaps or cracks. The floor base has been reattached to the wall.

Pilgrim will ensure that this deficiency does not recur by continuation of regular environmental rounds specifically using a monthly inspection and observation of the physical plant to be performed by the Administrator or Alternate Administrator. All findings will be reported to the building and maintenance committee for remedy as needed.

The floor located in the lower level staff kitchen was replaced and on or before May 1, 2015, it will be sealed with an acrylic sealant to eliminate any gaps that would prevent proper cleaning.

Pilgrim will ensure that this deficiency does not recur by continuation of regular environmental rounds specifically using a monthly inspection and

observation of the physical plant to be performed by the Administrator or Alternate Administrator. All findings will be reported to the building and maintenance committee for remedy as needed.

The wall damage in the PACU has been repaired as of April 1, 2015 and the monolithic floor has been repaired and will be sealed using an acrylic sealer on or before May 1, 2015.

Pilgrim will ensure that this deficiency does not recur by continuation of regular environmental rounds specifically using a monthly inspection and observation of the physical plant to be performed by the Administrator or Alternate Administrator. All findings will be reported to the building and maintenance committee for remedy as needed.

The stained ceiling tiles in the medication storage room were replaced, as of January 15, 2015.

Pilgrim will ensure that this deficiency does not recur by continuation of regular environmental rounds specifically using a monthly inspection and observation of the physical plant to be performed by the Administrator or Alternate Administrator. All findings will be reported to the building and maintenance committee for remedy as needed.

CONCLUSION

Pilgrim submits this Plan of Correction for consideration by the Department and awaits the Department's determination.

Very truly yours,

PILGRIM MEDICAL CENTER INC.

Montclair, NJ 07042

Dear Dr. Campanella:

Thank you for the courtesy and cooperation extended during the Federal Recertification Survey of your facility on January 7, 2015, January 9, 2015, and January 13, 2015 by surveyors from the New Jersey Department of Health.

As a result of observation and evaluation certain Federal deficiencies were evident. The deficiencies identified during this visit have resulted in the determination that your facility is not in compliance with the following Medicare Condition for Coverage:

416.41 Govering Body and Management
416.51 Infection Control

A complete listing of the specific deficiencies identified by the surveyors is enclosed. These Federal deficiencies were discussed with you and/or your staff during the visit and are listed on the left side of the enclosed CMS-2567 form. Please reply to each deficiency, on an item by item basis, with your Plan of Correction (PoC) and the date you expect the correction to be completed.

You may write your PoC on the deficiency report in the space provided, or it can be written on a separate document and submitted along with the signature page (page 1 of the deficiency report). Please number your response to correspond to the number of each deficiency statement.

The PoC for each deficiency must contain the following elements:

1. How the specific findings cited for each deficiency will be corrected.

2. The systemic changes put into place for each deficiency.

3. The measures that will be put into place to monitor each corrective action to ensure that the plan of correction is effective and that compliance is maintained.

4. The title of the person responsible for implementing the plan of correction.

5. The date on which each item addressed on the PoC will be corrected.

6. Do not reference and/or include attachments with your PoC.

7. Do not include names of individuals in the PoC. Use of titles is acceptable, such as, Administrator, Director of Nursing, Infection Control Practitioner, etc.

Please be advised that the PoC will not be accepted for review by this office and will be returned to you if it contains reference to and/or attachments and/or names of individuals.

Sign and date the first page of the CMS-2567 form and return the form with your PoC. Please retain a copy of each page for your records. All responses must be returned within 10 calendar days of receipt of this letter to my attention, New Jersey Department of Health, Health Facility and Field Operations, PO Box 367, Trenton, NJ 08625-0367.

It is important to return the completed forms promptly. Any delay or lack of response may jeopardize the certification status of your facility. If you have any questions concerning this report, please contact me, at (609) 292-9900.

Sincerely,

Louise A. Steska, MSN, RN

Dear Dr. Campanella:

Thank you for the courtesy and cooperation extended during the Federal revisit survey of your facility on July 15, 2015 by a surveyor from the New Jersey Department of Health.

Enclosed is the CMS-2567B form which indicates that the Federal deficiencies, identified during the survey of January 13, 2015 were corrected.

Should you have questions, please do not hesitate to contact me at (609) 292-9900.

Sincerely,

RESPONSE TO STATEMENT OF DEFICIENCIES

- **Q040 416.41**

This deficiency was corrected on January 15, 2015 at which time the Governing Body of Pilgrim, consisting of the Medical Director, the Alternate Medical Director, the Administrator and the Director of Nursing met and reviewed their responsibilities with regard to oversight, with respect to the general day-to-day operations as well as compliance with CMS conditions of coverage specifically including infection control. The Governing Body reviewed its responsibilities for oversight and accountability for the quality assessment and performance improvement program and ensuring that the facilities policies and programs are administered so as to provide quality healthcare in a safe environment. The Governing Body also appointed an Assistant Director of Nursing to assist the Director of Nursing with implementation, administration and enforcement of the inflation control program.

Pilgrim will ensure that this does not recur by holding semi-annual meetings of the Governing Body, at which time all policies and procedures will be reviewed for compliance and proper oversight. Moreover, the Medical Director will directly oversee the implementation and administration of the infection control program by the Director of Nursing and the Assistant Director of Nursing. The Medical Director will be responsible for scheduling meetings to review observation and oversight on a monthly basis. Any deficiencies discovered as a result of such meetings shall be reported to the quality assurance committee for remedy. In the event the Governing Body determines at any such meeting that the policies require revision there will be an in-service or all employees within 7 days of any such change. The Director of Nursing shall be responsible for scheduling these in-services and the attendance and result of same shall be reported to the patient care policy committee.

- **Q101 416.44(a)(1)**

This deficiency has been corrected as of April 15, 2015 at which time the stairway in question was

repaired and reconstructed to eliminate any structural deficiency.

Pilgrim will ensure that this deficiency does not recur by continuation of regular environmental rounds specifically using a monthly inspection and observation of the physical plant to be performed by the Administrator or Alternate Administrator. All findings will be reported to the building and maintenance committee for remedy as needed.

OK mm 5-21-2015

With regard to the exposed particulate material observed on the wall in the sterilization room as of January 15, 2015, this wall has been thoroughly cleaned and repaired and the Alternative Medical Director checks this area daily to make sure that there are no further defects in the material and that there is no particulate matter or any other debris present.

OK. Acm 6/4/15

Pilgrim will ensure that this deficiency does not recur by continuation of regular environmental rounds specifically using a monthly inspection and observation of the physical plant to be performed by the Administrator or Alternate Administrator. All findings will be reported to the building and maintenance committee for remedy as needed.

The two quart sized plastic containers were removed and disposed of and this deficiency was corrected on January 15, 2015 and the staff has been instructed that no such items should ever be used as weights in the future.

Pilgrim will ensure that this deficiency does not recur by continuation of regular environmental rounds specifically using a monthly inspection and observation of the physical plant to be performed by the Administrator or Alternate Administrator. All findings will be reported to the building and maintenance committee for remedy as needed.

The Prepzyme Enzymatic foam spray was removed from the sterilization area and returned to the

decontamination room on January 15, 2015 at which time this deficiency was corrected. Staff has been instructed that the Prepzyme enzymatic foam spray must remain in the decontamination room and should never inadvertently be moved to the prep and pack or sterilization area.

Pilgrim will ensure that this deficiency does not recur by observing, on a daily basis, that Prepzyme enzymatic foam spray is contained in the decontamination area. The Medical Director and/or the Alternate Medical Director will be responsible for this daily observation and they will report all findings, including any deficiency, to the Infection Control Committee for re-training and remedy as needed. The facility will remain in compliance with functional and sanitary environmental conditions and in compliance with infection control through staff in-services and continued environmental rounds monitoring as indicated herein.

OK
ACM
6/4/15

As a preliminary matter, the unit in question was not a heating and air conditioning unit; it was, in fact, the boiler for the two sterilizer units. At no time has Pilgrim ever placed or considered placing any sterile instruments directly in front of any heating or air conditioning units due to the dust that clearly accumulates on such units. The boiler was wrapped in a pink insulation material which has since been removed and will be replaced with appropriately sealed insulation on or before June 1, 2015. Once again, the unit in question was the boiler unit used for the functioning of the sterilizers and the air conditioning unit had properly cleaned filters, which are cleaned on a weekly basis. Pilgrim accepts the fact that dust, debris and insulation fibers can compromise the integrity of sterile trays. However, it was due to an OSHA recommendation that this extremely hot unit was initially covered with insulation. The instruments in question, as Staff #2 recalls, were re-sterilized immediately at the recommendation of the surveyor who observed their location. To the best of Staff #2's recollection, the resolution of immediate jeopardy was, in fact, the immediate re-sterilization of these nine packs. That said, this deficiency has been corrected as of January 15, 2015 at which time the sterilization team was

instructed that no sterile packs are to be placed in this location to ensure stability.

Please also be advised that the sterilization area is serviced by two separate intake/outtake ventilation systems and a separate independent exhaust system which maintains negative pressure throughout. There are no fans or portable air conditioning units of any kind in the sterilization area. The unit in question is the latest model of ductless air conditioning units which is used extensively in hospitals and, in accordance with the owner's manual, utilizes an intake/outtake system with rate of air exchange of up to 11.4 cubic meters per minute. The system is a Daikin model # EDUS041501 and the owner's manual, the Engineering Data Manual" can be found at http://www.daikinac.com/content/assets/DOC/EngineeringManuals/EDUS041501.pdf. The owner's manual includes detailed diagrams of the intake/outtake system and the filtration system on pages 81-84.

OK

ACM 6/4/15

Pilgrim will ensure that this deficiency does not recur by observing, on a daily basis, that these packs are in a clean area void of dust and kept away from any potential heat or air conditioning vents. The Medical Director and/or the Alternate Medical Director will be responsible for this daily observation and they will report all findings, including any deficiency, to the Infection Control Committee for re-training and remedy as needed. The facility will remain in compliance with functional and sanitary environmental conditions and in compliance with infection control through staff in-services and continued environmental rounds monitoring as indicated herein.

This deficiency has also been corrected on January 15, 2015 at which time Staff #16 and Staff #19 were re-trained in proper hand hygiene. Staff #19 was also retrained in appropriate operating room hygiene required by infection control. Pilgrim supplies alcohol based hand rub and sinks with antibacterial soap in all required areas.

Pilgrim will ensure that this deficiency does not recur by continuing its regular observation of hand hygiene as conducted by the Director of Nursing. All findings are reported to the Infection Control Committee for remedy as necessary.

OK ACM 6/4/15

- **K 115 416.44(b)(1)**

This deficiency has been corrected on or about February 1, 2015 at which time the opening in the wall above the door to the lower level storage room was repaired using ½" sheet rock in order to prevent the travel of smoke from one room to another in the event of fire.

Pilgrim will ensure that this deficiency does not recur by continuation of regular environmental rounds specifically using a monthly inspection and observation of the physical plant to be performed by the Administrator or Alternate Administrator. All findings will be reported to the building and maintenance committee for remedy as needed.

OK mm 5-21-2015

The smoke doors separating the reception area and the patient exam rooms are in the process of being replaced with new, air tight, doors in order to prevent the transference of smoke from one area to another. Pilgrim anticipates installation will be completed on or before May 1, 2015. A number of attempts have been made to make this correction sooner; however, the prior manufacturer never delivered the items as promised. A new contractor has been hired and has already proven to be much more reliable.

Pilgrim will ensure that this deficiency does not recur by continuation of regular environmental rounds specifically using a monthly inspection and

observation of the physical plant to be performed by the Administrator or Alternate Administrator. All findings will be reported to the building and maintenance committee for remedy as needed.

CONCLUSION

Pilgrim submits this Plan of Correction for consideration by the Department and awaits the Department's determination.

Very truly yours,

A1297	Continued From page 2 Findings include: 1. A review of twelve (12) out of twelve (12) employee files (#1, #2, #3 #4, #8, #9, #13, #15, #20, #21, #22 and #23), lacked evidence of a history and physical examination upon hire and subsequently. 2. The above findings were confirmed with Staff #1.	A1297		
A2376	8:43A-9.4(a) PHARMACEUTICAL SVCS: ADMIN OF MEDS All medications administered shall be prescribed in writing. Each written order shall specify the name of the drug, dose, frequency, and route of administration and shall be signed and dated by the prescriber. This REQUIREMENT is not met as evidenced by: A. Based on document review and staff interview conducted on 12/8/17, it was determined that the facility failed to ensure that medications administered are prescribed in writing. Findings include: 1. The administration of Morphine 4 mg IVP, on 9/29/17 at 11:17 AM, was recorded in Medical Record #13. a. There was no evidence of a physician's order for Morphine.	A2376

A2432	8:43A-9.5(b) PHARMACEUTICAL SVCS: STORAGE OF DRUGS All drugs shall be stored under proper conditions, as indicated by the United States Pharmacopoeia, product labeling, and/or package inserts. This REQUIREMENT is not met as evidenced by: Based on observation, staff interview, and review of facility policy, it was determined that the facility failed to ensure safe injection practices are followed in accordance with its policies. Findings include: Reference #1: Facility policy titled, Medication - Administration; Control and Storage of states, "Procedure ... 7. Multi use vials must be used within 28 days of opening. Do not use expiration date when discarding." Reference #2: United States Pharmacopia (USP) General Chapter 797 [16] states, "If a multi-dose has been opened or accessed (e.g., needle-punctured) the vial should be dated and discarded within 28 days unless the manufacturer specifies a different (shorter or longer) date for that opened vial." 1. During an observation in the Post Anesthesia Care Unit (PACU) on 12/7/17, at approximately 12:35 PM, Staff #18 obtained a multidose vial of Nubain from an open box. Staff #18 withdrew the medication from the vial and confirmed that it was	A2432

A2432	Continued From page 4 ready to be administered to the patient. a. During an interview, Staff #18 confirmed that the medication vial had been accessed prior to the above medication preparation, and there was no date of opening on the medication vial label.	A2432		
A3945	8:43A-13.4(a) MEDICAL RECORDS: REQUIREMNTS FOR ENTRIES All orders for patient care shall be prescribed in writing and signed and dated by the prescriber, in accordance with the laws of the State of New Jersey. All orders, including verbal orders, shall be verified or countersigned in writing within seven days. This REQUIREMENT is not met as evidenced by: Based on document review and staff interview conducted on 12/8/17, it was determined that the facility failed to ensure the development of policies and procedures addressing the signing of verbal orders by the prescriber. Findings include: 1. Facility policy titled, "Verbal Orders" fails to address the procedure for the signing of verbal orders by the prescriber, including that the order must be signed within seven (7) days. 2. This finding was confirmed by Staff #1.	A3945

On 12/7/17 at 10:45 AM, a tour was conducted of the decontamination area and the following was revealed: a. Staff #8 was observed using Ergo-Logistics One Cleaner Enzyme Detergent to clean and disinfect a soiled D&E tray. (i) Staff #8 was observed using several pumps of enzyme detergent, when mixing the enzyme detergent and water. (ii) Staff #8 confirmed he/she uses approximately twelve (12) pumps of enzyme detergent to one-half (1/2) to one (1) gallon of water." (iii) Staff #8, when asked how he/she measures out one (1) gallon of water, pointed to half-way up the sink and replied "I usually fill the water to about here." (iv) Staff #8 confirmed there is no marking in the sink nor is the water measured to exactly one gallon. (v) Staff #8 was observed using a measuring cup and dispensed One Cleaner Enzyme Detergent into the measuring cup and poured it into the sink of water. (vi) Staff #8 confirmed that the measuring cup was a one-half (1/2) cup. (vii) Staff #8 was neither measuring the water nor the enzyme solution correctly.	A4215

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)	ID PREFIX TAG	PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)	(X5) COMPLETE DATE
A 000	INITIAL COMMENTS This was a State Re-Licensure survey conducted on 12/7/2018 and 12/8/2017. Medical records reviewed: 20 Personnel files reviewed/staff interviews: 23	A 000	PoC Accepted 4/6/18	
A1185	8:43A-3.5(d)(1) GEN REQUIREMENTS: PERSONNEL All personnel shall receive orientation at the time of employment and at least annual in-service education regarding, at a minimum, emergency plans and procedures, the infection prevention and control program, universal precautions, policies and procedures concerning patient rights, and, if appropriate, given the patient population of the facility, identification of cases of child abuse and/or elder abuse. This REQUIREMENT is not met as evidenced by: Based on document review and staff interview conducted on 12/8/2017, it was determined that the facility failed to ensure that all personnel receive orientation at the time of employment and at least an annual in-service education regarding, at a minimum, emergency plans and procedures, the infection prevention and control program, universal precautions, policies and procedures concerning patient rights, and identification of elder abuse. Findings include: 1. A review of (11) eleven out of (11) eleven	A1185		

A1185

843A-5 (d)(1) GEN REQUIREMENTS PERSONNEL

1. The deficiency will be corrected as it relates to the individual by conducting a training for all staff regarding emergency plans and procedures, infection prevention and control program, universal precautions, and patients' rights.
2. Systemically, these in-service/training topics will be added to the annual calendar of trainings scheduled for the center.
3. To ensure that compliance is maintained, required trainings will be imbedded into the center's Quality Improvement Plan and will be reviewed to ensure completion at quarterly QI meetings.
4. The person responsible for ensuring implementation of this plan is the facility's Deputy Director.
5. The corrective action will be completed by April 13, 2018

A129

8:43A-3.7(a) GEN REQUIREMENTS: EMPLOYEE HEALTH

1. The deficiency will be corrected as it relates to the individual by complying with Cherry Hill Women's Center *Employee Health Exam Policy.* All applicants for employment shall undergo a health screening/physical examination following a conditional offer of employment and annually thereafter undergo an annual health screening/physical examination. In accordance with the Americans with Disabilities Act, this screening/examination shall be limited to assessing whether the applicant has a health condition that would prevent performance of the essential functions of the job or would pose a direct threat to the applicant or others, even with a reasonable accommodation.
2. Systemically, employee records will be reviewed within three months of hire and annually thereafter to ensure compliance.
3. To ensure that compliance is maintained, "Employee Health Exam" will be added to the facility's internal annual checklist for Employee Record maintenance/assurance.
4. The person responsible for ensuring compliance is maintained is the Director of Nursing
5. The corrective action will be completed by April 13, 2018.

A2376

8:43a-9.4(a) PHARMACEUTICAL SVCS:ADMIN OF MEDS

1. The deficiency will be corrected as it relates to the individual by updating the facility's policy regarding verbal orders to include the requirement that the order must be documented and signed by the ordering physician in a timely manner.
2. Systemically, the facility's Deputy Administrator (DA) will re-train all physicians regarding the updated policy.
3. To ensure that compliance is maintained, the facility's Deputy Administrator will audit ten charts for each physician on a monthly basis for twelve months.
4. The facility's Deputy Administrator is responsible for implementing the plan of correction.
5. This corrective action will be completed by April 13, 2018.

A2432

8:43-9.5(B) PHARMACEUTICAL SVCS: STORAGE OF DRUGS

1. The deficiency will be corrected as it relates to the individual by ensuring that all multi-use vials are labeled individually in addition to the boxes they are kept in.
2. Systemically, the Director of Nursing will retrain all nursing staff on proper multi-use vial labeling.
3. To ensure that compliance is maintained, the Director of Nursing will routinely spot check multi-use vials to ensure they are labeled appropriately.
4. The Director of Nursing is responsible for ensuring the PoC is adhered to.
5. This corrective action will be completed by 4.13.2018

A3945

8:43A-13.4(a) MEDICAL RECORDS: REQUIREMENTS FOR ENTRIES

1. The deficiency will be corrected as it relates to the individual by updating the facility's policy regarding verbal orders to include the requirement that the order must be documented and signed by the ordering physician in a timely manner.
2. Systemically, the facility's Deputy Administrator (DA) will re-train all physicians regarding the updated policy.
3. To ensure that compliance is maintained, the facility's Deputy Administrator will audit ten charts for each physician on a monthly basis for twelve months.
4. The facility's Deputy Administrator is responsible for implementing the plan of correction.
5. This corrective action will be completed by April 13, 2018.

A4071

8:43a-14.2(b) INFEC PREV& CONTROL: POL & PROCEDURES

1. The deficiency will be corrected as it relates to the individual by ensuring that all staff are securing all of their head hair beneath the surgical cap.
2. Systemically, the Director of Nursing will retrain all medical staff on proper use of surgical caps.
3. To ensure that compliance is maintained, the Director of Nursing will routinely spot check surgical attire to ensure proper use.
4. The Director of Nursing is responsible for ensuring the PoC is adhered to.
5. This corrective action will be completed on 4.13.18.

Americans United for Life

A4098

8:43-14.2(b)(4) INFEC PREV & CONTROL: POL & PROCEDURES

1. The deficiency will be corrected as it relates to the individual by:
   - Updating the facility's Infection Control Plan to reflect that fact that the facility has selected and implemented guidelines from Association for the Advancement of Medical Instrumentation (AAMI), Occupational Safety and Health Administration (OSHA), and Centers for Disease Control and Prevention (CDC).
   - Ensuring that staff in the Decontamination area wear adequate Personal Protective Equipment (PPE), including a Level 4 (impermeable) gown.
   - Removing from the Decontamination area any containers which could be easily punctured, and by updating the facility's policy regarding laboratory specimens. The updated policy will reflect that specimens will be transported from the Decontamination area to the laboratory in a container which prevents leakage.
2. The systemic changes put into place for each deficiency are as follows:
   - The facility's Deputy Administrator will provide an in-service for all personnel to educate them regarding the updated Infection Control Plan.
   - The facility's Deputy Administrator will update the facility's PPE policy to reflect this change and will provide staff education for all personnel regarding this update.
   - The facility's Deputy Administrator will provide education to the facility's personnel impacted by this change in policy, namely all personnel working in Decontamination and the laboratory.
3. To ensure that compliance is maintained:
   - The Infection Control Plan will be reviewed on an annual basis by the Quality Improvement Committee to ensure that the plan accurately reflects the chosen standards of the facility's program.
   - The Level 4 gown requirement will be included in the facility's existing Hand Hygiene/ PPE QI monitoring audits which occur on a monthly basis.
   - The facility's Deputy Administrator will add this to the staff annual competencies and routinely spot check staff use of PPE and transport containers to ensure compliance.
4. The person responsible for implementing these plans is the facility's Deputy Administrator.
5. These corrective actions will be completed by April 13, 2018.

Americans United for Life

A4112

8:43A-14.2(b)(6) INFEC PREV & CONTROL: POL & PROCEDURES

1. The deficiency will be corrected as it relates to the individual in that the facility will purchase and install a splash guard, further protecting the medication preparation area.
2. Systemically, the Director of Nursing will explain the barrier to all Anesthesiologists and Nurses ensuring that the barrier remains in place as she conducts her daily rounds of the center.
3. To ensure compliance is maintained, the facility's Director of Nursing will ensure the barrier is in place as she conducts her daily rounds of the center.
4. The Director of Nursing is responsible for ensuring this plan of correction is implemented and adhered to.
5. This corrective action will be completed by April 13,2018

A4183

8:43A-14.3(a)(5) INFEC PREV & CONTROL: INFEC PREV MEASURES

1. The deficiency will be corrected as it relates to the individual by ensuring that all handwashing sinks are free of debris. Additionally, alcohol based cleaners will be made available and within arm's reach in every clinical area of the ASC.
2. Systemically, the Director of Nursing will retrain all staff on proper hand hygiene techniques,
3. To ensure that compliance is maintained, the Director of Nursing will assess staff ability to adhere to policy by performing monthly surprise hand hygiene audits.
4. The Director of Nursing is responsible for ensuring the PoC is adhered to.
5. This corrective action will be completed on 4.13.18.

A4215

8:43A-14.4(g) INFEC PREV & CONTROL: STRILIZATN PT CARE ITEMS

1. The deficiency will be corrected as it relates to the individual by purchasing a water mark to ensure proper labeling of the sink.
2. Systemically, the center's Director of Nursing will retrain all sterilization staff to utilize the water marking in the sink along with the measuring cup as per manufacturer's recommendations.
3. To ensure compliance is maintained, the Director of Nursing will assess staff ability to adhere to IFU when completing annual competency.
4. The Director of Nursing is responsible for ensuring this PoC is maintained.
5. This corrective action will be completed on 4.13.18.

Americans United for Life

A4674

8:43A-17.1(e) HOUSEKEEPING-SANITATN-SAFETY: HOUSEKEEPING P&PS

1. The deficiency will be corrected as it relates to the individual by purchasing a transparent container that demarks measurements of liquids diluted and allows for proper labeling of said container.
2. Systemically, the center's Director of Nursing will retrain all clinical support staff to properly dilute chemicals using properly labeled container.
3. To ensure compliance is maintained, the Director of Nursing will asses staff ability to adhere to PoC when completing annual competency (formally) and on daily rounds (informally).
4. The Director of Nursing is responsible for ensuring this PoC is maintained.
5. This corrective action will be completed on 4.13.18.

A4797

8:43a-17.4(a)(15) HOUSEKEEPING-SANI & SAFETY: ENVIRNMNTL PT CARE SERV

1. The deficiency will be corrected as it relates to the individual in that the facility will;
   - Remove all tape residue from the cabinetry surfaces in the clean utility room.
   - Replace the cabinetry base in the decontamination room.
   - Re-trim the pass-thru window ensuring ability to clean.
   - Remove residue from base of OR#1 procedure table and repaint
   - Replace/repair monolithic flooring in OR #1 and hallway adjacent to OR #2
2. Systemically the Director of Nursing will retrain medical staff via a staff in-service to ensure that a sanitary environment is maintained at all times.
3. To ensure compliance is maintained, the facility's Director of Nursing will ensure the sanitary environment is maintained by conducting a monthly walkthrough of the ASC, alerting Director of needed repairs.
4. The Director of Nursing is responsible for ensuring this plan of correction.
5. The corrective action will be completed by 5.1.18

E 000	Initial Comments This was a Federal Recertification Survey conducted on 12/7/2017 and 12/8/2017. The facility is in substantial compliance with Emergency Preparedness Regulation CFR 416.54. The facility is not in compliance with the requirements of of 42 CFR Part 416, Subpart C requirements for Ambulatory Surgical Centers.	E 000		
Q 000	INITIAL COMMENTS An Immediate Jeopardy (IJ) was identified on 12/7/2017. The facility failed to ensure that manufacturers' Instructions For Use (IFUs) are followed for reprocessing Dilation and Evacuation (D&E) instruments. The IJ was removed on 12/8/2017 upon receipt of an acceptable plan of correction. The following Condition for Coverage was found to be out of compliance: 416.51 Infection Control	Q 000		
Q 081	PROGRAM SCOPE; PROGRAM ACTIVITIES CFR(s): 416.43(a), 416.43(c)(1) (a)(1) The program must include, but not be limited to, an ongoing program that demonstrates measurable improvement in patient health outcomes, and improves patient safety by using quality indicators or performance measures associated with improved health outcomes and by the identification and reduction of medical errors. (a)(2) The ASC must measure, analyze, and track quality indicators, adverse patient events,	Q 081

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

Q 081	Continued From page 1 infection control and other aspects of performance that includes care and services furnished in the ASC. (c)(1) The ASC must set priorities for its performance improvement activities that - (i) Focus on high risk, high volume, and problem-prone areas. (ii) Consider incidence, prevalence, and severity of problems in those areas. (iii) Affect health outcomes, patient safety, and quality of care. This STANDARD is not met as evidenced by: Based on review of facility documents and staff interview on 12/8/2017, it was determined that the facility failed to establish an ongoing program that measures the total operation and ensures patient safety in the facility. Findings include: Reference #1: The facility document titled, 'Quality Improvement Plan", states, "...The members of the Quality improvement Committee (QIC) are responsible for: Assuring that the review functions outlined in this plan are completed; Prioritizing issues referred to the QIC for review; Assuring that the data obtained through QI activities are analyzed, recommendations made, and appropriate follow up of a problem resolution done; ....Reporting on ongoing findings, studies, recommendations, and trends to the Governing Body quarterly and to the Medical Staff a minimum of six (6) times per year as appropriate. ...." Q 241	Continued From page 7 maintained for patients, staff and the general public. Findings include: 1. During a tour conducted at 10:30 AM, in the presence of Staff #7, the following were noted: a. Uncleanable tape residue was identified on cabinetry surfaces located within the clean utility room. b. The cabinet base located inside the decontamination room was damaged which would preclude cleaning. c. Trim surrounding the pass-thru window in the sterilization room exhibited uncleanable wood-like base material. d. The base on the procedure table being used within OR #1 appeared grimy and had a rust-colored residue on its surface. e. Uncleanable surface damage and open parted seams were found on the monolithic flooring located in the following locations: (i) The integral floor base within OR #1 (ii) In the hallway adjacent to OR #2 2. These findings were confirmed by Staff #7. C. Based on observation, staff interview, and review of facility documents, and nationally recognized guidelines, it was determined that the facility failed to ensure manufacturer's	Q 241

Q 241	Continued From page 12 a. After cleaning and disinfecting the D&E tray, Staff #8 removed his/her gloves and failed to perform hand hygiene prior to exiting the decontamination room. (i) The hand washing sink in the decontamination area was filled with chux pads and the alcohol-based hand rub was not readily accessible. (ii) When asked how he/she washes his/her hands, Staff #10 replied, "Sometimes I use the sink out there" and pointed to the OR corridor. (iii) When asked if he/she uses alcohol-based hand rub, Staff #10 replied by pointing to a bottle of hand sanitizer that was up high on a shelf in the decontamination room. 3. At 11:16 AM, during an observation of cleaning and disinfecting of Operating Room (OR) #1, between patients, the following was revealed: a. Staff #10 was using Opti-cide spray and a green towel to clean and disinfect the OR. (i) Staff #10 then failed to remove his/her gloves, prior to exiting the OR to obtain a green watering can and mop. (ii) After obtaining the watering can and mop, Staff #10 returned to the OR, with the same gloves on, mopped the floor, and failed to remove his/her gloves prior to exiting the OR to return the watering can and mop. (iii) Staff #10 then removed his/her gloves and failed to perform hand hygiene, prior to obtaining the next case cart and returning to OR #1.	Q 241

Q 242	Continued From page 17 b. The facility's Infection Control Program was provided and reviewed. Although CDC and OSHA guidelines were selected, there was no documented evidence that AAMI guidelines were selected by the facility. 2. The above finding was confirmed by Staff #2. B. Based on observation, staff interview, review of facility policies and procedures, and nationally recognized guidelines and regulations, it was determined that the facility failed to ensure an ongoing Infection Control program that adheres to OSHA regulations are implemented. Findings include: Reference #2: OSHA 29 CFR part 1910.1030(d)(3)(i) states, "Provision. When there is occupational exposure, the employer shall provide, at no cost to the employee, appropriate personal protective equipment such as, but not limited to, gloves, gowns, laboratory coats, face shields or masks and eye protection, and mouthpieces, resuscitation bags, pocket masks, or other ventilation devices. Personal protective equipment will be considered "appropriate" only if it does not permit blood or other potentially infectious materials to pass through to or reach the employee's work clothes, street clothes, undergarments, skin, eyes, mouth, or other mucous membranes under normal conditions of use and for the duration of time which the protective equipment will be used." 1. On 12/7/17 at 9:40 AM, during the entrance conference, Staff #2 confirmed that the facility's Infection Control program is based on Center for	Q 242

K 000	INITIAL COMMENTS This was a Federal Recertification Survey conducted on 12/08/17. This facility is not in substantial compliance with the National Fire Protection Association's 2012 Life Safety Code for this Federal Recertification Survey.	K 000		
K 321	Hazardous Areas - Enclosure CFR(s): NFPA 101 Hazardous Areas - Enclosure Hazardous areas must meet one of the following: *Contain 1 hour rated enclosure when non-sprinklered *Sprinkler protected with smoke resistive separation *Severe Hazard locations contain sprinkler protection and 1 hour separation with 3/4 hour rated self-closing doors 20.3.2, 21.3.2, 38.3.2, 38.3.2.2, 39.3.2.1, 39.3.2.2, 8.7 This STANDARD is not met as evidenced by: Based on observation and staff interview on 12/08/17, it was determined the facility failed to ensure that a fire safe environment is maintained for patients, staff and the general public. Findings include: 1. During a tour conducted at 10:30 AM, in the presence of Staff #7, the ceiling installed within the basement was found in disrepair, with damaged and missing tiles. This would allow the passage of smoke from one area to another inside the building. 2. This finding was confirmed by Staff #7.	K 321

POC Accepted 4/6/2018 SR

Tag 083: *Specify staff education and participation regarding annual QA project.*

1. The deficiency will be corrected as it relates to the individual by immediately choosing and implementing a performance improvement project for 2018. Staff to be educated in relation to chosen projects and their participation via staff meeting.
2. Systemically, annual performance improvement projects will also be addressed on the facility's Quality Improvement Plan and communicated to staff via staff meeting.
3. To ensure that compliance is maintained, implemented projects will be discussed during the quarterly QI committee meetings, and said discussions will be documented in the meeting minutes accordingly.
4. The facility's Director of Nursing is responsible for implementing the plan of correction. ✓
5. The corrective action will be completed by April 13, 1018. ✓

Tag 184: *Specify the timeframe for the MD signature.*

1. The deficiency will be corrected as it relates to the individual by updating the facility's policy regarding verbal orders to include the requirement that the order must be documented and signed by the ordering physicians within 3 business days. →
2. Systemically, the facility's Deputy Administrator (DA) will re-train all physicians regarding updated policy.
3. To ensure that compliance is maintained, the facility's Deputy Administrator will audit ten (10) charts for each physician on a monthly basis for six (6) months. ✓ from 12 to 6 mos ? why but OK
4. The facility's Deputy Administrator is responsible for implementing this plan of correction.
5. The corrective action will be completed by April 13, 2018.

Tag 241: *C, D, E, F, G: Specify how and when the monitoring will be conducted and to whom the results will be reported to.*

C. (From approved IJ PoC 12.7.17)

1. The corrective action was accomplished by ensuring that all IFU sheets were reprinted and made accessible to sterilization staff.
2. All patients within the facility would potentially be affected (surgical services curtailed until approval received from DoH staff onsite).
3. Instruments on site were re-sterilized as per IFU.
4. The systemic changes set in place so the deficiency does not reoccur;
    a. Binder created and located in sterilization area
    b. Documented medical staff in-service and discussions individually with each sterilization staff member.

Americans United for Life

5. The method by which this deficiency will be monitored to ensure this does not recur will be the Director of Nursing confirming the presence of the manual on a quarterly basis to ensure manual is present, accessible and up to date. The results of the DoN quarterly spot check will be reported quarterly to the QI committee and documented in the meeting minutes.
6. This corrective action was completed on 12/7/17.

1. The deficiency will be corrected as it relates to the individual by purchasing a water mark to ensure proper labeling of the sink.
2. Systemically the center's Director of Nursing will retrain all sterilization staff to utilize the water mark in the sink along with the measuring cup as per manufacturer's recommendations.
3. To ensure compliance is maintained, the Director of Nursing will assess staff ability to adhere to the IFU when completing staff annual competency. Completed annual competencies are reviewed by the facility's Deputy Director annually prior to becoming part of the staff person's employee record.
4. The Director of Nursing is responsible for ensuring this PoC is maintained.
5. This corrective action will be completed by 4.13.18.

D

1. The deficiency will be corrected as it relates to the individual by ensuring that all handwashing sinks are free of debris. Additionally alcohol based cleaners will be made available and within arms reach in every clinical area of the ASC.

2. Systemically, the Director of Nursing will retrain all staff on proper hand hygiene techniques.

3. To ensure that compliance is maintained, the Director of Nursing will assess staff ability to adhere to policy by performing monthly unannounced hand hygiene audits. The results of these monthly audits will be reported to the QI team on a quarterly basis and documented in both the QI meeting minutes and in the staff employee file.

4. The Director of Nursing is responsible for ensuring the PoC is adhered to.

5. The corrective action will be completed on 4.13.18

E

1. The deficiency will be corrected as it relates to the individual by ensuring that all handwashing sinks are free of debris. Additionally alcohol based cleaners will be made available and within arms reach in every clinical area of the ASC.

2. Systemically, the Director of Nursing will retrain all staff on proper hand hygiene techniques.

3. To ensure that compliance is maintained, the Director of Nursing will assess staff ability to adhere to policy by performing monthly unannounced hand hygiene audits. The results of these monthly audits will be reported to the QI team on a quarterly basis and documented in both the QI meeting minutes and in the staff employee file.
4. The Director of Nursing is responsible for ensuring the PoC is adhered to.
5. The corrective action will be completed on 4.13.18

F

1. The deficiency will be corrected as it relates to the individual by ensuring that all multiuse vials are labeled individually in addition to the boxes they are kept in.
2. Systemically the Director of Nursing will retrain all nursing staff on proper multi-use vial labeling.
3. To ensure that compliance is maintained, The Director of Nursing or her designee will spot check multiuse vials weekly to ensure they are labeled appropriately. Report of these weekly checks will be reported to the QI team quarterly.
4. The Director of Nursing is responsible for ensuring that the PoC is adhered to.
5. The corrective action will be completed on 4.13.18

G

1. The deficiency will be corrected as it relates to the individual by ensuring that all staff are ensuring that all of their head hair is secured beneath the surgical cap.
2. Systemically, the Director of Nursing will retrain all medical staff on proper use of surgical caps.
3. To ensure that compliance is maintained, the Director of Nursing will add "donned surgical attire appropriately" on unannounced hand hygiene audits. The results of these monthly audits will be reported to the QI team on a quarterly basis and documented in both the QI meeting minutes and in the staff employee file.
4. The Director of Nursing is responsible for ensuring the PoC is adhered to.
5. The corrective action will be completed on 4.13.18

Tag 242: A, B: Who are the results of the monitoring being reported to?

1. The deficiency will be corrected as it relates to the individual by:
    a. Updating the facility's Infection Control Plan to reflect the fact that the facility has selected and implemented guidelines from Association for the Advancement of Medical Instrumentation (AAMI), Occupational Safety and Health Administration (OSHA), and Centers for Disease Control and Prevention (CDC).

b. Ensuring that staff in decontamination area wea s adequate Personal Protective Equipment (PPE), including a Level 4 (impermeat le) gown.
c. Removing from the decontamination area any containers which could be easily punctured, and by updating the facility's policy regarding laboratory specimens, The updated policy will reflect that specimens will be transported from the decontamination area to the laboratory in a container which prevents leakage.

2. The systemic changes put into place for each deficiency are as follows:
   a. The facility's Deputy Administrator will provide an in-service for all personnel to educate them regarding the updated Infection Control pla n.
   b. The facility's Deputy Administrator will update the facility's PPE policy to reflect this change and will provide staff with education for a ll personnel regarding this update.
   c. The facility's Deputy Administrator will provide e ducation to the facility's personnel impacted by this change in policy, namely all pers onnel working in decontamination and the laboratory.
3. To ensure that compliance is maintained:
   a. The Infection Control Plan will be reviewed on an annual basis by the Quality Improvement Committee to ensure that the plan accurately reflects the chosen standards of the facility's program.
   b. The Level 4 gown requirement will be included in the facility's existing Hand Hygiene/PPE QI monitoring audits which occur or a monthly basis. The results of these monthly audits are reported in the quarterly Quality Improvement committee meetings.
   c. The facility's Deputy Administrator will update staff annual competencies and routinely audit staff use of PPE and transport containers to ensure compliance
4. The person responsible for ensuring these plans is the facility's Deputy Administrator
5. These corrective actions will be completed by April 13, 2018

Americans United for Life
